# Internet Proxy Message?

We are adding a step when accessing internet networks off-campus on your MVSD iPad.

Now, when you use your MVSD iPad to connect to the internet at home (or somewhere else off-campus), you will receive a message stating "Proxy Authentication Required."
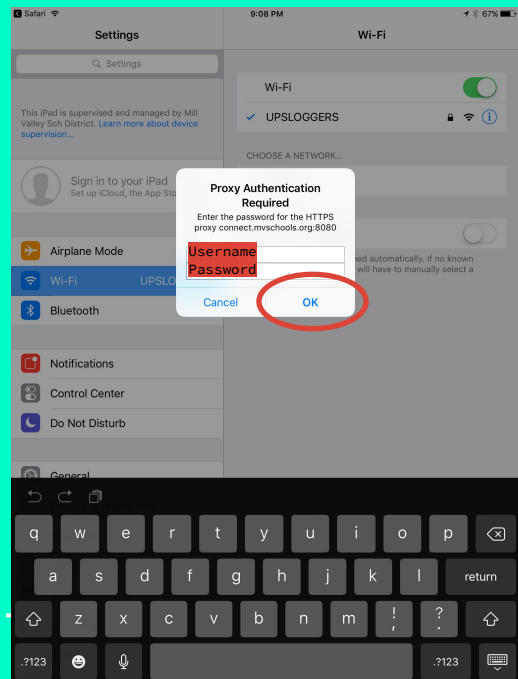

This message will pop up when you try to visit a website in chrome or safari.

You should tap Settings.

On the login screen, enter your MVSD username and password, then tap OK.

(Your username is your email address WITHOUT the @stu.mvschools.org.)

You will have to enter your information every time you connect to a new network, and sometimes you may have to re-enter your information on a known network.

Still having problems?
