

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/3/2021 16:24:44	6th	Yes	We don't have to rush that much.	Nothing.
5/3/2021 16:27:42	6th	Yes	not having to drive to school & back every day	nothing.
5/3/2021 17:19:55	7th	Yes		Very little social interaction
5/3/2021 17:23:52	6th	Yes		I think checking on google classroom and seeing the to-do list full of things for the week and I also thing being on an ipad and sitting down staring at a screen all day for 5 days every week was really annoying and hard.
5/3/2021 18:14:38	8th	Yes	I liked that my teachers were more understanding.	Un-muting anxiety
5/3/2021 18:42:22	6th	Yes	None	Using things such as ixl and apex that are repetitive, boring and annoying to use and deal with, and they have lots of technical problems (mostly apex) including at least five different error messages on apex, parser errors, not loading the entire screen, drag and drop options not working, not marking things as done, and buttons not working(the drag and drop options only work on computers as far as I know). On ixl it is mostly annoying, and very time consuming. You can literally spend hours on one ixl lesson and do over a hundred questions and have made little or no progress, while actually trying you best.
5/4/2021 8:06:09	6th	Yes		Having all your friends go back to in person and then here about all the fun they had
5/4/2021 8:29:41	7th	Yes	The habit of emailing teachers with questions.	Nothing really.
5/4/2021 10:28:01	6th	Yes	I appreciate that i get help from all the teachers.	From being late to class
5/4/2021 10:37:21	8th	Yes	I liked that my teachers were more understanding.	Un-muting anxiety
5/4/2021 10:45:23	8th	Yes	More time to do work in a familiar environment	Not understanding something clearly and not having a teacher able to show me in person
5/4/2021 12:37:51	7th	Yes	Having flexibility about when I do my work.	When zoom crashed it was really hard because I missed whatever the teacher was saying.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they don't take unnecessary risks.	Lots of homework.	I got good grades.
nothing.	socializing with other students	learning how to 3D model
		Getting straight A's every trimester.
	I think that when the pandemic happened you lost most of your friends.	
	Building more friendships, and being social.	Getting into Marin School of the Arts.
	Learning and lots more	I don't know
I don't know I like how last school year was.	Socializing with people.	Being able to keep up playing in the 8th grade math class.
I think next year is going to be great with all of the teachers helping other students.	Getting lots of homework from [Redacted]	I proud of doing IXL and trying not to get behind on anything.
	Building more friendships, and being social.	Getting into Marin School of the Arts.
Cancel school and do more EDL	End of the year events	Learning a new language
I hope they don't make it so we can't hang out with our friends during lunch/snack.	I'm not sure.	

	Please leave your email address if you would like us to follow up with you to share more information.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/4/2021 12:47:35	6th	Yes	I loved everything about distanced learning. I would be very happy if we continued to do it next year as well.	I didn't think anything was that hard.
5/4/2021 18:25:50	6th	Yes	The support we received from the teachers	I really like the whole idea of remote learning.
5/5/2021 9:06:01	6th	Yes	The support we received from the teachers	I really like the whole idea of remote learning.
5/5/2021 14:10:16	7th	Yes	More flexible teachers and classroom and fewer tests.	Changing teachers and schedule constantly.
5/10/2021 9:27:57	6th	Yes	Teachers that help me in learning new things.	That one week i had ten assignments due Friday and it was hard.
5/11/2021 9:53:49	6th	No	Nothing	Having different schedules all the time!
5/11/2021 10:07:38	6th	Yes		I think the EDL program wasn't good. I really didn't like it because it didn't feel like normal real school. The fact that we went from 6 periods with 6 teachers in the first trimester, to 2 teachers who just teach the 2 subjects every 3 or 6 weeks just wasn't good. The schedule was just confusing and weird. I think EDL would have been much much better if they simply put a camera in the classroom with the in person students in the class and the at home students virtually watching from the camera and following along. I mean, what's so hard about doing that? It felt like we were isolated in EDL and unproductive. I feel like I've missed out on so much learning!
5/11/2021 10:32:18	7th	Yes	I like the fact that I don't have to remember to bring my homework into school	Nothing, I have liked everything about remote learning and anything a I haven't liked has been about something the teacher did.
5/11/2021 10:34:18	7th	Yes	Less Homework, fewer teachers and less things to worry about.	The beginning of the school year, adapting, (which I'll have to do later again), the schedule change, the isolation.
5/11/2021 10:59:38	7th	Yes	Nothing.	

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I don't know.	I missed out on doing art as an elective which was a bummer but it is ok.	I am proud of my dog because she is starting to grow up and she does not chase cars as much.
	Socialization maybe	How hard I worked to learn
	Socialization maybe	How hard I worked to learn
Consistent schedule and more patience. Some teachers were patient and understanding and some were not.	I don't feel like i missed out on anything.	My grades.
Help all the students equally on there homework.	I miss having sleepovers and having play dates.	I am most proud of getting my homework done and teachers helping me learn.
Less Google classroom, more group projects, sitting in groups, choosing where you sit(in class and at lunch)	Meeting new people, having a normal first year in middle school	Becoming friends with a new person
I just hope once everyone goes back to school in person, that the classrooms are safe and comfortable. Carry out protocols seriously. Also, somehow try to catch us up on most important things we missed out on.	I think I missed out on just having a good 6th grade year because moving into the Mill Valley district for the first time was hard and then it got even harder when they started making EDL even more complicated and having new teachers and all that stuff. It's hard to keep up with that and EDL was just boring and unproductive. The lessons were just not the same as the first trimester.	I'm proud of getting straight A's every semester and only A's. I also got my first honor roll certificate from the first trimester. I'm proud that I was able to hang in there and keep up with everything as hard as it was to with everything going on.
Not make me present or talk in front of the class, and group projects	Nothing	
Less Homework, evenly spread out projects.	Art, Music, PE	The fact that I was able to get good grades, based on my situation, I was able to get onto the honor roll.
	Happiness, friends, school and life	Learning about myself after staring at a wall for a year, bonding with my pets and cello

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 11:47:07	7th	No		
5/11/2021 11:47:19	7th	Yes	I liked having less classes at a time, but I also liked having a rolling schedule because doing the same thing daily is exhausting.	Doing all of our work at home and then still getting "Homework"
5/11/2021 11:47:29	7th	Yes	I like the panther time that we have to work during lunch to get some of our homework done.	For me, it was hard coming back to in person because everyone was in a totally different educational place than me and I was kinda behind coming back from EDL.
5/11/2021 11:47:37	7th	No	How detailed the instructions in Google Classroom was and school starting later.	IPAD GLITCHES
5/11/2021 11:47:39	7th	No	I like the three classes at a time rotation and getting out of school at 2	Having to be on a screen all day and doing everything independent
5/11/2021 11:47:40	7th	No	The three class schedule, I get to learn more about the topics of those three classes, and the panther time/ or homework time every day during lunch.	Not being able to meet other kids in your classes, not being able to see mutual friends.
5/11/2021 11:48:19	7th	No	I like having my assignments on google classroom and having a study hall period.	
5/11/2021 11:48:24	7th	No		I think that Zoom was really hard.
5/11/2021 11:48:32	8th	No	I appreciated how all the teachers were more encouraging and understanding, I'd like to see that.	Looking at a screen for more than 16 hours a day. Also, staying in one spot the entire school day.
5/11/2021 11:48:33	7th	No	I liked study hall and the longer classes. They let us have more time going deeper in our learning. I also liked waking up earlier. I can't focus if I am sleepy.	I don't like zoom. It is problematic and annoying.
5/11/2021 11:48:44	8th	No		
5/11/2021 11:48:45	8th	No		
5/11/2021 11:48:51	8th	No		
5/11/2021 11:49:09	8th	No		
5/11/2021 11:49:10	8th	Yes		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	i lost some friendships and school knowledge	able to travel around the world while still attending online school.
I think that panther time daily is great, and we need more breaks i have maybe a total of 20 minutes daily to talk to my friends. I also dont like assigned eating areas.	All of my social skills	Making it through the year
Keep the homework panther time please.	Education mainly.	Being here.
I hope they keep the 3 classes at a time and the study hall period, but not the split lunches	Certain activities in classes also (I think) there would usually be a school dance	Getting through the year
I hope that they don't include having three of your harder classes all at once and your easier classes at another time.	I feel like I missed out on a lot of friendships	
	Lots of fun activities we couldn't do bcs of COVID, trips, activities, etc.	GETTING THROUGH THE YEAR.
I hope they have less zooms and that they keep the 40 minutes where we do homework.	I missed out on a lot of social interaction and a lot of science labs and art projects.	I am most proud of keeping up my grades.
I hope that there is more time for homework and hope that there isn't any more Zoom.	I feel like that I missed out on some fun in person projects and assignments.	Accomplishing tons of assignments despite the beginning of the year was virtual.
	I feel like I missed getting to know my peers better.	
I hope they combine our lunches so we can eat with our friends even if we are six feet apart.	We missed out on a lot of social interactions this year.	

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 11:49:17	8th	No		
5/11/2021 11:49:17	7th	No		Not being able to socialize that much. Also having to do zoom for a long time which can get boring.
5/11/2021 11:49:17	8th	No	Freedom	Not interaction with teachers and other students
5/11/2021 11:49:20	7th	No		Staying focused on zoom was very hard for me, so I was confused a lot. I hope that we don't have to return to zoom.
5/11/2021 11:49:20	8th	No	Lunches that were actually good	Motivation and social skills
5/11/2021 11:49:49	8th	Yes	I don't know	I don't know
5/11/2021 11:49:57	8th	No	I liked that I could use my own device, instead of a POS iPad.	Not being able to talk to the teacher.
5/11/2021 11:49:58	8th	No		
5/11/2021 11:49:59	7th	No	I liked how I could get a snack and short break when I needed one. I also liked how I could do whatever I wanted during the lunch break.	It was hard when teachers couldn't answer an email for a little while. It was also hard sometimes to follow along with what was being reached when it was on a screen. WiFi issues would occur and created some issues.
5/11/2021 11:50:14	8th	Yes		Not being able to communicate with the teacher
5/11/2021 11:50:24	8th	No	*	*
5/11/2021 11:50:37	8th	No	Being able to eat in class, more relaxed atmosphere, sleep in	

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they continue posting stuff on google classroom because it's very helpful for completing assignments. I also hope they continue to make it easy for us to contact them by emailing. I hope we have non split lunch too because it's annoying eating lunch later and not being with your friends.		I am most proud of how much we accomplished throughout the year with the restraints that we had.
Teachers are on edge	Social interaction	New hobbies
I hope they keep the Panther Time period, because it is very helpful, but get rid of the different lunch periods.	We didn't get to do the Cabaret this year or do different activities in classes because of COVID.	I am proud that I kept up my grades and did all my work.
Be better people	So much that it would hurt my fingers to type them all	Perseverance
I don't know	I don't know	I don't know
I hope that they don't make it go long into the afternoon	Socializing and Education	Nothing I did nothing
I hope that adults will recognize that it's been a rough year and maybe we haven't taken in as much information as previous years because of all the zooms instead of in person learning. I also hope that we won't have more zooms. I like the homework period we get during the lunch period we don't have, because it makes for less work after school. Sometimes it is hard to sit in such a small lunch group because you might not have friends, but I understand why we do.	I feel like I missed out on a lot of socialization and friend time. I also felt like I missed out just on learning and some cool school projects.	
*	*	*
	Class trips, class activities, class bonding, carnival free year, end of year trip, graduation	I grew 1 inch

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 11:50:50	8th	No	Shorter school day with less homework, I learned more that way.	Screen time.
5/11/2021 11:50:56	7th	Yes	that even if im not myself or ready to go into a classroom, i can still participate without disstracting my classmates. for example: if i woke up late and did not have time to get ready, i could still participate with my sceen off	having my parents in the backround talking to their friends, or talking to colleuges
5/11/2021 11:51:00	7th	No	I like that all my assignments were on classroom and I had a to do list. I think teachers were more understanding when I had a problem with my assignment, and I liked that. I also liked having more freedom with my day.	It was super hard to communicate with my teachers, The assignments were a lot harder because the instructions were not always clear Sometimes teachers didn't respond to emails or private Comments there was so many distractions I felt way more stressed out My question was not always answered sometimes teachers only communicated over google classroom
5/11/2021 11:51:14	7th	No	I liked not being as stressed and having more free time to do the things I like.	I did not like it when I was not able to get help or the directions to an assignment were to hard for me to understand.
5/11/2021 11:51:24	8th	No	I liked the lesser work load.	It was hard to pay attention and to contact the teachers.
5/11/2021 11:51:32	8th	No	I liked the lesser work load.	It was hard to pay attention and to contact the teachers.
5/11/2021 11:51:39	8th	No	Only 3 classes at a time	Zoom issues with the iPads
5/11/2021 11:51:40	8th	No	Having a lot of time for breaks	Zoom, socialism, focusing
5/11/2021 11:51:44	8th	No	I liked the lunches because I got to eat whatever I wanted.	Zoom and too much time on the iPads

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>No more social distancing.</p>	<p>Social time.</p>	<p>Getting new hobbies.</p>
<p>if your sick, or going somewhere that you can still participate in school in a nondistracting way. like having a computer in the back with you zooming. this would be good as long as people don't abuse it</p>	<p>social interactions, and doing fun science labs, and experiments</p>	<p>nothing</p>
<p>I hope they will continue to have the google classroom to do list I hope we can go back to normal lunch I like having less classes for a longer time because I can focus better I hope they don't make us write about the pandemic because it was really hard for some of use and we might not want to talk about it</p>	<p>I missed out on friends, and I think I fell behind in a lot of classes</p>	<p>staying organized</p>
<p>I hope they make it so there is only one lunch. I also would find it helpful to have three or four classes a day instead of five or six, It's a lot easier to do homework when you aren't constantly switching subjects.</p>	<p>I missed socializing.</p>	<p>I am proud that I got through this school year and got good grades too.</p>
<p>This isn't their fault but the teachers became a lot meaner I think because of stress and I just hope that they get their old personalities back</p>	<p>Making friends and doing hands on activities and experiments at school</p>	<p>Growing as a person</p>
<p>A lot more socializing, more breaks, shorter classes, not splitting up lunches</p>	<p>Projects, social, trips</p>	
	<p>I missed out on a lot of fun group work and meeting new friends.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 11:51:48	7th	Yes	I don't know. Most of the things i liked about remote learning couldn't really be carried into in-person school.	Communication between students and teachers and communication between students and students.
5/11/2021 11:52:48	8th	Yes	Being able to wake up early	Talking to other students in class
5/11/2021 11:52:48	8th	No	I liked having more office hour times with teachers, that was very helpful.	Not being able to talk with classmates!
5/11/2021 11:53:38	8th	Yes	No homework. It helped me focus in class and retain information. Going to school for 7 hours and then doing 2-3 hours of homework just isn't efficient	Breakout rooms and no cameras on.
5/11/2021 11:54:48	8th	Yes	Office hours. Just having the opportunity to speak with my teachers outside of class is very beneficial.	Staying focused. It was very hard for me to stop myself from doing something else in class and pay attention.
5/11/2021 11:55:48	8th	No		
5/11/2021 11:56:26	7th	No	The aspects of distanced learning that I appreciated the most this year was the flexibility I could have in my location, the fact that I did not have to do much to get ready for school, and the extended amount of time with each class due to the 3 by 3 model.	Being on a screen all day, having faster-paced classes, and experiencing distractions throughout the school day were my difficulties with remote learning.
5/11/2021 12:25:58	8th	Yes	Taking school at home	Nothing
5/11/2021 12:25:58	8th	No		
5/11/2021 12:26:18	8th	Yes	I got to sleep on my own schedule	It was not interactive and it was super boring

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they add a panther time every day. I hope they don't make the day longer.	I couldn't see any of my friends. My favorite part about school is seeing my friends and I could do that because of the pandemic.	I think my grades but that might change after math. Also just making it through the school year.
remove the eating areas and split lunches	I didn't get to do a lot of art and science projects	Getting an a in most of my classes
Talk with the kids! It's important to have adult opinions, but the kids are the ones having to go through schools, so ask them what they want their year to look like.	I lost connections with a lot of my friends, as well as that same class feeling. We may be getting there, but it's kinda late since it's the end of the year.	I'm pretty proud of keeping my grades up since it was really hard to find the motivation to do things this year due to distance learning.
I hope that adults understand that we are trying. Also I think that independent PE should be an option. Some people, like me, do sports many many hours a week and PE feels unnecessary	My education. If someone asked me what I learned this year I don't think I would have anything to say :(	Staying motivated enough to learn new things on my own
I want the administration and people involved with the district to listen to the teachers more, since that was something I noticed they were definitely not doing and should've done.	The chance to know my teachers and classmates.	Adapting and getting through it.
After the pandemic, I hope that adults allow a way for sick people to participate in classes. I hope they do not use a three class schedule in the same way (because it can result in an overload of work or hard exercise and unfair testing conditions(due to having to take the same test as other people who have had a whole trimester more of content than you)) or have more zooms.	I feel that I missed out on opportunities to interact with other people and do interesting projects during the pandemic in school this year.	I am proud of the way many people have learned to be better people because of the difficulties of this year.
Have there be a way to share questions anonymously	My free hour at the fair	My grades
	School planned activities.	
Keep everything sanitized	I think I could have done better in all of my classes, also hanging out with all my friends during lunch	Getting through the the year

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>Nope</p>	<p>Redacted</p>
	<p>Redacted</p>
<p>No, thank you for making this survey though.</p>	<p>Redacted</p>
<p>I think that the faculty and staff at this school should have more compassion for the students. In my three years here, I've felt like the staff and faculty treats everyone like a trouble maker or an inmate. Almost like they assume that we are up to no good just because we are teens? Of course there are teachers that I loved but lots of the staff was not the nicest.</p>	<p>Redacted</p>
<p>nope.</p>	<p>Redacted</p>
	<p>Redacted</p>
	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
	<p>Redacted</p>
	<p>Redacted</p>

What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 12:26:28	8th	No	The anonymous chat	Keeping focused
5/11/2021 12:26:48	8th	Yes	-The anonymous chat to teacher -sleeping later	-hard to focus -working in bedroom whole day
5/11/2021 12:26:58	8th	No	I liked the anonymous questions	It was really hard to focus
5/11/2021 12:27:18	8th	No	Getting to sleep in	Socializing
5/11/2021 12:27:28	8th	No	Nothing	It was really hard to focus and understand what we were learning
5/11/2021 12:27:28	8th	No	Staying home was nice but also a struggle	Having to stay home and getting distracted by everything
5/11/2021 12:27:28	8th	No		It was hard to focus and it was hard to keep up with the teacher.
5/11/2021 12:27:48	8th	Yes	Taking school at home	Nothing
5/11/2021 12:28:18	8th	No	I really liked how we were able to anonymously ask questions with our teacher during remote learning.	It was really hard staying engaged when I was just staring at a screen.
5/11/2021 12:28:38	8th	No	I have appreciated that everyone has to use hand sanitizer on the way in and out.	I didn't like that we couldn't see other people in our classes, and I didn't like that you couldn't one on one ask your teacher a question if it wasn't through zoom or email.
5/11/2021 12:28:48	8th	No	I feel like they didn't assign as many projects which was nice. Though we did miss out on some of the normal assignments it was good to have less work and only have to focus on three classes at a time.	

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
More interactive learning	Everything	Doing well in math
-make school end earlier so that there is more time to do homework before other activities rather than doing homework later at night	-Shakespeare -some of the curriculum -carnival free hour	
I'm not really sure	One thing is that I couldn't do some sports in PE that we would normally do like basketball	I'm most proud of getting through the year in general
Having 3 or four periods a day not 6 periods a day and shorter school days	Hanging out with friends and spending time outside of my house	My grades
Hopefully they will stick with the three classes only and also give us time to do homework or let us out early.	Football, baseball, friends, family, education.	Idk
I hope they give not much homework	I missed out on doing in class science stuff that could've been fun to do	Getting semi better grades and getting better at math
I would like more time to do homework or just no homework at all, we are in school for a big portion of the day and then we are sent home with more work.	We couldn't do basketball in PE	
Have there be a way to share questions anonymously	My free hour at the fair	My grades
I hope that they will make the most of the students being in close proximity to each other by making them talk in groups.	I feel like I missed out on actually getting to know my classmates.	I am proud of staying afloat during this year.
I hope that adults will maybe have less iPad usage, because of the pandemic, everything has been virtual, and so much screens, so maybe some more paper would be better.	I lost a lot of sports games, and if we were in person, I could have done a little better because I understood topics more.	I am proud of managing distance learning without damaging my eyes.
	I feel like I kinda missed out on parts of what we would learn and clubs. Though clubs were up and running, I felt odd signing into zoom to attend a club so I didn't sign up for one this year.	I'm actually proud of keeping my grades afloat.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 12:28:4	8th	No	Being able to sleep in and having more time after school to complete work before other activities begin. I have a lot of after school activities and often have to stay up late completing homework because I have no time to after school, so the extra time we got during both remote and hybrid learning was really helpful.	It was really hard to focus because I was in my bedroom with many distractions, and it was very hard to stare at a screen for so long.
5/11/2021 12:28:4	8th	Yes	I liked how you could ask questions in the chat privately	It was really stressful because you didn't have teachers there to help you
5/11/2021 12:28:5	8th	Yes	I didn't like remote learning at all in was really hard to keep track and talk with teachers but I did like the chat feature	Tech issues
5/11/2021 12:29:1	8th	No	Nothing, it was the worst schooling experience of my life, my grades were at a all time low in all classes and teachers expected me to still do 2 hours of homework a night, while I wasn't able to see friends and this made it so I really couldn't socialize our have fun with my friends. I became sad, and mentally I was also at a all time low. It was horrible.	Zoom, being home, and the homework amount. I couldn't handle it.
5/11/2021 12:29:2	8th	No	I liked being able to sleep longer than usual, because school was just across the room instead of 3 miles away.	I really hated zoom, because it was distracting and confusing, and we had to look at ourselves all day.
5/11/2021 12:30:0	8th	No	I liked how we could stay in the zoom meeting to talk to our teachers after class sometimes, and that got carried over to this year in person. I also liked how we could send something straight to the teacher without other classmates seeing it.	It was really hard to focus in my bedroom, and also the schedule was horrible. Also, Shakespeare over zoom was awful.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>Apply some good aspects of remote learning like work time and sleeping in more.</p>	<p>We missed a ton of curriculum and missed out on lots of fun activities that the school usually provides.</p>	<p>Getting through it all and maintaining good grades.</p>
<p>It was good only having 3 periods because it wasn't as stressful to manage all the work</p>	<p>I feel like I missed out on a lot like seeing friends as much seeing baseball games for example</p>	<p>I am proud I made it through distance learning</p>
<p>More student interaction</p>	<p>The carnival and the free hour</p>	<p>I'm proud that my Best friend helped me make new friends</p>
	<p>Everything, I have very little friends and I lost a lot of quarantine, school is my 1 opportunity to meet new people and that was taken from me.</p>	
<p>I liked having not all of the classes at once. It's been nice to only have three classes worth of homework at a time. I can't remember how I ever handled six.</p>	<p>I missed out on a lot. Before the pandemic I saw all my friends every day at school, but suddenly I was only seeing them on a camera, and it wasn't social at all.</p>	<p>I really proud of myself and my amazing group of friends, because we managed to keep our group together completely, and even add new members. I know that keeping friendships was really hard for a lot of people, so I'm really proud that we did it.</p>
<p>Keeping the office hour period after school ends is something I really love, because it gives me time to do homework at school, and I don't feel tempted to put it off for later. Also, I can ask my teachers for questions that I have WHILE I'm doing the homework, which is so much sending an email.</p> <p>Also, the 3x3 schedule is so much better than having 6 classes at a time. 6 classes adds so much to the homework load, and just creates so much more stress.</p>		<p>I'm proud that I kept up with my classes because it's really hard to do.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 12:30:0	8th	Yes	I liked how I could sleep in and wake up around 10 minutes before the zoom, it was very nice. I also liked the private comment section in zoom.	I could not focus on the computer for a long period at a time. It was hard for me to do tasks sometimes because I was staring at a screen the whole day.
5/11/2021 12:30:3	8th	No	I got to sleep in more and there want a big rush to get to school on time.	
5/11/2021 12:30:4	8th	No	I liked being able to sleep in and starting off the week mellow. I also like being able to type in the chat privately and raising my digital hand because it was less stressful.	I hated just staring at my screen all day and sitting there because it would get repetitive and my eyes would hurt, as well as me losing interest.
5/11/2021 12:31:0	8th	No	I liked the how in distanced learning I was able to get more sleep and didn't have to worry about forgetting supplies. I also like being able to ask questions more easily with my teachers because sometimes my teachers wouldn't see my hand and I wouldn't be able to ask a question.	I didn't like how hard it was to interact with the concepts being taught. And I also didn't like how I had to sit in the same place for hours.
5/11/2021 12:31:1	8th	No	I liked the one on one times we could have with teachers after zooms	It was a lot harder to focus
5/11/2021 12:31:1	8th	Yes		
5/11/2021 12:31:2	8th	No	More homework time, having panther time everyday. and the office hours time	3x3 schedule. zoom.
5/11/2021 12:31:4	8th	No	The office hours	Talking to people
5/11/2021 12:32:0	8th	No	I liked being at my desk and still being in my pajamas and not having to wake up as early.	Learning in general, and not getting distracted.
5/11/2021 12:32:0	8th	No	Shorter days	Focusing
5/11/2021 12:32:1	8th	Yes	I liked less homework	I didn't like having split lunch or zoom.
5/11/2021 12:32:1	8th	No		Organization was difficult because the teachers sometimes had trouble explaining things in detail.
5/11/2021 12:32:2	8th	No	Being at home	Learning in general was really hard.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope that they allow us to have more time to go home and do homework.	I feel I missed out on the basketball team this year, and in 7th grade, because it got cut short.	I am most proud of completing Spanish, math, and science for this year.
I hope we won't just be using our iPads or laptops because they tend to die really quickly and it's stressful and I miss doing more hand on kind of things like working on paper.	My friend was in a different cohort than me and my other friends and I feel like we missed the chance to truly experience eight grade together. Also last year i wasn't able to do Shakespeare in person, it was on zoom and it wasn't the same. We can't play certain sports in PE and curriculum has changed.	I'm proud of getting through it because at the beginning of the year I thought it would be really hard, which it was, but still the year is almost over.
I hope that they ant add a similar questioning system to classes so I can ask questions. I also hope they keep the 3 period blocks where we can concentrate on fewer subjects at the same time.	I feel that I lost a lot of time getting to know my teachers and I also feel like I learned a lot less. In many classes it feels like things were rushed and in comparison to other years it feels like very little was accomplished.	I am proud that I kept decent grades and was able to adapt to the new situation and do my best.
I hope they give the students more time to work in class	I feel like I missed out on a lot of the learning we should have gotten	I became more dedicated to sports and have started working harder
	making more friends and working together and talking.	
More work time like a panther time period	Field trips	
	How much more I could've learned if I were in the classroom.	My surfing.
Shorter days, long classes	Learning	
I hope they have more projects and let you hang out with more people. I hope we don't have to get so much "home" work.	I missed out on a lot of relationships and I was only friends with my old friends.	
	Nothing	Discovering more things I never knew I liked to do.
Keep the school days shorter	Science labs	Getting better at art

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 12:32:3	8th	Yes		
5/11/2021 12:32:4	8th	No	The teacher support time at the end of the day.	Just being isolated in your room all day with no real social interaction.
5/11/2021 12:32:4	8th	No	I liked being able to sleep in and starting off the week mellow. I also like being able to type in the chat privately and raising my digital hand because it was less stressful.	I hated just staring at my screen all day and sitting there because it would get repetitive and my eyes would hurt, as well as me losing interest.
5/11/2021 12:32:4	8th	Yes		
5/11/2021 12:32:5	8th	Yes	The short day were really nice beacuse I felt like I had a lot more time to do more homework and activities	Zoom.
5/11/2021 12:33:4	8th	No	Office hours and one on one time with teachers to ask questions.	All the schedules switching.
5/11/2021 12:34:0	8th	Yes	The ability to mute and just listen.	Staying concentrated on the class.
5/11/2021 12:34:1	8th	Yes	I liked the 3 by 3 but it got repetitive, so maybe a rolling schedule? Also 6 week in between switching was too long.	More homework because homework and class work were combined.
5/11/2021 12:34:3	8th	No	I really liked that we had more panther time to do homework. I also liked that we only had three of our classes at once.	I found staying focused on zoom hard and the class was pretty much the teacher talking the entire time.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	I feel like I missed out on opportunities to make new friends	I am proud of becoming a little more independent than previous years
I thought the classes were getting repetitive with just having 3 at a time. The 70 minute periods were really long so back to 60 minutes.	Trips, group projects, science labs, socializing.	That we have almost made it through a global pandemic.
I hope we won't just be using our iPads or laptops because they tend to die really quickly and it's stressful and I miss doing more hand on kind of things like working on paper.	My friend was in a different cohort than me and my other friends and I feel like we missed the chance to truly experience eight grade together. Also last year i wasn't able to do Shakespeare in person, it was on zoom and it wasn't the same. We can't play certain sports in PE and curriculum has changed.	I'm proud of getting through it because at the beginning of the year I thought it would be really hard, which it was, but still the year is almost over.
Make the day start earlier but have it end shorter and have the class time from 70 to 60	Sports	Doing well even though it was hard
I'm not sure if it's possible, but I really liked the smaller class sizes and I hope they can have something like that next year. Also, having clubs after school instead of at lunch or in the morning.	I feel like I missed out on labs in science class, and field trips.	I'm proud of getting better at drawing and making friends on my own instead of just following my friend group.
I hope they let us over around more. I hope they don't keep the windows open while class is in session.	Communication between peers.	Getting my assignments do quickly.
More big projects/ creative projects in classes, not just normal assignments.	Going to Stinson at the end of the year and the Memorial Day carnival. Also just field trips in general. Working in groups and doing labs.	I was able to keep my grades up even though doing this is a challenge and I didn't have many missing assignments. I always stay on top of my work.
I hope that we continue with the extended period and only half off our classes but the in-person schedule was really repetitive and the 70 minute classes are too long. I don't want to do the two lunches next year but I do like the panther community in the morning with the Kahoot!.	I feel like I missed group projects, labs and field trips.	Becoming more independent in school.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/11/2021 12:36:2	8th	No	Being able to not have to go anywhere isn't he morning and work from home. Starting school later than normal(later than 8:45)	Too much homework. They thought that because we were at home we would have all the time in the world to do school work but we have friend and family to hang out with and socialize we also need alone time to be on our phones or watch a show. The amount of homework they were giving us made our home lives impossible to enjoy.
5/11/2021 18:36:2	8th	No	I liked the lesser work load.	It was hard to pay attention and to contact the teachers.
5/11/2021 23:11:4	8th	Yes	Office hours. Just having the opportunity to speak with my teachers outside of class is very beneficial.	Staying focused. It was very hard for me to stop myself from doing something else in class and pay attention.
5/12/2021 7:46:05	7th	No	The forty minute work period everyday	The constant change in schedule was really hard for me
5/12/2021 8:50:58	7th	No	Getting to sleep in	Zoom
5/12/2021 8:52:06	8th	No	Nothing	Having to continue to be happy everyday during zoom and never leaving my house for a really long time.
5/12/2021 9:01:16	6th	Yes	Teachers helping me learn during the year.	One of my teachers posted 10 assignments due Friday it was hard.
5/12/2021 9:17:16	8th	No	I really liked that we had more panther time to do homework. I also liked that we only had three of our classes at once.	I found staying focused on zoom hard and the class was pretty much the teacher talking the entire time.
5/12/2021 9:19:17	6th	Yes	Total online assignments, it's much easier to do homework on the school iPads than on paper. Also, there should be a later start time so that students can get a full night's sleep and still get to school on time.	Nothing was hard, I love EDL. Except the Apex electives, those were unmanageable.
5/12/2021 9:28:59	6th	Yes		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	Club trips Field trips Science labs	The art and skills I've picked up. I learned how to juggle up to 5 items at a time. I sell portraits and drawings I've done of people, animals, and plants. And I've learned how to play ukulele.
I want the administration and people involved with the district to listen to the teachers more, since that was something I noticed they were definitely not doing and should've done.	The chance to know my teachers and classmates.	Adapting and getting through it.
I'm not sure	I feel like I missed out on a lot of time with friends	My Afghanistan writing in [Redacted's] class
No more zoom	Fun	Nothing
I hope they understand we didn't really learn to much this year because of distance learning. I hope they take it easy on us and just understand what we as the students have gone through.	My social life, all the feild trips (3) we take in my two years.	Nothing
Having sleepovers and play dates.	I missed shaking hands with other people.	Trying my best on school work.
I hope that we continue with the extended period and only half off our classes but the in-person schedule was really repetitive and the 70 minute classes are too long. I don't want to do the two lunches next year but I do like the panther community in the morning with the Kahoot!.	I feel like I missed group projects, labs and field trips.	Becoming more independent in school.
There should be a later start time so that students can get a full night's sleep and still get to school on time. Also, no paper, just online.	I miss being able to see my friends at school.	My grades went up very quickly.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 10:03:0	8th	No	I liked being at my desk and still being in my pajamas and not having to wake up as early.	Learning in general, and not getting distracted.
5/12/2021 10:14:1	8th	Yes	More free time	Waiting for help
5/12/2021 10:21:3	8th	Yes		
5/12/2021 10:32:2	8th	Yes	I liked working on homework in class so I could get a majority of it done and I could ask for help if I needed to. We also had more responsibility but had a more free schedule which I liked.	There was a lot of work due to teachers thinking we don't have other things to do since we're at home, and it was very easy to get distracted.
5/12/2021 10:39:1	7th	No	Probably the west breakout rooms. No thanks. :)	I'd say like raising a hand to get called on. Always made me a nervous wreck.
5/12/2021 10:48:4	8th	Yes	The freer schedule, more independence, teachers seem more understanding and less amount of work that was given.	The participation is harder and zoom.
5/12/2021 10:51:4	8th	Yes	-The anonymous chat to teacher -sleeping later	-hard to focus -working in bedroom whole day
5/12/2021 10:53:4	8th	Yes	The interaction with multiple subjects and convenience of portability	way to many Teachers assigned for the same class to many sites
5/12/2021 10:55:0	8th	Yes	Possibly the flexibility of the schedule, as well as any safety precautions that are needed depending on the Covid situation in August. It also led me to expand my view of the world, and I would like to continue that.	I did have mental health issues late last year, which I'm still getting out of today, and it was one of the hardest things I've ever dealt with. The isolation got to me a lot as well, all of my friends went to in-person and I lost all of my teachers. This led me down some paths I did not want to go down, and I'm very lucky that my parents reached out for help, so that I got better. IXL and Apex were painful.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	How much more I could've learned if I were in the classroom.	My surfing.
	End of the year events	I don't know
I hope they won't throw a lot of homework at us because we've become reliant on having time to do it and it will be very stressful to be pushed to move at a faster pace.	I think I missed out on the fun end of middle school experiences like signing yearbooks and just having fun, I also think our education was not as good this year.	I don't know, I'm proud I didn't get Coronavirus
Hugs!!! I love hugging people! I don't see any problems with what's happening now.	Meeting new people, exploring campus, having friends.	My grades!
To have a freer schedule and to let the students be more independent. Teacher need to be more understanding. I hope that there is no more zoom.	I feel like I missed out on a lot of celebrations and dances and memories that I could have made with friends.	I am most proud that I stuck through and never gave up on my grades during this tough time and that my mom is at the end stages of her cancer treatment.
-make school end earlier so that there is more time to do homework before other activities rather than doing homework later at night	-Shakespeare -some of the curriculum -carnival free hour	
incorporate distance learning on a everyday basis to many sites programs to enter etc	Social interaction	I feel like I've learned who to be more independent
I hope that adults continue to require masks to be worn on students and teachers and staff, as long as it is needed by the CDC and the government. I hope that the schools will help the extended distance learning connect back with the rest of the school, and repair the divide that has formed. Teachers and the school need to focus more on individual students and less on a collective image, and help students expand on our interests.	I feel like I missed out on the full experience of my 8th grade year, this was not how I expected my last year of Middle School to go. I also almost lost a lot of my friendships that I had, and missed a lot of social interactions and experiences. I missed a lot of my education as well, I don't think I fully absorbed what I learned this year, because there was so much work and not enough engagement and interest to fully learn the information.	I am proud that I got out of the dark spot I was in, and continued to stay healthy and safe. My family managed to keep healthy, and none of us got sick. We do know many people who died of Covid, and that helped motivate us to stay inside all this time.

	<p>Redacted</p>
<p>im glad things are getting better</p>	<p>Redacted</p>
<p>I believe that the school did not focus on the Extended Distance learning program as much as it should have, and put us with online programs in which we did not learn as much as we should have. I was appreciative of the zoom instruction that we did get, but it wasn't too great, and the asynchronous work often ended up taking longer than the classes themselves. I am looking forward to safely connecting again with teachers, the school, and fellow students again, and engage fully in the school learning environment again. Please work to engage with students more and let them develop themselves and help them to learn as much as they can.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 10:58:1	8th	Yes	I had a freer schedule and more free time. I also had much less homework and not as many project which allowed me to focus and undersand school much better.	Wifi issues.
5/12/2021 11:01:4	8th	Yes	I love being able to go to bed later and wake up later. I also like being able to eat food and use my phone during lunch and class. I also like sitting in my comfortable chair.	Not being able to get clarification or help on projects, also all the distractions around my house when i am trying to learn.
5/12/2021 11:04:5	8th	Yes	If your hw on IXL is done a little late you can still do it later.	IXL issues
5/12/2021 11:16:4	8th	Yes	The understanding from all my teachers	Zoom technicalities
5/12/2021 11:18:0	6th	Yes	I would still like to be able to turn things in on google classroom, I don't want the homework system to change.	Nothing, I like remote learning.
5/12/2021 11:20:4	8th	Yes	Not having so much homework	Logging into zoom a lot
5/12/2021 11:37:4	8th	No	None. It was stressful and many teachers didn't respond for hours or even days.	Having to email teachers and wait for their response, then have to wait to turn in HW because you didn't understand. Many times I had to ask my friends because my teacher wasn't responding.
5/12/2021 11:38:5	8th	Yes	Breakout rooms that were in zoom were really fun.	Nothing. I liked remote learning just as much as in person learning.
5/12/2021 11:41:2	7th	No	I would like to be able to socialize more and be with more friends	Being on zoom
5/12/2021 11:41:2	7th	No	i liked how there wasn't that much standards on how you dress. i also i liked how you can eat in class.	
5/12/2021 11:41:3	7th	No		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they keep the shorter schedules and wont give us as much projects and homework.	Spending time with my friends.	I had much better grades than 6 and seventh grade.
Understand that we may get tired and board easier because we haven't been around social environments in a long time. Also lessen the work load and try to be exciting so kids don't fall asleep in class.	Sports, us student are probably behind on a lot of stuff compared to if we were in person.	Becoming a stronger skier and getting good at pull ups.
	Social interactions.	Grades.
	School events and social aspects of life	
I think we should do online school next year too.	I don't think I missed out on that much stuff for 6th grade. I did miss out on going out to lunch with my fifth grade teacher and having an end of the year party.	I am proud of some of the crafts I made.
I hope they understand that we havent seen our friends in a long time and want to talk to them more than usual	Social Interactions with friends and people my age	graduating
Better communication skills, have teachers communicate with each other to understand how much HW is being assigned.	Graduation and the school carnival. Also many experiences.	Being able to adapt.
Staying outside more	Working in groups.	Getting through the hard time with all the confusing schedules.
Put more activities to do and make it so we don't have to sit through 70 min of class in one sitting	A lot of socializing and biking	Learning how to skate again
i didn't like how teachers left homework upon us. i think this made us very unstable and disorganized.	hanging out with friends and going to go see things outside of class.	..
I hope that they don't split up the lunches again, as that was hard to not see my friends for half the time we went full back.	Probably social things like not seeing friends or being able to do group work in school

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:42:10	7th	No	I would like to be able to socialize more and be with more friends	Being on zoom
5/12/2021 11:42:20	8th	No		
5/12/2021 11:42:30	7th	No	I liked having a study period to do homework.	Having to be inside on zoom all day.
5/12/2021 11:42:40	8th	Yes		Remote learning sucked
5/12/2021 11:42:50	8th	No	It was nice not to have to leave the house till later.	Not being able to meet with teachers as easily.
5/12/2021 11:43:20	7th	Yes	Only having school till 2	1 hour and 10 minute classes, they are to long
5/12/2021 11:43:30	8th	No		Not knowing what is happening until right before. (For example what the school year is going to look like or how it will work)
5/12/2021 11:43:40	7th	Yes		The schedule was always being changed. Sometimes you could be in the middle of class and your power turns off or you screen starts to glitch.
5/12/2021 11:45:00	7th	No	I did like the fact that I could sleep in more.	It was hard to stay focused and not get distracted while on zoom.
5/12/2021 11:45:00	7th	No	I don't really like anything about remote learning i like being with my friends	Zoom and sitting at my desk for that long also not getting the support needed
5/12/2021 11:45:10	7th	Yes	Having our own time to do work in class not just panther time.	When teacher would put us in break out rooms to do assignments together.
5/12/2021 11:45:30	7th	Yes		Struggling with WiFi and zoom technological issues. The lack of bond between students. It was like being in a classroom by yourself. It was hard to answer questions and be called on with mute buttons not working, and even a 5 second delay of silence would make the class very uncomfortable.
5/12/2021 11:45:50	7th	Yes		Not getting enough instructions on the assignments

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Put more activities to do and make it so we don't have to sit through 70 min of class in one sitting	A lot of socializing and biking	Learning how to skate again
	I feel like I missed some hands on activities and missed out on a lot of independence. A lot of special events were also missed.	
I hope they don't make lunch separated because I can't eat with my friends.	I think I missed out on a lot of fun activities we weren't able to do on zoom.	
I'm not going to mvms next year	All 5 classes at a time	My grades
I hope we have extra time after school.	Hands on activities.	My grades
I hope they keep the panther times and i hope we don't have the split lunches	I feel like I missed out on not having to have lunch with all my friends.	I am proud that we finally were able to come back to school this year.
Less homework for some classes because it is really stressful	Activities like the carnival or some projects in classes that I have been looking forward to since 6th grade.	
Hopefully they make school later so I can sleep in more.	I feel like I missed out on the social aspect the most.	I am most proud of my grades.
	Field trips and a lot of school work	How hard i have tried
More work but to have time in class to do it so we can ask the teachers for help when we didn't get to do that in zoom.	I do think that I missed out in learning	Having more time to study for tests and quizzes.
I want school to be the exact same as it was before COVID. Even now, school gets boring with only three classes, and hybrid was horrendous.		
Maybe adding more panther time like we do, preferably not at lunch. I hope we don't do the split lunch next year.	Hands on projects, and social time.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:46:10	6th	No		being able to focus and not get distracted.
5/12/2021 11:46:11	8th	No	Group discussions	Zoom
5/12/2021 11:46:30	7th	Yes		Having to do way more of the work all by yourself and not in class.
5/12/2021 11:46:30	7th	No	The 3 class system	Wifi connection
5/12/2021 11:46:40	8th	No	The independence of learning at home and the trust our teachers give us.	Having no class discussions.
5/12/2021 11:46:40	7th	Yes	I appreciated that we started school this year more organized than last spring. I like starting a little later.	Operating zooms and navigating google classroom
5/12/2021 11:46:50	7th	Yes	None.	I hated zoom because I was stuck in a room staring at a screen for hours then I had homework on top of that. I hope I never have to enter a zoom meeting ever again.
5/12/2021 11:46:50	7th	Yes	School started later, so I have more time to get ready each morning and get to school. I also want there to be panther community in the morning with a friday Kahoot.	
5/12/2021 11:47:10	7th	No	Staying at home getting to sleep in and in want in person to start later than 8:40	You could be on zoom but not pay attention
5/12/2021 11:47:10	7th	No	I enjoyed Zoom Panther Community rather than Panther Community on the live speaker. I enjoyed later start times and Zoom Office Hours. I love the Friday Kahoots.	Internet issues, Audio Issues, and confusing instructions.
5/12/2021 11:47:20	7th	Yes	Sleeping in	Doing assignments with lack of instruction
5/12/2021 11:47:30	8th	No		Not having to use school iPads because they never work that well

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
i hope that they make it so it is full in-person and not hybrid	a lot of learning	overall progress
	Field trips, graduation, hands on science experiments	
I hope they continue the Friday Kahoot!	We lost the school festival :(	
I hope they let us do many hand on type of assignment	Having a connection with friends	Staying friends with many people
Make sure that students have the opportunity to talk to one another and listen to each other's ideas.	Making new friends before high school.	My academic achievements and perseverance.
Keep Friday Kahoot! And I hope they don't have sitting areas for lunch.	Fun school events like field day and pig races.	Getting through hard stressful classes.
Please call asynchronous work homework. Keep Friday Kahoots. Ditch panther community.	I feel like I lost a lot of asocial life while I was online, and even in person because of all the restrictions there wasn't many chances to meet people. And my math teachers kept switching and the teachers didn't know where we left off so i feel like in math I lost some lessons.	I'm proud that through all this I maintained to keep my grades at an A the entire time and not get COVID.
Not 6 periods a day	The carnival, and field trips	Getting homework done
I really hope adults don't remove any electives.		
More lunch time to play on the field	I don't know	A in math
Not put too much pressure on us and realize that we just got out of a bad year	FIELD TRIPS	Ability to adapt and not lose my mind after adults say that it shouldn't be too hard and not really understand how difficult it is.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:47:38	8th	No		Not getting distracted
5/12/2021 11:47:46	6th	No	Focusing easier and not having to pack my bags	Internet issues, no sound schedule, help being difficult to get and days feeling longer.
5/12/2021 11:47:51	8th	No	I didn't like remote learning at all.	having all of my classes on a screen and doing all of my homework on a screen every day.
5/12/2021 11:48:21	7th	No	More opportunities with the teacher to teach you alone so it is more specific to you questions and understanding of the topic.	Zoom and the controlled seating in the lunch area
5/12/2021 11:48:27	7th	Yes	Sleeping	Go to school
5/12/2021 11:48:33	8th	No	I liked that we got to use our own devices.	Communication with teachers and the huge amount of homework and screen time.
5/12/2021 11:48:41	7th	No	I liked the simple entrance to the week, where there was Zoom on Mondays and Tuesdays. It makes a nice transition from the weekend to school week.	Zoom five days a week for multiple hours each day, and keeping cameras on during zoom.
5/12/2021 11:48:51	7th	Yes	Having a shorter day	Just because we had asynchronous doesn't mean we should get extra homework it was really hard to manage and I fell behind.
5/12/2021 11:48:56	6th	Yes	If you forgot something at home. You can just go find it. But not anymore.	At home I got distracted SOOO easily.
5/12/2021 11:49:00	6th	Yes	,	Waking up early, and all the stress from all the work with not a lot of help
5/12/2021 11:49:14	7th	Yes	Having three classes a day	Having to go on zoom

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Back to full time normal schedule in person	Field trips like Disney Land.	
Being able to keep more stuff at school and I hope they don't make help only accessible via emails	Meeting new friends and becoming friends with my classmates.	I have almost all a's
Try to make things normal again, like they were before COVID.	Graduation, 8th grade dance, having fun at school in general, field trips	I made new friends and I made it through
Teach students more engagingly	Learning but only when we zoomed	My understanding of the topics taught in math because i had to teach myself algebra because i was in a ten day quarantine and could not attend school.
Word	Brain	Sleeping
I hope they go back to the rotating schedule.	Field trips to different fun places.	Being more social and getting closer with people in my classes.
	I lost out on Cross Country Club this year, and seeing my friends during actual school for the most part.	Coming through the entire school year with great grades because many peoples grades dropped during remote learning.
I hope they don't Make the school day longer and give us way to much homework	I was completely overwhelmed with homework	Not having a F
We have a period for just playing around and having fun. We did not really get to do that this year.	I don't really know what I missed out on. I have never felt the real middle school feel.	I am really proud that I have made SO many new great friends.
Maybe add some lockers	,	,
I hope we can have a panther time period a couple days a week during school, preferably not at lunch. I hope we can still have three-4 classes a day. I hope we don't have to split lunch, I hope we dont have to have 7 classes a day. That would very tiring after this year.	The in person experience, hands on projects, and social time.

I have a lot of sports and other activities and it is very very hard to get work done when you get a whole weeks worth of assignments in one day because of asynchronous and are expected to complete all of it because we have asynchronous	Redacted
No.	Redacted
nope	Redacted
Please don't make us go to 7 classes, I would like to have three classes a day. For example: 1-3 on Monday and then 4-6 on Tuesday. Or something like that. Also, a panther time period would be nice to have added into school at the end of the day.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:49:36	6th	No	Everything being written on google classroom was nice because then you knew exactly what your homework was and when and where to turn in your homework.	Internet problems, and sometimes it was hard to collaborate with people in breakout rooms.
5/12/2021 11:49:56	8th	No	I did appreciate being able to stay at home and not wake up as early as before.	
5/12/2021 11:50:00	8th	No	The rolling schedule.	So much time on a screen.
5/12/2021 11:50:00	7th	Yes		
5/12/2021 11:50:00	8th	No	I liked the amount of time that we had after school, and I would like that even if we had to start earlier.	I didn't like all of the communication problems that we had with teachers
5/12/2021 11:50:00	8th	Yes	How flexible some teachers are	Hard time focusing and keeping up with friends
5/12/2021 11:50:11	8th	No	I did not like remote learning, so I don't really want anything about it to be carried back into in-person schooling.	The constant zooms and electronic based learning really took a toll on my mental health. I really don't wish to use zoom again for school because I really had a hard time focusing and it was overall not a pleasant experience for me.
5/12/2021 11:50:11	8th	Yes	I liked being home.	The amount of homework we had.
5/12/2021 11:50:21	8th	No		It was really easy to be distracted and was pretty hard to manage my time properly.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I really hope adults can pick a plan and stay with to minimize the craziness of schedule changes. I also hope the 3x3 is not continued because I think lots of people dislike having the same classes everyday and even though the work is the same amount, it is less interesting because it is all from the same classes.</p>	<p>I missed out on almost all the benefits of being at the middle school, field trips, the end of the year trips, our carnival things. I also feel like I missed out on a lot of social things and that my ability to interact with other people got bad.</p>	
<p>Have so many changes to the schedule.</p>	<p>Field Trips and big science experiments.</p>	<p>Completing the year.</p>
<p>I hope that they try to give an even amount of homework throughout our classes</p>	<p>I feel like I lost all of the different field trips that we would have done for all of my classes</p>	<p>I am most proud of the exercise that I did during hybrid learning because of the extra time that I had.</p>
<p>Be flexible and focus on individual learning</p>	<p>School experiences and friends</p>	<p>Being able to get through it</p>
<p>I hope the teachers will include more hands on activities, as during the pandemic, the activities and projects we used to be able to do, were not available to us. I hope they don't base classes on notes and lectures because it is really hard to stay engaged in that type of environment.</p>	<p>I was really upset that we weren't able to go on field trips and the carnival was canceled. Our grade never got to go to the school carnival an hour early every single year. One year it was because of technical difficulties, the past year and this year it was because of covid. It has been really disappointing.</p>	<p>I am most proud of keeping my grades up and getting through the school year.</p>
<p>Well I'm going to tam next year and I hope the teachers understand me.</p>	<p>Field trips, and vacation.</p>	<p>Being okay with online school.</p>
<p>I hope that they will manage the workload so that it isn't so hard. One thing I hope they don't do is have a lot of homework.</p>	<p>I missed out on a lot of field trips and physical activities we would've done otherwise, like singing at a Giants game. I also missed out on socializing with my peers because almost everything was split separating the school.</p>	<p>despite not socializing much in person, I managed to make a lot of friends during the pandemic and also managed to keep my grades up with the amount of homework.</p>

For next year, bring back the rolling schedule.	Redacted
	Redacted
This might seem strange, but I think that the panther café should have a different name. I've asked a lot of different people, and they all said that coming into MVMS, they believed that the panther cafe was a sort of snack-shack affair where you can buy food, due to the "cafe" in the name. It seems to be misleading a lot of people.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:50:4	8th	No		I found it hard to be able to be productive during online school, having the distractions at home.
5/12/2021 11:50:4	8th	No	Not much cause for most people it was way harder in almost every way so idk. I can't rly say cause I loved online	Nothing rly I think I got less education tho
5/12/2021 11:50:5	8th	No	Nothing, remote learning did not work at all for me, and is an experience I do not wish to repeat in any way shape or form	All of it, I am not a procrastinator, but remote learning gave me an outlet to do so, also being on the screen all day was not good for anyone, as well as having to sit all day, and limited social contact
5/12/2021 11:51:0	8th	No	I appreciated breaks and staying at home.	I was never able to concentrate, and zoom is very difficult for people with different learning strategies.
5/12/2021 11:51:0	8th	No	I can't think of anything that I'd want carried back into in-person.	I didn't like the homework load. We had to cram what we learned into a smaller time.
5/12/2021 11:51:0	8th	No	In remote learning, I liked the flexibility of time and the ability to complete all of my work at home in a short amount of time. Also, the days/classes were shorter and fit into my daily schedule (which is very busy) much easier.	The one thing that I disliked about online school was that we had to be on a screen for hours on end, which took a toll on my focus and energy.
5/12/2021 11:51:1	8th	No	I appreciated teachers being understanding of people who don't feel comfortable participating and using the chat instead.	It was really hard to not get frustrated with the Zoom or any of my classes online.
5/12/2021 11:51:1	7th	Yes		
5/12/2021 11:51:2	8th	No		
5/12/2021 11:51:2	7th	No	More freedom being able to go out for lunch	Being able to go on your phone and Fall asleep whenever you want to

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I like having time at the end of the day that allows students to see teachers so that they can ask questions about assignments or exams. Right now there are assigned eating times and areas, which I don't prefer because it separates friend groups.	I lost a lot of time that I could have spent with my friends, and there were projects and activities in classes that we weren't able to do.	I'm proud of getting through the online school period with all of the constant changes, and I was able to maintain good grades during that time.
I hope they don't do the same 3 class thing because it is way to repetitive I kind of went insane cause of this	Education	Still having a social life cause discord is rly pog
Go back to last year's schedule, it worked really well for me	Dances, field trips, concerts, hands-on-learning, normal graduation, social relationships...	Being able to manage remote learning and hybrid school.
I hope adults will understand the feelings of students and I hope that the school will not do zoom classes.	I missed out on what a normal eight grader would experience like the carnival and going to the beach and socializing.	I am proud of keeping up my grades.
I hope they'll teach us slower and I hope they don't add more work.	The carnival, going to Disney land, and 2 graduation parties.	I'm proud of not failing all my classes.
Next year I hope that the high school teachers ease us back into the regular 6 class schedule. This is because we have only been doing homework for and focusing on three classes and subjects, which will make it harder to complete a full rotation of classes in high school. In addition, I hope that in-person school is made better through having less amounts of work because it causes me serious stress and takes away from my actual life.	Due to the pandemic, I feel like I missed out on all of the fun activities this year. For example, I was supposed to go to Disneyland and Washington D.C. for school trips, but everything got cancelled and now the only field trip I can go on is to Hauke Park.	I am most proud that I was able to manage my time and work in this very transitional and confusing year.
I hope adults will understand how hard running in a mask is, and will be flexible and understanding with PE because running in a mask very difficult.	I feel like I have missed out on all the special eighth grade events, like the free carnival hour, graduation at the beach, and the dances.	I am proud of my newfound motivation and drive.
No split lunches	Field trips	Skating

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:51:2	8th	Yes	None	Communication between teachers on how much homework/class work was given during the week and or weekends depending on the teacher. Teachers would also take a while to answers help emails so people would have to reach out to other students they knew for help or would be lost.
5/12/2021 11:51:2	8th	No	I enjoyed only having three classes to focus on for the week. I think if I had all of. My classes every day then I would feel more stressed about getting tons of work turned in.	I hope I never have to deal with the terrible communication with teachers like during distanced learning. I was unable to ask questions to my teachers, and it was hard to understand the things we were learning on zoom.
5/12/2021 11:51:3	8th	No	Kahoot	Zoom, staying focused
5/12/2021 11:51:4	6th	No	Well, school got out a little earlier so I had more time to do my after school activities which really helped me.	Honestly, just turning in the work at google classroom. I remembered to do my work but I just disliked and forgot to do the stuff on google classroom.
5/12/2021 11:51:4	8th	No		Remote learning was hard for everyone. It was super hard to focus during zoom, and it was hard to get what you needed. Working in 'breakout' rooms was also super awkward. Zoom gave a lot of students bad learning habits, such as cheating, and skipping class. I hope this is not used as a tool in the future.
5/12/2021 11:51:4	8th	No	I liked the fact that we had less class time and more homework, being done with school at 1:00 and then doing an hour of homework after was much easier as less physically draining than staying in classes until 2:00	I thought that missing the in person social experience was hard and something I hope never returns to school
5/12/2021 11:51:5	8th	Yes	Short days and sleeping in	Math

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they reduce the amount of transitions they decide to make and or change. I also hope they will do review on much of the work we have done this year to know that each student was able to pieces the right amount of information and understood the information well.	Yes. I think as an eight grader I have missed on a lot of opportunities such as field trips to NYC and Washington D.C. I also think although graduation might be in person the excitement level will have been reduced because of caution ,ensures such as masks.	Keeping grades at a decent grade.
I hope they keep the number of classes per day down, like only 4 classes a day, or make sure there is only a max of 2:30 hours of homework a day. I hope they don't pack on tons of classes and homework because that makes school super stressful especially for people who have not learned how to organize their work.	I feel like I missed out on hands on activity's that we had to avoid because of the pandemic.	I am proud of learning how to organize my homework and responsibilities, and learning more about myself.
No school Friday, instead add 30-45 min to the other school days.	Social stuff and dances	Nothing
Stop using google classroom. I also just want the full middle school experience.	Basically, everything.	That I still managed to keep up.
NO ZOOM PLEASE	I missed a LOT of field trips. I have been doing chorus for six years, and eighth grade would've been the year of glory for me. We were going to go to the giants game, Disneyland, and do many concerts. I'm extremely upset that I had to miss those opportunities. I was also really looking forward to doing the caberet and normal drama clsss this year. It's hard to act with masks on, and the caberet didn't even happen. I was really looking forward to it because it was really fun last year.	I was getting really bad grades before full time learning, but now that we're back I managed to bounce back and now I have all As
I hope they don't divide our school into groups, but I also hope they shorten classes	I lost the social experience of being with classmates and friends. I also missed the in person learning experience	My ability to get ahead of my work even when things worked against me
No more Friday's	8th grade trips and things	Growing taller

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>

<p>Thank you for being such a good school :)</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>Well it would be nice to get out earlier than 3:00. Also maybe some field trips would be nice.</p>	<p>Redacted</p>
<p>[Redacted] is an excellent teacher. Even though we were on zoom, we did many fun acting games. She was always super helpful and wanted to make sure that you understood. I never felt left out or embarrassed in her class.</p>	<p>Redacted</p>
<p>Nope</p>	<p>Redacted</p>
<p>Art class is the best thing ever</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:51:5	8th	No	Start class later in the day.	Everything.
5/12/2021 11:51:5	8th	No	That if you ever need help you can just Zoom in with your teachers.	The confusion with assignments.
5/12/2021 11:52:1	8th	No	I appreciated the longer sleep schedule.	A working structure, teaching through a screen, focus, and communication between teachers.
5/12/2021 11:52:1	6th	Yes		There where a lot of distractions during class and also if your wifi was bad you could get kicked out!
5/12/2021 11:52:2	8th	No	Zoom, being at home, using devices that actually work like my computer. being able to charge my iPad so it lasts the whole day.	Nothing I liked remote learning more than regular learning.
5/12/2021 11:52:2	8th	No	I liked how easy it was to communicate with teachers through email and chat in zoom.	Having to sit down and stare at a screen for hours every day
5/12/2021 11:52:3	6th	No	School ending earlier	Using the iPad all the time because now I'm in person and I don't use it that much
5/12/2021 11:52:3	7th	No	Late start time so I can sleep in	Nobody used class time efficiently, so I had to use more of my own time than usual on school
5/12/2021 11:52:4	8th	No	More flexible due dates for work and allowing classwork to be done not in class.	Distraction/procrastination
5/12/2021 11:52:5	6th	Yes	I loved having all my things with me, maybe having lockers would help.	I hated WiFi problems and sometimes not being able to see your friends, and your teachers properly if you needed help.
5/12/2021 11:52:5	7th	Yes	More freedom during lunch and break.	Homework
5/12/2021 11:52:5	8th	Yes	In remote learning i was more comfortable in my own space and didn't have to get ready in the mornings	Time management and pressure from at home
5/12/2021 11:53:0	7th	No	I appreciated ending school earlier. I also like the Friday Kahoots.	Just being on an ipad all day.
5/12/2021 11:53:0	8th	No	I like starting later in the day and giving kids time to sleep.	Having so much time sitting inside.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope we will keep the desks and I hope we will never wear masks. Not during flu season or ever.	Hanging out with friends and activities.	My ability to keep with it.
	My social life	
I think the schedule is perfect.	Graduation, dances, club fair, and kiddo fair.	That I got through it.
	Family members, spending time with friends.	I was able to maintain calm in a pandemic like this.
Zoom on Monday and Friday and lunch at home would be nice.	I missed out on things like house of air and bowling	Nothing really
I'm not sure, but I hope they don't incorporate zoom into school next year.	A lot of history class.	Being able to manage my social life
To get the actual experience like walk through the halls have all 6 periods	I feel like I have missed out on Field trips	I'm proud of getting to go back to school
Less homework. I hope they don't make school longer.	I don't know for school, but I missed tons of schools	
No schedule changes without consulting student council and students picked at random first	In-person experiences	I stayed mostly on top of schoolwork.
I hope we don't go back to doing everything from our iPads, if we do school inperson full day i wouldn't mind but i also wouldn't mind if it was inperson half day like maybe until 2, like we do right now.	I missed out on a lot of fun projects that needed more hands on that we couldn't do and field trips.	I'm proud of how much I accomplished even with not being in person.
More freedom	Field trips	Getting my home work done.
Less stress and give better directions and instructions for assignments.	Socializing	Grades
I hope that we have a shorter day than normal so we still have time to relax after school.	I think we're missed a lot of fun experiments in science.	I am proud that everyone has been able to adjust.
Giving less homework	More of a social life.	My garden.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:53:0	8th	No	I liked being able to eat a snack or drink in class.	Art was really hard because I lost some of my supplies and didn't get enough insight on what I did wrong.
5/12/2021 11:53:3	6th	No	I liked turning assignments on google classroom and not turning them in to the teacher.	Whenever you have a WiFi problem it would kick you out of zoom or not let you in so you wouldn't be able to attend class that day.
5/12/2021 11:53:3	8th	Yes	Being able to sleep in longer and have time to get work done in the morning if you have it.	Being on zoom and not in a physical classroom.
5/12/2021 11:53:3	8th	No	Having flexibility in the schedule, and getting to wake up later, WE NEED TO HAVE SCHOOL PUSHED BACK EVEN JUST 10 MIN IT MAKES THE DAY SO MUCH MORE ENJOYABLE!	Procrastination, and it's hard to get off my phone during zoom.
5/12/2021 11:53:4	6th	No	Office hours	Being in-front of a screen all day
5/12/2021 11:53:5	8th	No	I liked that class started later and that there was more time during the day to work on homework.	It was very isolating, breakout rooms didn't include any real socialization, things were hard to learn online.
5/12/2021 11:53:5	7th	No	Lunch was a million times better.	My desk was really unorganized. Video games and watching YouTube and things like that were really big distractions. Also when we have to listen the music not being played through the computer and instead playing it through the speakers into the microphone and it was extremely loud and earrapey. The schedule was really really really bad and did not take any advice from the students.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope we will never have to do zoom again.	I missed the fun in class projects that we could of had. I also miss the school field trips.	I am proud of how well I handled the pandemic throughout my school work and sports.
I hope that if they can they will let us take off our masks for PE because e it is really hard to breath in the masks when you're running or other things like that.	I feel like i missed out on making new friends, I didn't really get to make a lot of new friends.	I feel like I appreciate being with my friends and school more now.
I hope they give you more time in the morning (starting school a bit later). I hope they don't require kids to be on zoom for a certain number of days each week.	More social interactions and in-person group discussions. Being physically around friends while at school.	Being able to organize my schedule depending on which school schedule we were following.
PLEASE LET STUDENTS ZOOM INTO CLASS WHEN ABSENT. THAT WOULD BE SO NICE AND IT WOULD HELP STUDENTS WHO TRAVEL BECAUSE OF SPORTS AND OTHER EXTRACURRICULAR ACTIVITIES.	All the fun 8th grade experiences.	I really started to appreciate where I live and started to reconnect with nature.
Keep office hours or panther time/ study hall, and I hope that they will be more lenient with the seating and let us sit next to our friends so we get to socialize more.	School fundraisers, making ceramics in art	I'm proud that I made a lot of new friends, had good grades and finished all of my work on time. I can also see progress of my work improving over the past school year.
I hope they take time out of the school for work time for homework as well as have school start later (9:00?).	Talking to other classmates was hard, I don't feel like I have a good foundation in certain subjects for high school.	I'm proud I was able to maintain my grades and make some new friends.
Make hot lunch better and keep lining up outside.	I didn't learn that much math because I literally did not have a teacher for like 2 weeks and then the teacher we got is on zoom and really bad.	Getting into chamber orchestra.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:54:47	7th	Yes	PLEASE MAKE SCHOOL DAYS SHORTER (I keep typing in caps lock i am so sorry)	the amount of homework, tests, and projects that we work on in class for about 2 weeks
5/12/2021 11:54:56	6th	Yes	Nothing	Not seeing all of my friends.
5/12/2021 11:55:07	7th	No	Getting out of school early	Stress
5/12/2021 11:55:10	8th	No	None I hated all of it, please god never again, so.... boring	The tense and bland atmosphere, the lack of interaction between students, the stupid amount of work we received, the psychological damage caused by being isolated, stressed out, and staring at a screen 4-5 hours a day. I would rather do asynchronous learning then this if we had to.
5/12/2021 11:55:11	8th	No	The length of the school day was good.	
5/12/2021 11:55:14	6th	No	I had to get some things that I forgot to bring and search it in the house.	Well I sometimes late with meeting like losing the chargers and searching for your v
5/12/2021 11:55:14	6th	Yes	I like that you had all your things in in person school, maybe we could leave our things in our classes.	It was hard to focus, and it was harder to learn
5/12/2021 11:55:14	8th	Yes	Being able to focus on yourself more	The social aspect of my life went out the window
5/12/2021 11:55:16	6th	No		Internet problems, it's always the internet problems.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>PLEASE MAKE SCHOOL DAYS SHORT. ATTENTION SPANS 'S WONT LAST ALL DAY LONG AND PEOPLES GRADES SUFFER BECAUSE OF IT. ALSO I DONT THINK THAT WE SHOULD HAVE PE EVERY DAY. WE GET ALL SWEATY AND ITS TERRIBLE IN HOT WEATHER. IN MY OPINION PHYSICAL EDUCATION SHOULD BE OPTIONAL (most of the time... we do need move once in a while). WE COULD USE THE TIME TO DO THE HOMEWORK THAT WE HAVE TO DO EVERYDAY. AND IM SORRY THAT I TYPED THIS IN ALL CAPS BUT ITS TOO LATE TO GO BACK</p>	<p>cant think of anything</p>	<p>no idea</p>
<p>Idk</p>	<p>Friends</p>	<p>Getting into mountain biking.</p>
<p>Put as much pressure on us</p>	<p>School and normal sports</p>	<p>Sleeping</p>
<p>I hope they lighten up on us a little bit as we just went through a global pandemic and it's very stressful to deal with double the material shoved down our throats.</p>	<p>The little social skills I had, school being actually interesting, cool field trips, awesome vacations, basically the things that make life worth living.</p>	<p>Not leaving every single zoom class 5 minutes after they started</p>
<p>I hope they make the classes shorter</p>	<p>School sports</p>	
<p>Device and having internet connection probably.</p>	<p>I missed out the fair and so many fun things that was gonna happen.</p>	<p>That I'm in sixth grade and I'm finally in middle school.</p>
<p>Hopefully we don't have to wear are makes Ana's can be closer then 3 or 6 feet</p>	<p>I missed my 6 grade graduation which I wash I did in person</p>	<p>I am proud that I got through the home school. I am happy because of that because it was harder for me to learn and it was hard to focus.</p>
<p>Get another way of communication with your teachers other than email</p>	<p>FEILD TRIPS</p>	<p>my ability to sleep more</p>
<p>Somehow, I really like to do online zoom school, it kind of feels safe inside my home and it's more easier to work at home than in person. If I had to really go to in person, I would hope that grades are not dependent on Google Classroom to submit work. I wish we can just submit it in person.</p>	<p>Other in person activities, like eating inside, doing school trips, etc...</p>	<p>Staying strong.</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>please make school days easier</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>We need better bathrooms</p>	<p>Redacted</p>
<p>Nah</p>	<p>Redacted</p>
<p></p>	<p>Redacted</p>
<p>Well, Will things even get more challenging like having a lot of projects due?</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>WE NEED AN APP TO COMMUNICATE BETTER WITH TEACHERS ABOUT SCHOOL WORK</p>	<p>Redacted</p>
<p>Bring back Zoom chat, it's literally the only thing to keep us connected during the school year. Make guidelines for it, encourage people to report people that harass other students. Maybe disable it during school hours. Just please, at least enable it, it's important to us.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:55:2	8th	No	Nothing other than later start time.	Being so isolated it really took a toll on my mental health.
5/12/2021 11:55:2	6th	No	Not having to remember materials everyday during school.	Classes going by very long.
5/12/2021 11:55:2	8th	No	I liked having a but more control over what my days looked like.	The amount of work. This year felt like there was more work because during distance learning there was classwork we were expected to do on our own along with a larger amount of homework. Basically we had double the amount of independent work.
5/12/2021 11:55:3	6th	Yes	I got more free time	It was hard to participate and was slow
5/12/2021 11:55:3	6th	No	I like in remote learning how how did not have to move your supplies around you just had them ready.	something that was really hard about distance learning is that we had to stare at a screen all school day and I wish that I would not have to do it again.
5/12/2021 11:55:3	6th	Yes	An aspect of remote learning that I have appreciated this year was that I got to sleep in. I also got to stay in the clothes I slept in and be more comfortable.	It was very easy to get distracted by phones and pets. It was also very easy to fall behind and skip classes. Also your mic or video would be weird and your teacher would get mad at you and not understand.
5/12/2021 11:56:2	6th	No	Having all my work at home	Weird schedules, lots of screen time
5/12/2021 11:56:2	7th	No	More breaks	Constant distractions, confusion among schedules, confusion among work.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Less time on screens like teachers just need to interact with us.	Friends, sports, vacation and trips.	Getting through distance learning with a better experience than most.
I hope they do not make us have the three period days and have the six period days.	I missed out on lots of the social aspect and it is still weird meeting classmates.	Just getting through the school year and not missing many assignments.
I hope they keep in mind the situation we are in and know that it's stressful for kids to.	I missed out on the social parts of school. Distance learning was very isolating. Even when we came back to in-person school, we still have to follow all of the safety precautions that take away a lot of the fun social aspects of school.	I was able to get through distance learning better than I thought I would.
	No zoom classes	I got to hike more
I hope we don't have to wear masks next year.	I fell like I missed out on all of the hands on activities or eating activities in class.	I am so proud that we at least got to go back to school a little bit of the year.
I hope they make the classes shorter and make the hot lunch lines shorter.	Friends and fun in person experiments or events. We also cant have partners or sit in groups.	I am most proud of my attendance in class.
	Sports, talking to my friends, projects	Meeting new people, making new fiends, not riding to school in a car
Not change the schedule so often	A good education	

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>Let's never again have online learning like never.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>I didn't really like the 3x3 model. Have only three classes at a time was really hard. Especially for classes like math, where I would not have math for weeks at a time and then I was just expected to remember everything and pick up right where we left off. Also, I had core first and second period which meant I had to be in the same classroom for almost 3 hours at a time including panther time which was hard.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>No.</p>	<p>Redacted</p>
<p>The teachers are not very understanding and assign to much work.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:56:3	7th	No	I liked how at distance learning, we could talk to friends during break. We could get on a call with friends outside of school and see how they were doing.	It was way to tempting to just pull out my phone at the beginning of 2020, because there was no zoom. I don't want to have to manage all of my distractions anymore. I hope I also never have to remind anyone about how to share sound on zoom. It's especially bad at panther community, with the music through the microphone and speakers. It was very annoying sometimes, because they wouldn't share sound even though all they had to do was press a check at the bottom of their screen when sharing their screen. I also hope I never have to manage all of these schedules. I would have to ask my parents, who would go on parent square, and then they would have to refer to some email. Then the parents would have to tell me about it, and sometimes the schedule wasn't even complete. It would've been much easier if they had just put the schedule on Google Classroom.
5/12/2021 11:56:4	6th	No	Using google classroom.	Using zoom and not having the ability to make new friends
5/12/2021 11:56:4	6th	Yes		Getting kicked from a zoom

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope they don't do this split lunch with areas.</p>		
<p>I hope we will Be able to take off masks, being able to not having to social distance, And i hope they do assemblies next year.</p>	<p>Making friends, meeting teachers and getting to know them, making up missing work.</p>	<p>Getting through it and staying safe through the pandemic</p>
<p>Keeping study hall because i can do work then</p>		<p>Living during a pandemic</p>

Nope!	Redacted
Not really	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:57:14	7th	No	The only thing I can think of is a little bit shorter school day and the Friday Kahoots.	The absurd amount of work, the COVID 19 restrictions, and the back and forth decision making by the district which completely destroyed any faith I had in the districts ability to be consistent. It wasn't a terrible school year. Humans adapt, and I still enjoyed school to the fullest, but that does not excuse the display of gross incompetence when it came to getting people back in school. You had an entire summer to do surveys and ask questions, and you only started doing this when 7th grade started. There are some down right stressful teachers that have been hired to fill in for teachers moving to EDL and its makes an already difficult year even more difficult. In get that things are more difficult in COVID, but as an administrator you get to work in your field for as long as you want, I only get a seventh grade once.
5/12/2021 11:57:50	7th	No	I appreciated more help from teachers available and shorter school hours.	I think the zooms and breakout rooms were really hard about remote learning.
5/12/2021 11:58:00	6th	Yes	Nothing	Not seeing all of my friends.
5/12/2021 11:58:10	7th	Yes	I liked office hours, even though I only used it a couple times, those times were very helpful.	The zooms were draining for the students and I'm sure the teachers as well.
5/12/2021 11:58:20	7th	No	Nothing	Zoom
5/12/2021 11:58:30	8th	Yes	I liked being in the second group where I got to go to school later, I was much more productive and awake during class. I think having a later starting time, even by 20 minutes, would be very beneficial to all the students.	None of the teachers coordinated homework and gave us more than usual because we had less time in class, so I had an overwhelming amount of homework. I also didn't like having to be on a screen for all my classes and having to do all my hw on it.
5/12/2021 11:58:40	8th	No		The distractions were insane. I couldn't focus and barley learned.
5/12/2021 11:58:40	8th	Yes	Short days	Hard to communicate

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Return to normal, and keep Friday Kahoots.	4/9 of my middle school career, and the feeling of normality.	Adapting and being able to have fun and enjoy myself under constant pressure and lack of normality.
I hope that adults will consider making an easier transition to full in person school instead of going straight into full school mode like before Covid.	I feel like I missed out on field trips and social interaction.	I am most proud of getting time to work on my self and do more self care instead of keepin a grind.
Idk	Friends	Getting into mountain biking.
I hope they don't make a new schedule every month (exaggeration), sorry if this comes off biased because I am a student and i don't want to be confused when and where to go for classes.	I missed out on social things and things like field trips.	I have focused more on myself.
I hope they don't make the school day longer	The school carnival I miss that	Nothing
I hope we have a steady schedule and they don't change it a lot throughout the year because it was very confusing.	I think we missed out on all of the fun social activities and hands on projects in class. We missed dances, field trips, school trips and regular graduation. Those were all the activities that everyone looks forward to all year and not having them just made it harder to stay positive.	I'm proud that I was able to keep good grades.
More collaboration and socializing while working.	Just a lot of learning socializing and acting normally.	Making it through.
Be aware about health	Social stuff	Teaches adaptation

Is there anything else you would like to share with us?	Please leave your email address if you would like us to follow up with you to share more information.
No.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:58:5	8th	No	Expanded work space	Distractions
5/12/2021 11:58:5	8th	No	Not having to get up as early.	Focusing was very hard.
5/12/2021 11:59:0	8th	No	Office hours was good and being able to make your own lunch or get a lunch that you want in general	It was really easy to get distracted on zoom or just space out and you're doing something completely different when you get back to the zoom
5/12/2021 11:59:0	6th	No	If you have something to go to then you can still get the homework for the day, even if you are out. You can also be more flexible with lunch and hanging out with friends.	Not being able to see all your friends and connecting with your classmates. You also are missing out on so many opportunities.
5/12/2021 11:59:0	6th	No	Nothing i hated online school it sucked but maybe the fact that you dont need to bike (for me) 2.2 miles there and back but you cant change that	Every thing REMOTE LEARNING SUCKED i really hated it so i hope i never have to do any of it ever again
5/12/2021 11:59:0	8th	No	Work period every day	Staying focused at home
5/12/2021 11:59:1	8th	No	Having school start at 9	Technical issues
5/12/2021 11:59:2	7th	No	No dress code. If boys can't learn to control themselves, then have a class for educating them instead of making a girl change into a t-shirt for wearing a tank top on a 90 degrees day. Sorry my stomach is so attractive.	If I needed an answer form my teacher and emailed them, they wouldn't always respond right away.
5/12/2021 11:59:2	8th	No	Freedom	Teachers could not find a balance of class word and homework
5/12/2021 11:59:3	8th	Yes	All the homework time.	I got distracted a lot.
5/12/2021 11:59:3	8th	Yes	Freedom.	A lot of homework

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
A lot of group work and normal lunches		
I hope teachers don't just have us do Google doc assignments all year.		
I hope that if we have to do any zoom they have some time to stretch or get your mind off of work for a bit and in person if we could just have break halfway through class if the periods are longer than 60 minutes. I hope that there are less tests and that it's open campus during lunch.	A lot of chorus trips and graduation will probably be a lot less than it usually is We also just didn't learn everything in math and in general there was almost no social aspect	Doing well in math because we did it double time and getting my motivation back up.
Let us connect even more with our friends and classmates.	Not being with people in groups and friends and have to stay separate.	Uhhhh just surviving.
Well no face covering and maybe not so many rules like school is not fun at all i dont like it one bit.	EVERY thing i also just really want the middle schools experience	Playing the trumpet
Force zoom again	The field	Most people in Marin responded exceptionally well with wearing masks and keeping the case numbers down
I hope they start schools later and I hope they don't use the same desks	Field trips	Getting through the year
Again, dress code. No more dress code. And also, sitting with your friends at lunch is an important part of staying social. Also, less homework. Most days, I get 6-7 hours of sleep because of the amount of homework I have. The proper hours of sleep a child should have is about 10-11, and teen, 9-10.	FIELD DAY!!!!!! And socialization.	Taking care of myself.
I hope they kept everyone be more social and have 1 lunch group or at least let people sit where they want to	Social aspect, feild trips	The way I adapted to all the changes
Less tests and more homework time.	A lot of friend activity's and socializing.	
		Getting good grades

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 11:59:4	6th	No		There was no bell or warning of when your classes started so it was hard to know when to get to your next class unless you had a schedule. Its easy to get distracted a lot at home so it can be hard to concentrate. Classes felt longer at home than at school. It's hard to socialize with people from your class online.
5/12/2021 11:59:4	8th	No	Being at home and not walking up early.	Not being able to communicate with students and teachers as well and technical difficulties keeping me from joining class.
5/12/2021 11:59:5	8th	No		
5/12/2021 11:59:5	8th	No	The time during school to work on homework	The really long classes, sitting in my room for hours and hours
5/12/2021 12:00:0	8th	No	Before COVID, teachers never really used Google classroom and I think that we should keep using it because it does a great job of keeping you organized.	
5/12/2021 12:00:0	8th	No	When I was in remote learning it was way more chill	Nothing really
5/12/2021 12:00:1	8th	No	Being able to eat something hot for lunch	The zoom classes every single day
5/12/2021 12:00:1	7th	Yes	I appreciated staying home and having my mom there to help me. I would like to see the basketball team come back and I would like that on Wednesday essays that school day is shorter.	I hope that I never have to have assignments posted without knowing how to do them because that was very stressful.
5/12/2021 12:00:1	8th	Yes	Having time to work on work during school	Staying focused
5/12/2021 12:00:2	6th	No	Not waking up early and not needing to go back and forth from school to home	Technical difficulties

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
	<p>I feel like me and all sixth graders missed out on having our first year of middle school and getting the actual middle school experience. And we also missed out on graduating from elementary school and had to do it virtually. We also missed out on being able to walk through the halls and actually being in the school instead of being stuck outside. Also because the school was split in half during hybrid I didn't get to really see many of my friends during that time.</p>	<p>I'm proud that I stayed organized and getting to all my classes on time. I'm also proud of getting through the school year during COVID even though it was hard.</p>
<p>I hope that we are able to do more interactive things with classmates.</p>	<p>School trips.</p>	<p>Being able to adapt.</p>
<p>Zoom all day every day</p>	<p>Knowledge and being social and seeing my friends</p>	<p>Not failing any classes</p>
<p>Back to regular classes that rotate every day- the same three classes for weeks and weeks is really boring</p>		
<p>I hope teacher won't give s much homework</p>	<p>doing less group projects</p>	<p>Playing baseball</p>
<p>Don't assign as many tests, lay off the hw, focus on mental health</p>	<p>The WEB program</p>	<p>Getting all A's even though it was a horrible year</p>
<p>I hope that adults will help many people adjust to school again and jus to help out people. Also i would like for there to be panther time more frequently. I hope that they don't make the school days longer and not to give people more assignments.</p>	<p>I feel like i missed out on a lot of sports and socializing with people.</p>	<p>I am post proud of myself for trying to to play sports and taking care of myself.</p>
	<p>I feel like I have missed out on being able to go to my friends house and hangout</p>	
	<p>The middle school experience</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:00:2	8th	No	Freedom that I can do what I want, when I want and come and go as I please.	All of the distractions at home.
5/12/2021 12:00:3	8th	No	Later start time for school. Less homework. More free time.	If your wifi breaks you can't go to school. Zoom in general.
5/12/2021 12:00:3	6th	No	In remote learning I had all of my supplies at home and didn't have to pack a bag so maybe having some materials at school to not carry around.	Technological problems (internet, not responding, glitches), lots of screen time, when you're at home there are distractions.
5/12/2021 12:00:4	8th	No	I appreciated office hours and being able to make lunch at home.	It was really hard not being able to do work with your classmates as much and I would get really distracted.
5/12/2021 12:00:4	6th	No	I think having all the big amounts of materials at school, so you can't forget things as easily, like in remote learning we had all materials at hand.	The maddening internet problems (making it hard to turn in assignments in Google Classroom) and effects of looking at a screen for a long time. The classes at home do have lots of distractions.
5/12/2021 12:00:4	8th	Yes	I like it when there's a clear and concise schedule that doesn't change, so I can schedule all of my activities and stuff around it	Sometimes there were distractions, and it was much harder to intake information over zoom
5/12/2021 12:00:4	8th	No	The start of zoom was at 9:00 and I liked that.	The connection with zoom, breakout rooms, not seeing friends and associating with people.
5/12/2021 12:00:5	8th	No	The length of the school day was good.	
5/12/2021 12:01:0	8th	Yes	The study period is really nice and I love how we get to do our homework during class.	It was so easy to get distracted and so hard to focus during distance learning. It was hard to learn.
5/12/2021 12:01:1	8th	Yes	None, absolutely none	All of it
5/12/2021 12:01:1	8th	No	I liked making my own lunch and having it warm. I also liked having this study hall period during school to work on school work.	My twin brother and I have bedrooms near each other so I would always hear him playing the violin and doing PE.
5/12/2021 12:01:2	8th	No	I had more freedom. I had a much bigger work space.	Zoom. All of the technical difficulties. Not being able to see your friends.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Not do the staggered lunch and give us bigger desks.	Social interaction	
No split lunch times so people can eat with their friends again.	THE FREE HOUR AT THE CARNIVAL, 8th grade didn't even get it when they were in 6th! School trips.	My art and my new skills
Actual middle school experience, having 3 classes a day like Monday 1,2,3, Tuesday 4,5,6.	More in person instructions, music contests, group projects/work/partner work, field trips.	Getting through school during COVID in a new atmosphere and with different times and friends.
I hope they have both lunches together because other than that if you don't have a class with someone and their in the other lunch period, you can only see them during recess.	I missed out on the end of the year Stinson trip.	
Having 3 periods a day, but periods 1, 2, 3 and 4, 5, 6 alternate weekly.	A LOT of learning advancements and progress, basically being dumber than the regular classes. Also I missed large projects (especially science) and events so we can cooperate and hang with other people.	Currently, with in-person learning instead of Zoom is much better for paying attention and mental sanity... and I am glad to be able to complete the year as a regular school day. -ish.
I think what we have now is pretty good, but I wouldn't want them to take away any of the study hall or add more homework	A lot of learning and in person experiences	My advancements on personal hobbies
Check up on students. Assign a lot of homework or get upset with their kids because of school or mental health.	Building relationships with students and getting to know different people.	
I hope they make the classes shorter	School sports	
The study period is really nice. I hope they give out less homework because it is really stressful.	We missed out on communicating with people and the whole grade school trips.	I am proud of going through this pandemic. I am proud of actually learning stuff.
I hope that we don't have to wear masks.	Like everything from March 2020 to like last December.	Not dying and finishing 5 different shows.
I hope adults don't give as much test as they do now.	I missed talking to my friends and not seeing them without a mask.	I am most proud of being able to go through so many schedule changes.
I hope they keep the study hall everyday.	A lot of field trips and fun clubs and activities. Socialization with my friends at the beginning.	Not getting COVID.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:01:2	8th	No	The length of the school day was good.	
5/12/2021 12:01:2	6th	No	One thing I enjoyed about remote distance learning was that I had all my supplies, in one place. No "forgot this" shenanigans like in person (of course this can be combated with remembering better). But also, having not to pack as much would be nice. Once, I got a really bad arm cramp from carrying a heavy backpack too much, and it was really hard to breathe or even exist.	Technology problems, and lots of distractions.
5/12/2021 12:01:2	7th	No		
5/12/2021 12:01:3	6th	No	- having all announcements in google classroom so you could see them again if you forget them	- internet problems - spending a lot of time on screens for classes and homework - taking good photos of work—it's hard to get a non-blurry photos
5/12/2021 12:01:3	8th	Yes	Not much work, and it was less stressful then it would have been.	The distraction and pure boredom of being on zoom all day long.
5/12/2021 12:01:4	8th	No	The early start time, and the flexibility.	Being alone and bored at home, no friends.
5/12/2021 12:01:5	6th	Yes	Not being able to wear a mask having all of my materials at home	Being distracted easily
5/12/2021 12:02:0	8th	Yes	The work periods where we get our homework done	They gave us to much homework on zoom
5/12/2021 12:02:1	8th	Yes	The work periods where we get our homework done	They gave us to much homework on zoom

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they make the classes shorter	School sports	
One thing I hope is carried over is 3 classes at once, instead of 6 classes all at once.	Some projects, field trips, group projects.	If I'm being honest, getting through this year. This year was a little... crazy, and I'm happy that it's finally over. Hopefully next school year is easier.
		Good grades it was easy
<ul style="list-style-type: none"> <li>- it would be nice to move around inside the school</li> <li>- to have the REAL middle school experience</li> <li>- maybe we could keep at least three-four classes instead of six</li> <li>- like 1-2-3 for a week or two then alternate to 4-5-6 next week or two</li> </ul>	<ul style="list-style-type: none"> <li>- Field trips!</li> <li>- half the in-person school year</li> <li>- not all the project we could have done</li> <li>- the 'social aspect'</li> <li>- we didn't meet all the new friends we were expecting to</li> <li>- group projects and table groups</li> </ul>	<ul style="list-style-type: none"> <li>- Easily slipping into the new 6th grade schedule</li> <li>- NOT GETTING COVID</li> </ul>
I hope everything goes back to normal. I liked everything about in person more than remote learning.	Many school activities, including the dances.	My ability to stay positive
Return to old schedule before COVID, group projects and field trips.	Field trips, particularly in chorus.	Making honor role and sticking to my classes through all the weird schedule changes.
I hope they don't turn us back into remote if covid goes up again.	While remote learning, I could barley see my friends	Since in-person started, my grades have gone up insanely, it's a lot better to focus in class without distraction.
I hope they shorten the school days and give us less homework	Hanging with friends.	I learned a lot this year even know it was on zoom a lot
I hope they shorten the school days and give us less homework	Hanging with friends.	I learned a lot this year even know it was on zoom a lot

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:02:1	8th	Yes	Freedom	Distractions, breakout rooms, mental health, didn't have a reason to go outside anymore, hard to ask questions
5/12/2021 12:02:1	8th	No	Focusing on only the subjects we need to learn about	How boring it was
5/12/2021 12:02:4	8th	Yes	It was nice to eat lunch at home and to have more downtime.	I hope no one else ever has to endure the amount of homework I've had. I've lost motivation to learn and it was only about turning in assignments on time. We also had weekend home work and I never had a break. My brain was fried and I just wanted school to end. I couldn't wait for weekends even though there was still homework and the weekend went by too fast, I hated being stuck in the same place everyday. I live in a small house and I share a room with my sister and my dad's a teacher who taught on zoom and it was too much. There was no quiet and we fought all the time. It increased family arguments and extremely effected my mental health in a negative way. I couldn't see friends or do anything fun.
5/12/2021 12:02:5	8th	No	Remote learning was absolutely awful and draining to my mental health. I look back, and can't really see anything I appreciated. If anything, making my own lunch.	Remote learning was just so exhausting. Every day it was same thing over and over, I lost all my motivation for school, I had to watch myself in that stupid self camera on zoom, I was stuck in my house, I couldn't see my friends. The list goes on.
5/12/2021 12:02:5	8th	Yes	I liked the flexibility throughout the day because you were at home and could do stuff.	I hope I never have to be lazy like remote learning and I barely saw friends throughout remote learning too.
5/12/2021 12:03:0	8th	Yes	I liked being able to not rush in the mornings when I had zoom classes because I could eat breakfast in class and not have to try to rush and pack a backpack.	Looking at a screen for that long, and I wasn't really able to have the social aspect of school.
5/12/2021 12:03:4	6th	Yes	Being able to eat lunch from home.	Staring at a screen all day, being i the same room.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope adults check on children's mental health more because here at mvms we have seen what the end of that road looks like and what happens if they aren't doing well	I didn't learn much because I struggled motivating to do the work	That I got through school and I'm graduating
I hope we can close the door when we're in classrooms bc it's freezing	My attention span	Idk
	I missed out on being a younger teenager. I missed socializing, seeing friends, traveling, doing activities like swimming or shopping, seeing extended family, and most of all, having fun.	
I hope they don't put so much stress on tests and grades. With all the fun activities gone, it seems like that's all that's left of school now.	Social aspects. Field trips. I've been in chorus for 6 years, looking forward to the trips at the end of the year, the competitions and now I don't get to do any of it.	I'm not proud of anything I have done in remote learning.
I hope they don't take away our freedom because I feel like after the pandemic they will be sort of scarred and be more demanding.	I missed out on sports because everything was on lockdown.	I'm most proud of not getting or giving Covid to family members.
I hope that they make school start a bit later, even if it is like 10 minutes, but it would really be nice. I didn't really like the super long classes, mainly because there were only three.	I feel like I missed out on field trips and dances, but I'm glad we are having in-person graduation.	I'm proud that I kept good grades and was able to keep in touch with my friends.
More science experiments.	Graduation, field trips, carnival.	I am proud that I have learned more about technology, and grades.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:03:5	8th	Yes		
5/12/2021 12:04:0	6th	No		Being on a screen all day
5/12/2021 12:04:1	6th	No	I did not like anything	It was hard to look at a nothing all day.
5/12/2021 12:04:3	6th	Yes		All the zoom and technology issues.
5/12/2021 12:04:3	8th	No	School ending at 1:15	Zoom it was very hard to learn on and make friends
5/12/2021 12:04:4	8th	No	The class schedule.	All the work was online.
5/12/2021 12:04:4	6th	No		
5/12/2021 12:04:4	6th	Yes	I liked how we had all of our materials at home, and didn't have to worry about forgetting different things. I also liked that I didn't have to wake up super early in the morning to get ready and then go to school, it was easier to just wake up, brush my teeth, get dressed, and get on zoom, but I don't think we can do anything about that.	Probably being on the screen so, so much, I was on EDL so I definitely got a LOT of time on screens, also the social aspect was really weird.
5/12/2021 12:04:4	6th	No	Sleeping in	Technical issues
5/12/2021 12:04:5	8th	No	Later start time	Staying focused
5/12/2021 12:04:5	6th	Yes		
5/12/2021 12:04:5	8th	Yes	Shorter classes and school days	Every class on Monday
5/12/2021 12:05:2	6th	No	Short days	Technological difficulties
5/12/2021 12:05:2	8th	No	None	Speaking to fellow students and teacher over a camera and not being able to see what they are doing as well
5/12/2021 12:05:2	6th	No		
5/12/2021 12:05:3	6th	No		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
There was too much homework	Projects, trips and activities	
	Sports	Grades
I hope they don't make us wear masks.	I feel like I missed out on lots of stuff in all my classes	My grades
		Better grades
School start later and end at the same time, air where we want at lunch, longer lunch don't have to stay seated	School dances	Nothing
More paper assignments and less work on the iPad.	Group work, talking to friends or peers.	
	education	better grades
	Field trips, desk partners, sort of making friends, and just the overall experience of 6th grade I feel like.	I'm proud that neither me or any of my family got COVID-19 this year.
	Dance, carnival	Grades
Shorter time at school as in later start time		Being able to stay on top of my work
		I get to do more bucking this year.
Shorter school days	Yes	Nothing
Shorter days	Nothing	Nothing
Going on our phones during breaks	Hanging out with friends and making new ones in classes	My grades
Being able to play more contact sports in P.E. More sports equipment. I hope that they don't take away the black tops or anything that has to do with sports.	Part of my education.	Staying sane while taking the I-Ready tests.
I hope they can be more equal with boys and girls, because they yell at boys way more.	A real education	Nothing really happened, we just missed a year of education.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:05:3	6th	Yes	Nothing really, maybe not everybody talking at the same time?	Keeping up with work.
5/12/2021 12:05:4	6th	No	Expecting the students more and realizing their mental health.	I had tons of construction at my house and it was distracting. It was hard t work in the place i relax.
5/12/2021 12:05:5	6th	No	Shorter days, or school starts later because when I wake up early I can't focus as well, and don't do as well as I could.	Zoom
5/12/2021 12:06:0	6th	No	Nothing	Everything
5/12/2021 12:06:0	8th	No	Later start time	
5/12/2021 12:06:2	8th	No	The only part of in person learning I liked was office hours and all the other parts were terrible. Although when I took Math in this in person class he let me zoom from my house when I couldn't make it, so I didn't have to deal with the stress of falling behind in my advance math class with [Redacted] Also Inlike the time when you can do homework, so I don't get stressed out with trying to finish homework at home.	I didn't like classes on zoom.
5/12/2021 12:06:2	7th	No		
5/12/2021 12:06:2	8th	No	I didn't have anything good.	Not being able to see friends during breaks and talking to them. And talking to teachers privately or asking questions is very difficult in distant learning.
5/12/2021 12:06:2	6th	Yes	The 3 period at a time schedule.	Complicated schedule's
5/12/2021 12:06:3	6th	No		
5/12/2021 12:06:3	6th	Yes	sleeping through class	Not understanding anything.
5/12/2021 12:06:3	7th	Yes	More chill due dates	I never want to zoom again. It's a dangerous cult and its bad for you. Don't do zoom, kids. Also i dont like the 3 by 3. I also want lunches to go back to normal
5/12/2021 12:06:3	8th	Yes	Nothing	Zooms quality overall is bad and teachers gave tons of assignments

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Make sure that everybody gets help I guess	Field trips, and the carnival	Me going from all F's to almost all A's
Lesss limitations on language and girls bathrooms	Science projects and the carnival.	My writing skills
Loosen the bathroom rules: No more limits for the amount of people.	My sanity	I have improved with technology
I hope we can move into one lunch and be able to sit were we want.	Field trips	My grades
Later start time		Staying on top of my work
I hope that there is not a huge gap in between classes. For example in [Redacted] ELA class we had a 5 week gap in between classes when we were reading a book. Then 5 weeks later we took a test on the book we read 5 weeks ago and I had forgotten what was in the book. I think there should be a week of 1-3 then a week of 4-6 and so on.	I missed out on my social life during the pandemic. I felt like I would be able to pick it up again when I went to school, but I was sadly mistaken. We had to stay in our Areas even though studies showed that COVID didn't spread in a out door area being 6 feet apart. DUMB	I am proud of how I kept my grades up even though teachers like in advance math were trying to squeeze 3 weeks of math into one week. This made there be a 100 point test every week, which just made my stress even higher for the year.
I want the schools schedule to be moved back a bit more. Walking up early is hard and not good for learning.	Some education was torn away because of the pandemic. And being with friends.	
Add more fun activities, like the carnival or party's and stuff.	The carnival	That my 2nd trimester was very good.
Study hall really helps.	Field trips	
You can move around during lunch and you don't have to stay in one place	Almost everything because in EDL we didn't learn $y=Mx+b$ and when I went back everyone knew it	Returning back to school

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:06:4	6th	No		
5/12/2021 12:06:4	8th	No	At my house I was able to cook pasta during lunch and have fresh hot pasta, something that I can't have at school	My procrastination. It was ridiculously easy to procrastinate during remote learning and I have never really been a procrastinator before but I became a huge one. I couldn't keep up with my work but I eventually picked myself up and got my grades up.
5/12/2021 12:06:4	6th	No	Google Classroom	Focusing, P.E and asking questions
5/12/2021 12:07:1	6th	Yes		A lot of homework because teachers feel like they can't teach properly
5/12/2021 12:07:1	6th	No	3x3 schedule	Having 6 per a day
5/12/2021 12:07:1	6th	No	This probably won't happen, but snacks whenever I want. I was used to that because in 5th grade our class was allowed to eat snacks at anytime.	Technical Difficulties.
5/12/2021 12:07:2	6th	No	All of my classes in one week.	Not being in the classroom with teachers and classmates.
5/12/2021 12:07:2	6th	Yes	The 3 period thing per day thing.	Complicated schedules
5/12/2021 12:07:3	6th	No	3 periods a day but switching from days 1,2,3 to 4,5,6 every week	Teachers answering all questions

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Be less strict and dont assume what students mean because they dont.		My Athens vs Sparta campaign I got a 20/20.
I hope that they become more flexible with students problems.	I lost myself socially. Even now that we're back in person, I can't enjoy lunch like I could. Before, my friends and I (4-5 of us) would all sit together and eat together. We would just have fun the entire time. Now, we're split in groups so I can only see one friend during the entire lunch, and even then I can't even eat with him, because I'm stuck in one region the entire time of eating. It's split into designated eating times, and because I'm not in hot lunch, I'm done eating pretty fast and am just sitting there for the rest of the time waiting to move and see my friend. It's kind of frustrating because the magic of lunch is gone, but I don't blame you guys because it's impossible to please everyone and there's so many different views coming in from students and parents.	I've spent so much time on the internet which isn't a good thing but it has taught me so much. I've gained a ton of insight just by seeing people's comments and there views. I've learned about the problems of generalizing and I've also learned a ton from research.
Merge lunch's and longer lunches	Field Trips, Seeing Friends and projects	Getting good Grades
Have the same bell schedule dual as this year except maybe with mandatory clubs at the end of the day and merging the lunches		
3x3, less homework	Projects, WEB	Making it through alive
Less challenging homework and more time to study for quizzes.	Friends.	Maybe surviving distance learning
I hope that they give us more time to eat lunch. I hope that they don't do the 3x3 schedule again.	I feel like there are some project that we couldn't do and we weren't able to learn as much.	I'm proud that I was able to meet a few people over Zoom.
1. having a longer lunch ( 30 minutes to eat, 30 minutes to play ) 2. Getting out of school at 2	Seeing all friends at lunch, field trips	

Is there anything else you would like to share with us?	Please leave your email address if you would like us to follow up with you to share more information.
	Redacted
Not really, I feel like there's something you could do with lunch like say abolishing regions but still having us 6 ft apart so people can see there friends	Redacted
Nope.	Redacted

What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:07:4	6th	Yes		I don't want to use zoom or masks - my home has bad wifi
5/12/2021 12:07:5	6th	No	No	No
5/12/2021 12:07:5	6th	No	I liked the 3 by 3 because it allowed us to focus more on 3 classes than having to work and focus on 6 different classes	Zoom
5/12/2021 12:07:5	6th	Yes	I didn't like remote it was long hard and annoying.	ZOOM
5/12/2021 12:08:0	6th	No	i liked having a 3x3 schedule because it let us have less homework and i could focus on 3 classes instead of 6.	doing zoom because of wifi, glitches and not understanding things.
5/12/2021 12:08:1	6th	No		
5/12/2021 12:08:1	6th	Yes	Full classes	Having to at home and getting distracted easily
5/12/2021 12:08:1	6th	No	I really like the 3x3 hybrid schedule because there is not as much going on.	I really didn't like the digital raising hands and not being as focused because we were not in the classroom.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
		I kept my sanity .....
Idk	I missed out on field trips and the house project	Somewhat
No	No	No
I hope they don't do zoom. I hope however that we still get out at 2 because we're so used to getting out at that time and past that we just to start to get bored and can't really focus on class anymore.	Field trips	Getting everything (mostly everything) in on time
Nothing they're doing fine	Alought of different sport games	Getting better at video games
i hope that next year we have a schedule that is like this  periods 1,2,3 on week periods 4,5,6 the next week and having it alternate every week	doing projects that we didn't have time for	i am proud of my grades
I hope they let us have fidget toys in class. I think some people it isn't helpful but some people it is. For me it helps me focus but then for some people they treat it as a toy and its distracting. So I don't know how the teachers and adults will do about that. Thanks!		
I hope we can have field trips	P.E	Learning ancient history
I would like there to be 2 hot lunch lines per grade because it is always so difficult to stand in the back of a really long line.	I lost seeing friends and meeting new people, WEB leaders, and projects.	I am most proud of all A's and meeting new people.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:08:2	6th	No	Google classroom. It was really easy to keep track of homework with google classroom so I hope we have it next year.	I hope I never have to go on zoom ever again it made me really stressed and I had a lot of headaches.
5/12/2021 12:09:0	8th	No	I really liked the offered office hours, I felt that they were very useful. I also really liked that I could make my own lunch at home and not have it be cold.	Juggling zooms, homework, extracurriculars, and all of the screen time. It was very tiring having to be on zoom all day, but then have to get back on the screen to do more homework.
5/12/2021 12:09:0	7th	Yes	I appreciated sleeping in and less stress.	Nothing
5/12/2021 12:09:0	7th	No		ZOOM
5/12/2021 12:09:1	7th	No		Technology
5/12/2021 12:09:2	7th	No		My grades
5/12/2021 12:09:3	8th	No	I only had to do 3 classes a day.	The administration and their blind shenanigans.
5/12/2021 12:09:3	7th	No	I like zoom because you can turn your camera off.	Nothing
5/12/2021 12:09:5	7th	Yes		Focusing

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I really hope that we have all 6 periods a week because it was really hard to switch back and forth between 3 periods and I don't think I learned as much because of that.	Field trips, Projects, Making more friends	
I hope that adults take into consideration the stress levels of their students. Being a student during the pandemic was very stressful, and the transition back to in person was also.	WEB, socializing	That I made it through that, still as somewhat the same person
I think the EDL system was very good because it was more COVID safe, less stress, and actually enjoyable. Next year, I hope that the school system will re-adopt the ELD learning system.	I feel like I missed out on P.E and Band	I am proud of my ok-ish grades.
Online and zoom	Friends	The school and how it opened up
I hope we keep the less classes a day	Field day school trips labs friends	Grades
Make school less stressful	A lot of friend ships and a lot of the things we learned were pushed on to us, we didn't have time to actually study it	
Adults will hopefully be less pressuring and will take into account the fact that not everyone is as happy as they are.	Everything to do with this year has been taken away from me. I will never forgive you.	The fact that I'm finally done with this place
Lets hope they make the school days shorter.	I missed out on nothing	Everything
Way less homework	The Memorial Day carnival	My grades

Is there anything else you would like to share with us?	Please leave your email address if you would like us to follow up with you to share more information.
No	Redacted
Mental Health is more important than grades	Redacted
[Redacted] assigns too much homework and I don't think her teaching style is that efficient to the way students learn (because 99% of the students I talk to agree that [Redacted] is a not that good teacher). I also don't understand why you have [Redacted] (better teacher) and her distance learning students log onto the zoom shown to the people in in person learning because[Redacted] just sits there and teaches on zoom while [Redacted] is the one sitting there supervising the children to make sure the don't burn down the classroom or something. Because the people in in person learning should get the same material (because why not) as the distance learning people, there is no reason in separating us. ([Redacted] is good teacher)	Redacted
No	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:10:1	6th	No	I liked that I got to sleep in because I usually wake up at 6:30 but i get to sleep in until 8:00. Also I liked being in all my classes each week.	Something hard about remote learning was trying to get onto class because sometimes I never get in and when i do get in it's just so glitchy and i don't understand what the others are saying.
5/12/2021 12:10:1	7th	Yes	3 classes	Focus
5/12/2021 12:10:1	6th	No	tbh its the fact that I could eat food, wear anything and watch stuff in class (don't snitch)	everything
5/12/2021 12:10:2	6th	Yes		Feeling like you cant ask questions, stressful, hard to focus, not having a long attention span.
5/12/2021 12:10:4	7th	Yes	I liked office hours and longer lunch.	Sitting in the same seat and being on zoom everyday for a long time.
5/12/2021 12:10:5	7th	No	The Hybrid Schedule	Zoom Tech Issues
5/12/2021 12:11:0	7th	No	Sleeping	Listening
5/12/2021 12:11:0	7th	No	Time management	Studying, homework, schedules, grades, tests
5/12/2021 12:11:2	7th	No	nothing	
5/12/2021 12:11:4	7th	No	I liked the office hours built into the day.	The stress of zoom difficulties.
5/12/2021 12:11:5	7th	Yes		Zoom
5/12/2021 12:12:2	8th	No		
5/12/2021 12:12:3	8th	No	Getting out of school early	Focus
5/12/2021 12:12:5	8th	Yes	Not much	Focusing
5/12/2021 12:13:2	8th	No	None	
5/12/2021 12:13:4	8th	No		
5/12/2021 12:14:0	8th	No	Probably the check-in's	Being engaged in the content through zoom.
5/12/2021 12:14:2	8th	No	The freedom of it, and the comfort of class, as well as being able to wake up later.	

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope that the parents will make the lunch time longer because it just feels so short. Also I would like school to finish earlier. I hope we don't do zoom again.	I feel like I missed out on field trips and times i could have made new friends.	I'm most proud of my grades.
Less he	Friends	Idk
idk	education	the fact that I'm still sane-is
Less homework, spirit days, longer lunch, getting out at 2:00,	A lot of learning opportunities, friendships, projects, spirit days, field trips	Being able to handle all of this
	Friendships and better learning ability's.	Making it through this long year with zoom.
Let Us Go Off Campus For Lunch	Field Day	
Vending machines	Making friends	Nothing
No homework, timing,	Friends, school trips	.
I hope that they keep the day ending at 2:00 and office hours/homework time until 2:50. I also like taking three classes a day.	The theatre community took a loss and there was no Cabaret	My grades
To not wear masks anymore	I lost a lot of my friends	
Shorter periods	7th grade dissection	Focusing more
Don't know	Learning	Not much
		Art
I hope they keep the study hall.	I feel like I missed out on the social aspects of in-person school and group projects.	Adapting to schedule changes
I hope that teachers will give more flexible work schedules to students, as well as preface the week with an agenda of everything that will happen in the week. I hope they don't overload their students with work.	I missed being able to see some of my friends

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:14:3	8th	No	Not having as long school	Having to be on zoom all day
5/12/2021 12:14:3	8th	Yes		The distractions
5/12/2021 12:14:5	8th	No	I did not like much about this year and I hope it goes back to normal	Hours on end of zoom
5/12/2021 12:14:5	8th	No	I like that we were able to have a homework period.	We split the classes into 3 and 3 and I got my 3 hardest classes together.
5/12/2021 12:15:0	8th	No	The shorter days.	When teachers had to rush through curriculums because we didn't have much time.
5/12/2021 12:15:2	8th	No	Being home was nice but that can't be in regular school.	Understanding math was challenging.
5/12/2021 12:15:2	8th	No	I liked being at home	Not seeing my friends in person.
5/12/2021 12:15:5	8th	No	The schedule	Zoom
5/12/2021 12:16:3	6th	No	I appreciated that we used google classroom a lot.	It was very hard to focus and look at a screen for 4 1/2 hours a day and we didn't get enough stretch breaks.
5/12/2021 12:16:3	6th	No	Panther time	
5/12/2021 12:16:4	8th	No		Having 3 classes at a time and rotating between them was stressful and annoying.
5/12/2021 12:16:5	8th	No		Having 3 classes at a time and rotating between them was stressful and annoying.
5/12/2021 12:17:0	6th	No	The freedom and the electronic parts.	Not being able to get handouts or individual help from the teacher.
5/12/2021 12:17:0	8th	No	None	I was able to avoid work and fail work without the reminder doing it or doing in class because of the many distractions.
5/12/2021 12:17:0	8th	Yes	Less test makes school more enjoyable, less stressful and makes me pay easier attention	Nothing

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Make it shorter	Social	Making more friend
	Social interaction, and learning	
I hope they go back to what it was before	I missed out on spending a lot of time with my friends	Getting good grades in this hard time
I hope they get rid of the schedule that we have now and go back to the new schedule.	In zoom I had a hard time with math.	Getting good grades with the pandemic.
To try and have us be more social with each other . That we don't have to have separate lunch times.	Like big fun projects.	That I was willing to get all my work done even though it was hard
I guess I liked 3 periods for every half trimester.N	Some math and also some sciences. I was also really sad I missed a lot in tech 3 but still had fun in that class.	My drawings in tech.
		Adapting to the schedule changes
More interactive	End of year party, dance, projects	Grades
	I think that I missed out on a ton of hands on projects.	I'm most proud of that even though half our year was remote, I still got decent grades throughout the year.
	Being able to eat lunch with or have time with our friends.	
	I feel like we could have learned more in every subject with less stress if we had all our classes at the same time.	That I'm completing Middle School
	I feel like we could have learned more in every subject with less stress if we had all our classes at the same time.	That I'm completing Middle School
I hope they take into account what the kids are saying.	I feel like I have missed a formal first year of middle school.	How well we got through distance learning.
I don't know	Friendships and opportunities to get involved with the school.	Being able to turn my grades around and not be failing in my classes.
More tests	Real learning	Nothing

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:17:0	6th	No	I appreciated that we used google classroom a lot.	It was very hard to focus and look at a screen for 4 1/2 hours a day and we didn't get enough stretch breaks.
5/12/2021 12:17:2	8th	No	Being at home, and zoom.	The class work, and the procrastination
5/12/2021 12:17:3	8th	No		Staring at a camera all day and not seeing actual people.
5/12/2021 12:17:3	6th	No		I never want to do zoom again
5/12/2021 12:17:4	8th	No	Being able to have lunch with friends and sit and talk without having to where a mask	Finding a quiet place to work
5/12/2021 12:17:4	7th	No	Less time in school	Organizeing
5/12/2021 12:17:5	8th	Yes		
5/12/2021 12:17:5	6th	No	More attention to each student and also that we didn't have to wear masks.	I hope we never have to use zoom ever again and never have to wear masks.
5/12/2021 12:18:0	8th	No	School didn't start until like 8:50 or 9 and I liked that but I'm going to be in high school next year.	Being on zoom all day everyday.
5/12/2021 12:18:0	8th	No	Only 2 to 3 classes a day which brought the work load down a lot and gave me time to relax, and the classes were an hour long so it did' take up much of the day	It was hard to focus learning from a screen, it didn't really feel like school, and it was easy to just not participate
5/12/2021 12:18:0	8th	No	Sleeping in, multitasking and just being in my house.	Having to focus with that many distractions.
5/12/2021 12:18:0	8th	Yes	No masks, No covid and No social distancing	Everything being on internet is kinda hard because you have to look everything up

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	I think that I missed out on a ton of hands on projects.	I'm most proud of that even though half our year was remote, I still got decent grades throughout the year.
	The trip to Disney land, for Choir	Getting As in distant learning
	Having a real first day of school, and learning stuff about campus	Getting good grades even in COVID
	Hope	Friends and good lunches
Only 3 classes at a time	Seeing freinds	Grade
I hope we get to have tables together and not separate. (Have table groups)	I missed out on making new friends, talking with people, and having some of bigger stuff like going to the fair after school, some of the clubs, going to Stinson, etc.	
I hope that they give us longer break periods between classes and I hope that classes are shorter.	A real first middle school year as a sixth grader.	I am most proud of the way everyone has grown and adapted towards the new ways we do things.
I hope they don't just tower us with homework. I hope it could still be 3 classes for like 4-6 weeks but it won't in high school.	I missed out on going to many fun activities and places.	I'm proud of skills and goals that I have accomplished.
	The fair, traveling to certain areas, not being able to see my friends as much	
Maybe they will give us more time for assignments, less homework, and maybe start school later to let kids sleep in.	I missed out on a lot of sports, school, and fun events.	I'm most proud of how I'm doing in baseball, I'm the youngest kid on my team but I have the best batting average.
I hope they don't have masks next year and have a better schedule.. I don't like how the A and B works and switches	I lost hanging out with my friends during school	Nothing

What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:18:0	8th	No		Schedules and learning information. It was hard to process information through zoom. Paying attention was also very hard
5/12/2021 12:18:0	8th	No		
5/12/2021 12:18:1	8th	No	I like slideshows talking through the activity, and you don't have to worry about always being 6ft apart.	It was hard to focus because there are so many distractions in you room like your phone.
5/12/2021 12:18:1	8th	No	None	The Homework
5/12/2021 12:18:1	6th	No	Google classroom. It really helped me keep track of my work and stay on top of it.	Zoom. I hate zoom.
5/12/2021 12:18:4	6th	No	None I hated zoom but i did like the teachers and most of the activities I would not do zoom ever again if possible.	Just sitting around all day and not doing a lot of school in all.
5/12/2021 12:19:0	8th	No		Paying attention
5/12/2021 12:19:2	7th	No	Shorter days	Got distracted a lot at home
5/12/2021 12:19:4	8th	Yes	Adding more fun to class. Kabooms, quiz lets, team work/ breakout rooms.	Being on a screen for hours then have hours of homework.
5/12/2021 12:20:0	7th	Yes		Not being w friends
5/12/2021 12:21:0	6th	No	More attention to each student and also that we didn't have to wear masks.	I hope we never have to use zoom ever again and never have to wear masks.
5/12/2021 12:21:0	6th	No	Panther time	

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Please don't give so much homework [Redacted]	Learning experiences. For example, we were behind schedule for our lessons in Algebra.	
I hope that adults engage the learning and not do online learning in person.	I think I missed interacting with people at my school, kind of like the social aspect.	I am proud that I have gone through the pandemic with out getting COVID yet.
Keep school ending early so we can do more activities after	The end of seventh grade celebration thing	
Some of the teachers weren't really good with technology, and so we didn't really learn much from online school.	Making most of the basic middle school friends. Whenever I normally go somewhere, I can find people who I can hang out with at least during school. But zoom kind of broke that cycle? Like we already met each other in breakout rooms, so we only got to meet each other in like an awkward online call.	I'm not sure. Maybe not failing any of my classes.
I hope they will give more time for assignments and work.	I feel like I lost out on a lot more opportunity on education.	For most of school it was my grades. And for some of it, it was my school work.
ldk	Lots but I think it's fine	Got better with tech and thankful for good health
Less homework, more teamwork	Science experiments	Getting on the A team for lacrosse
I hope that they give us longer break periods between classes and I hope that classes are shorter.	A real first middle school year as a sixth grader.	I am most proud of the way everyone has grown and adapted towards the new ways we do things.
	Being able to eat lunch with or have time with our friends.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:21:3	6th	No	The attention, participation, and hands-on experiences that the teachers gave on Zoom needs to continue.	Self management and getting the tech to work at all times. Some of my grades went down just because I was late to the zooms, always because my WiFi wasn't working. I have all of my absences due to WiFi.
5/12/2021 12:21:4	8th	No		
5/12/2021 12:21:4	6th	No	That the teachers let us have breaks. More people participated.	Looking a a scream for so long. Getting on the zooms after break and no timer to remind us.
5/12/2021 12:22:0	6th	No	I like the way that teachers worked hard to make everyone included and I like that I felt like people couldn't be rude to me.	Technology was really hard for me as a student. WiFi was delicate and being on a screen for that long was really tiring.
5/12/2021 12:22:0	6th	No	I like remote learning its so much easier.	

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
	<p>In person school, hanging out and socializing with people, and making friends because I recently moved.</p>	
<p>Have us have more breaks. Make everyone participate in class not just volunteers to everyone understates it</p>	<p>I felt like there were some fun projects that we couldn't do on zoom. And I have lost being able to scotsialize the teachers didn't let us talk to our friends during our break</p>	<p>Making my i am a scientist project in scientce during distance learning</p>
<p>I would like to do group projects and work together more often and maybe for 6th graders especially it would be nice to make sure teachers are understanding towards student's missing assignments because I got really stressed a lot when teachers had assignments that snuck up on students the work load should be a bit lighter because we just got out of elementary school and back then we had a really small amount of homework.</p>	<p>The ability to make friends for a lot of the year.</p>	<p>Not very much. But maybe getting good grades in math and math alone.</p>
<p>I hope that when we return the teachers are more specific about what to bring, for example I knew I needed to bring some things for my class today but my teacher did was not specific about what to bring so I did not want to fall behind in class and brought ALL of my supplies. Now my backpack is super heavy and I just found out that I only needed 1 thing.</p>	<p>The experience of school.</p>	<p>My grades and how I managed to keep a good grade book all year long.</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
	<p>Redacted</p>
<p>I submitted once and said yes to EDL. I read it wrong I meant no, sorry about that.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>Not really but I feel like our school isn't really respectful to everyone. Maybe we can make sure that everyone is treated equally and girls are respected as much as boys especially in PE.</p>	<p>Redacted</p>
	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:22:2	8th	Yes	Sleeping in, not worrying about COVID.	Having to sit for 70min 3 times a day, and there is way to much consistency, there is no difference between any class day. It's boring and there is really nothing to look forward for, like a short day on Wednesday. I felt like I didn't learn anything. So much HOMEWORK!!
5/12/2021 12:23:3	8th	No		Being alone stuck in my house .
5/12/2021 12:23:4	8th	Yes	Sleeping in/later school start time. I could come to class sleepy and didn't have to get ready. Nothing else, it was terrible.	Actually learning things sucked. I couldn't focus and I literally don't remember anything from EDL. It is hard to stay on task and do homework. You also can't really ask your teacher stuff and so I was often very confused. Super boring. Not much structure. I had no motivation for anything and didn't try at all because it felt useless. So stressful, no interactions.
5/12/2021 12:23:4	8th	Yes	The short day were really nice beacuse I felt like I had a lot more time to do more homework and activities	Zoom.
5/12/2021 12:24:2	6th	Yes	Not as much homework	Not as much human interaction

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>Just please go back to the other schedule from before COVID.</p>	<p>Learning new things, and being ready for a more advanced high school.</p>	<p>Probably an art project</p>
	<p>Sports seasons, friends, traveling</p>	<p>Being more socially active and making friends and talking to new people.</p>
<p>Stop taking away lots of points for turning stuff in late. Give less homework pleaseeeeeee.</p>	<p>Literally everything. The experience, learning things in general was way harder and I didn't even learn anything. The carnival/fair thing on the blacktop. Interaction with friends, I can't do anything with them like eating when I'm at school.</p>	<p>Getting my grades back up and not failing absolutely everything.</p>
<p>Make the day start earlier but have it end shorter and have the class time from 70 to 60</p>	<p>Sports</p>	<p>Doing well even though it was hard</p>
<p>I hope they don't do isolated lunches</p>	<p>Human interaction</p>	<p>Finishing it without passing out</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>This year has kinda sucked. There is to much homework [Redacted] and way to long class periods.</p> <p>There needs to be a better system for kids who are placed in the normal math 8, but need to be in the advanced class. I have been working on the side for countless hours so I can get into a higher level next year in high school. I sit in my normal class, and it is way to easy, but the school hasn't really helped me to get to a higher grade. I don't think it should be so hard to get the correct academic level. In 6th grade, there should be a better survey, for math placement. If the kid is doing well, they should be placed in the higher level math, it is a lot easier to go down to normal math 8 rather than going up to advanced math.</p> <p>Also the Kido Fair, I never got to do it from middle school. 6th grade some malfunction, 7th COVID, 8th also COVID.</p>	<p>Redacted</p>
	<p>Redacted</p>
<p>I just think this whole thing is a nightmare and I hate that I could not get the same learning experience whatsoever.</p>	<p>Redacted</p>
	<p>Redacted</p>
	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:25:0	6th	No	I liked the classes 1,2,3 then later 4,5,6. Also I liked how we had breaks between class.	I didn't like the zoom all day thing. I am fine with a few but from 8 to 2 is pretty annoying.
5/12/2021 12:25:2	6th	No	Nothing	Zoom was hard. I also thought the schedules were hard because they kept on changing almost every month.
5/12/2021 12:25:2	8th	No	Starting school later	I think it was hard to get to know our classmates and breakout rooms did not really work so well. It was harder to stay focused and stay on task while on zoom.
5/12/2021 12:25:3	6th	No		
5/12/2021 12:25:3	6th	No	being able to have more privacy and not having teachers.	being by yourself all the time.
5/12/2021 12:25:3	6th	No	I really liked everything being on google classroom so if you weren't there for some reason you could still do the work and not be behind.	Sitting all day and not seeing your friends.
5/12/2021 12:25:3	6th	Yes	I gained a lot of independence.	Keeping up with homework.
5/12/2021 12:25:4	8th	Yes	I liked how you would have more free time to have fun and go outside.	I was unmotivated and lazy and it would be hard to do homework.
5/12/2021 12:25:4	8th	No	Later start time.	paying attention and boring schedule
5/12/2021 12:25:5	6th	No	Well I'm not sure maybe the teachers were pretty nice.	Zoom. Zoom was really hard and distracting
5/12/2021 12:26:0	6th	Yes	I hope that nothing gets continued from zoom classes, I really didn't like anything about it.	Not being able to see anyone, and teachers being really mean to kids, it has been so hard on us and when people are mean it makes you feel even worse.
5/12/2021 12:26:0	6th	Yes	I didn't appreciate anything in distance learning and I would like to have actual basket ball back.	Everything.
5/12/2021 12:26:1	7th	No	I appreciated that online school was more interactive and inclusive. I think we could use zoom as a after-school communication system.	Managing the different zoom links, and relying to much on your wifi and connection to the internet.
5/12/2021 12:26:2	6th	No	School in my bed	Making friends

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I like the split lunch and I like the assigned eating area.	I feel like i lost a school year because 6th grade is usually really fun.	Pi.
Nothing	I missed out on making new friends, field day, Halloween, field trips, and almost everything fun for school.	
I liked how flexible teachers were with homework and grades. So I hope they don't give so much homework next year.	Meeting new people and I think we didn't learn as much as we could have.	I think I did a good job motivating myself to do things even when we were at home.
	A normal education	
		having good grades
I really hope that the teachers cut down on homework, it has been the main stress this year.	I feel like we missed out on socializing.	
I hope that we can work in groups so that we can start to have more fun in school.	I missed out on a lot of education and social interaction due to the schools set up.	I focused a lot better in in person and my math and writing skills got better
shorter classes, more interactive things.	I lost a year of my life.	How we've come pretty far.
I hope there's no like lunch assign seating so we can sit where ever we want.	I lost a lot of friends during the pandemic	I was most proud of how i had help at home with my homework
I hope that they won't be like here are 5 new assignments all due today, they don't even realize we have more classes and more homework to do.	I missed out on making new friends which was really sad.	Getting through the school year.
I hope that actual basket ball could come back and all of the periods in one day 7 periods a day.	Making new friends .	Doing online school.
Being aware of balancing homework with activities and games. I hope we don't have to go back to online school.	I feel like I have missed out on projects, field trips, and mostly my 6th grade year itself.	I am most proud of how hard I worked to keep school going and have fun at in-person school.
Less homework	Pretty much half my life	Getting through it

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:26:2	8th	No	It was all horrible	All of the homework, not being able to see friends, lack of depth, and pretty much all of it.
5/12/2021 12:26:4	6th	No	When your on zoom and the remote learning made me feel more independent.	Your schedule and zoom.
5/12/2021 12:26:5	6th	No	Being more independent	I wasn't very engaged and it was hard to stay focused. Also, I felt really isolated and couldn't socialize as well.
5/12/2021 12:27:2	6th	No	3 classes a time it's good for our backs	Online
5/12/2021 12:27:2	6th	No	I really like half days and also asynchronous days were we could do our classes at home.	Doing zooms, and having the waiting room stress and stuff... also breakout rooms were really annoying. Not enough physical activities.
5/12/2021 12:27:5	8th	No	Sleeping in	Understanding the material
5/12/2021 12:28:0	8th	No	Give us more sleep	
5/12/2021 12:28:0	6th	No	Half days	Sitting all day in a chair
5/12/2021 12:28:1	6th	Yes	Nothing	The lack of one on one teaching
5/12/2021 12:28:1	6th	No		
5/12/2021 12:28:2	8th	Yes	I liked starting later	Everything, it made me depressed
5/12/2021 12:28:3	8th	No	Breakout rooms	Getting assignments in on time
5/12/2021 12:28:3	6th	No	3 classes a day (6 would be awful) Half days (It makes it easier to pay attention the whole way through)	Staring at a screen all - day, everyday (It was torture)

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they just go back to pre-COVID school.	Social interaction, sport opportunities, and a lot.	That people finally figured out to go back to in person school.
Be more flexible and understanding for the students.	"The 6th grade experience"	How much I improve as a student and a a person.
I hope that we don't have to be 6 feet anymore and that we can have longer lunches and be all together.	I felt like I missed out on the beginning of middle shock sixth grade experience. My brother who is in 8th grade stays sixth is the best year of mvms and that it only gets harder.	Sticking through to the end and not getting discouraged and down on the zooms.
I hope they Will make us have 3 classes a day I hope we don't have to wear masks	I lost my eyesight my eyes decreased a lot and I already have really bad eyesight	I learned to crochet
I hope we will be able to use the hallways to get to classes so that we have more time to socialize too. Also eating lunch with your friends I wish it wasn't as strict. I hope that they don't have the second lunch and split up period class rotations.	I definitely lost a lot of social time and a normal middle school experience. It doesn't feel like a super big change from elementary school because of the weird year.	How i handled schoolwork and grades.
Less homework and stress		My ability to stay sane
Actually listen to the suggestions that we give you instead of ignoring them like you always do.	Interaction	
Stop nagging me	My life because I moved here at the beginning of the year and sports didn't even start up until later so yeah	Making friends
Not have COVID	We literally did non of the activity we usaly do	Nothing
I hope school starts later	Happinesses	my grades were good
Not do two lunches	8th grade	Graduating
I hope I will be able to sit with my friends during lunch	Getting to know everybody and being more social	My grades

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:28:4	6th	Yes	I think that google classroom is essential for an organized learning experience. The to do list and other futures are incredibly helpful and must be used for a good learning experience.	Definitely the zoom calls. They were very stressful and you could fail a major test, just because of a computer glitch!(It happened to me multiple times).
5/12/2021 12:28:4	8th	No	Nothing	Zoom
5/12/2021 12:28:5	8th	No	I liked waking up late and less work	I didn't like having to do school over a screen
5/12/2021 12:28:5	8th	Yes	I don't care	I don't care
5/12/2021 12:28:5	6th	No		I was very distracted in my room and i became very unactive
5/12/2021 12:28:5	6th	No		Having to stay home all day
5/12/2021 12:28:5	8th	No	Later start to school	Not being able to talk to teachers easily
5/12/2021 12:29:0	6th	No	Being independent	Technically difficulties and not being able to socialize
5/12/2021 12:29:0	8th	No	Own schedule	Zoom.
5/12/2021 12:29:0	8th	Yes	I liked being able to start classes later.	Not being able to talk to the teacher in private
5/12/2021 12:29:0	8th	No	I appreciated getting up later than usual.	I got bored often.
5/12/2021 12:29:0	6th	No	The sleeping in	Zoom and horrible grades
5/12/2021 12:29:1	6th	No		
5/12/2021 12:29:1	8th	No	I don't know	Being stuck in my room
5/12/2021 12:29:1	8th	No	More sleep.	Getting out of focus very easily.
5/12/2021 12:29:1	8th	No	Sleeping and watching and eating tv during class	I couldn't focus and being stuck at home.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I feel like the teachers are really rushed with their lessons because of the shortened amount of time given for overall teaching. This sometimes can make overall work rushed, and with many flaws.	I lost many friends because of this pandemic. I also missed out on almost my whole year of sixth, and fifth grade. Many of my friends moved away, and it's hard making new ones, especially in middle school, there are so many people, and most of them grew up together...	The thing I am most proud of this year, is my honor roll certificate, and a cupcake drawing I made that got onto the kiddo art show.
More interactions	Group learning and meeting new people	Grades
Not having split lunches	8th grade	My grades
I don't care	I don't care	I don't care
I hope they don't split up the lunches again		I learned how to type and i made a bunch of friends
I hope that they make the lunch longer.	Field trips and seeing my friends.	
No more zoom		Doing well in school all As
I hope that they don't make dots and that we don't have to be 3 or 6 feet apart and not wear masks. I hope that they make school better by not assigning so many assignments and not stacking them up.	Meeting new people.	Getting through zoom and remote learning also returning to school and making new friends.
Listen to students.	8th grade fun stuff.	
I hope we actually have all classes.	Field trips and making friends	
I hope they don't have so much restrictions.	Some education	Surviving the year
Later start times and early end times	6 grade dance	Making new friends
NOT MAKE US EAT WITH OUR CLASS. INHAVE FREIDNS	My life	
I hope they don't split classes and lunches.		
I hate the first group and second lunch thing, a lot of people have other friends in a different group and it could make people feel discluded and lonely.p	Friends	Trying

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:29:2	8th	No	I really actually enjoyed the zooms it was nice to be in the comfort of my home I got to sleep till 8 which was really nice and that was very fun.	I think if there was something I didn't get then I didn't have the interactions with the teachers with their help.
5/12/2021 12:29:2	8th	No	Office hours	Not seeing my friends
5/12/2021 12:29:2	8th	Yes	Later school days.	Having no motivation and really bad grades
5/12/2021 12:29:2	6th	No	Half days, at home work day no zoom no school just online lessons and work. ONLY 3 CLASSES AT A TIME	Group projects.
5/12/2021 12:29:2	6th	No	I liked some of the asynchronous days and the shorter days.	It was really hard to make friends or learn anything about your classmates. I would also have liked to know more about the school and where certain classes are.
5/12/2021 12:29:3	6th	No	Later start times and earlier end times	Not being able to eat lunch with my friends
5/12/2021 12:29:3	6th	No	I liked only having three periods a day, and ending school at 2 because I have after school activities I would normally have to rush to get to.	Learning all the new schedules and always having to have your cameras on
5/12/2021 12:29:3	6th	Yes	Having more time to do assignments	Being away from all my friends
5/12/2021 12:29:3	6th	No		
5/12/2021 12:29:4	6th	No	Group working, breakout rooms were really nice.	Staring at a screen for HOURS on end. It was terrible!

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope that they keep the way their doing it, like I don't think they can just put the students right back into 5 classes a day because they will not be able to keep up.	I think I lost the experience of 8th grade like I didn't get to do the science I would've done the part of school that really made it memorable I feel like I didn't get that feeling.	Improving my grades from 6-8th I feel I really came far from where I was at the start of middle school.
Stop being so controlling	Social interactions	Completing it and adapting to the new learning environment
Let us have more responsibilities and I hope they let us take off these masks and poorly made procedures.	Education	Graduation
I really want to be able to sit with my friends at lunch and we could still stay 6 feet apart.	Making new friends	My grades
I hope that it will be easier to get to know others and talk to old friends.	I feel like I've lost a understanding of the middles school and some of the more interesting projects you normally do.	
I hope that they keep the later start times and earlier end times. I hope that they don't go back to the 8:30 to 3:00 schedule	Social interaction	Making new friends.
I hope they make school have the same hours as we are having now (8:45-2). I hope they make the lunch situation better (pick where we sit and who we sit with), give us a longer lunch brake where we can play games and stuff, give us a tour of the school, and open up the halls.	All the little projects and things teachers said we would have done if we weren't in COVID	My grades for sure
To not separate us into two lunches and that we wont have to sit on a dot and we can eat with whoever we want	Making new friends because it's harder to make friends on zoom	Having more time to do homework and my grades improved
Hoping we are all vaccinated by then, they will let us be a little closer then we are allowed now.	Social life	My good grades
I hope adults let us not distance and not wear masks. I've felt so distant from my friends lately. I hope they don't be too cautious and make it pretty much the same thing it is now.	I feel like I missed out on a lot of social events, like the 6th grade dance for one. Also making new friends.	I'm proud that I have adapted to this new schedule and kept my grades up.

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>I don't think that the school should go right back into 5 classes a day because the student will not do well they will 1. Get behind on work 2. Struggle and be sad they can't get their grades above C's.</p>	<p>Redacted</p>

<p>No more masks or schedules changing every other week</p>	<p>Redacted</p>
<p></p>	<p>Redacted</p>
<p>I hope that when I'm in 7th grade this whole pandemic will go away.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>Nope.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:29:4	6th	No	Um... being home at lunch and sleeping in!	Never again do I want to se ZOOM! and sonically distance, and masks and not being able to see my friends.
5/12/2021 12:29:4	8th	Yes	Eating	Being bored and distracted
5/12/2021 12:29:5	6th	No	I feel like using google classroom would be easier because all 6th graders know and larked how to use it	spending all my time on screens and getting all my instructions from online text
5/12/2021 12:29:5	6th	Yes		I had trouble Concentrate
5/12/2021 12:30:0	7th	No	Not having to get up super early. Not having 6 classes a day. I would hope that next year both of those could change.	It made it very difficult to be organized as a student which made this year pretty difficult.
5/12/2021 12:30:0	8th	No	Teachers were always there to help. Less homework.	To much screens, it was really hard to focus. The board and such did a really bad job keeping everyone informed and the schedule changed like 10000 times.
5/12/2021 12:30:0	8th	No		Not being able to focus.
5/12/2021 12:30:1	8th	Yes	Later start time I had more rest.	Changing my whole life for damn for this stupid school
5/12/2021 12:30:1	6th	Yes	Later start times.	Staring into a screen for hours and not being able to interact with other human beings.
5/12/2021 12:30:1	6th	Yes		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they don't hav Emirates lunch and second lunch and scream at us to soacial distancing or tell us we're going to end up in hell because were gay.	Freinds.	Not going insane!
Make it fun and shorter	Interactions	Basketball
I hope they retain the lunch situation	I missed out on seeing friends.	that I haven't got covid
One lunch and less social distance	Meeting people	Getting my work done
I REALLY hope they make school less early in the morning. By doing that they could extend release time. I also hope it is not 6 classes a day because going into 8th grade and having homework for pretty much every class EACHDAY will be very very stressful.	Socializing with friends and doing fun projects in class.	Doing my best during these difficult times.
Understand that we didn't learn enough and that they can't just slam us with a bunch of stuff we missed out on.	A lot of learning. Being a teen.	I feel like I adapted well.
Not be so overprotective, let us be teenagers	Social events. Parties, dances	Not failing. Keeping my grades up
Legit nothing but later start times	Everything imaginable about the proper middle school expirence and I missed out on so many sports opportunities it makes me want to cry.	Built a Computer and made some fruends
I hope that they don't change the 3 by 3 schedule. My reason for that is that I feel like we get much more quality learning than we would in any other schedule.	Social interaction and being with peers.	That I was able to get good grades despite the craziness of this year.

Is there anything else you would like to share with us?	Please leave your email address if you would like us to follow up with you to share more information.
Nope.	Redacted
I didn't learn anything this year besides blm and gay pride	Redacted
nope	Redacted
No	Redacted
I would like it if we had less classes everyday next year and not have school be this early.	Redacted
	Redacted
I think that student council should have more authority. I'm [Redacted] and I've barely done anything this year. The point of student council is to represent the student body and if we don't have respect or authority we can't do that	Redacted
I hate this school	Redacted
Not really.	Redacted
I would like actual basket ball back.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:30:2	6th	No	I liked being comfortable in my own home and I liked that I didn't necessarily have to work at a desk. Ex. Sometimes when I was doing class work on my iPad I would sit on my couch	I hope I never have to Zoom again, and I think online school was way too technology dependent because if my WiFi went out, I couldn't go to school
5/12/2021 12:30:2	6th	No	Having shorter days	Whenever teachers would make me say something on zoom when I wasn't raising my hand and everyone had to hear me and what if i needed more time to find the answer.
5/12/2021 12:30:3	6th	No		
5/12/2021 12:30:3	6th	No		Having to do work and learn online just looking at a screen all day.
5/12/2021 12:30:3	8th	No	Nothing	It was boring
5/12/2021 12:30:3	6th	No	The Asynchronous time do work.	All the Tech issues and staying in my room like all day.
5/12/2021 12:30:4	8th	No	Office hours!	It is ridiculous that we have had to change schedules 4 times. I hope this never happens again.
5/12/2021 12:30:5	6th	No		
5/12/2021 12:30:5	6th	No	Group talking without the teacher and the later start time also going wherever I wanted to go for lunch	No social interaction at school
5/12/2021 12:31:0	6th	No		The zooms
5/12/2021 12:31:0	6th	No	There wasn't really anything that I liked about remote learning expected that I got to have lunch at home.	It was really hard not having social interactions with people.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they make the periods shorter	Hybrid and online band most of the time was horrible, because in hybrid we didn't get to play when we were at school, and online it just didn't work well	At the beginning of the year my grades were pretty bad but by the end of the year my grades got a lot better and I'm proud of that.
i hope that they give us more time for art, pe, etc	Meeting new people	My grades
	I feel like I missed out on a lot.	Make it new friends
I hope to make it better there will not be first and second lunch. I also hope there will be no dots anywhere or having to social distance.	I feel like I missed out on some activities that I would of done at school. I also feel like the online school didn't even feel like school and that we didn't really start school until in person school.	I am proud that I am almost done with the year and that I got through the year with the pandemic.
Lose the rotation aspect that we used to have for the scedual	Opportunity to talk to other people	Nothing
I hope they give a lot of time to do work. I hope they don't give a lot of work.	A lot of social events and just meeting new people.	Staying on top of all my work.
I hope they keep office hours, only have one lunch, keep the same schedule throughout the year, AND ACTUALLY CONSIDER OUR FEEDBACK AFTER MAKING US FILL OUT THESE SURVEYS.	I missed out on making new friends.	I'm proud that I've learned to adapt.
	I feel like I missed out on a lot.	Make it new friends
I hope that we get the normal amount of homework and a normal schedule because it would better prepare us for high school. I hope that they keep the start time later. I hope they don't make us wear masks because by the time its next year we should be able to be vaccinated	Hanging out with friends more	Getting good grades
I hope next year the staff and teachers won't be as scared about Covid.	I feel like a missed out a lot on my social life.	I'm proud that we found a way to come back to school full time.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:31:1	6th	No	I would like to have the online textbooks and google classroom in 7th grade next year.	Something really hard this year was the hard-to-manage schedules.
5/12/2021 12:31:2	6th	No		
5/12/2021 12:31:3	6th	No	I could go out and eat lunch out and it was great to have that freedom	I have adhd and focusing was very difficult I had to leave the room and refocus myself many many times
5/12/2021 12:31:3	6th	Yes		have to switch between zoom classes
5/12/2021 12:31:3	6th	No	Google classroom, more breaks, later start time, organized assignments	Having distractions, not going outdoors, not socializing
5/12/2021 12:31:4	6th	No	The ability to have half of the day researched for other things	Only relying on zoom
5/12/2021 12:31:5	6th	No		It was hard for me to focus because I have a dog. Also my sibling who's in fourth grade usually came into my room on a daily basis and it was very distracting.
5/12/2021 12:31:5	8th	Yes	Nothing, I really hope that the administration doesn't put stuff from this year into next year just because they can. Don't fix something that isn't broken, I just want school the way it used to be,	Never seeing my friends, not seeing your teachers face to face, two lunches, having to wear masks in PE and not being able to breathe.
5/12/2021 12:31:5	6th	No	Being able to do group work and having all of my classes at once.	Not being able to see my friends at school and not being able to have recess or do PE in person with games and sports.
5/12/2021 12:31:5	6th	No	Getting more sleep	Being distracted
5/12/2021 12:31:5	6th	No	I appreciated that we had a little bit more trust from our teachers that we were doing the right thing, and being there and paying attention.	I don't want to try and manage all of the schedule changes or zoom meetings.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope adults will let people turn their video/screens off because I don't like people seeing my face that much.	I missed out on the socializing part and the making friends part of the year.	I am most proud of myself being able to turn my video on for long periods of time on a zoom call.
	Field trips or more activities.	
I hope that I can adapt to a schedule but not all at once but be easing into it slowly with 2 changes for example a period is added after a month of school so rather than 5 classes daily it would be 4 classes	Yes I couldn't see anyone and was depressed for most of if not all of the year	I got through it
I hope they do not do the 3 by 3 schedule again and that they go back to the old one	To be able to interact in person	
Later start, shorter classes	Making friends	Community being able to go back to school
I hope that they shorten the days and i hope they stop making us sit in our designated area	Panther time	The work i have put in in all of my classes
	I feel like I missed out on making friends from other schools because we were isolated and the beginning of the year.	
Just make it the way it used to be	The Disney Land trip, The Washington Trip, The great America Trip, The chorus concerts, The dance, the cabaret, a good graduation, freedom, memories I could've made with my friends,.	I'm alive, that has to count for something.
I hope that if everyone is vaccinated then we won't have to wear masks and can go back to school normally.	I think that I missed out on a lot of fun projects that we would usually do but couldn't this year because we had less time and couldn't do because of COVID risks.	
I hope they give us a unified lunch. I hope they don't make school start earlier. Also I hope they push the start time back.	Events like pie day (with pies), the kiddo carnival. Field trips.	Getting good grades
I hope that they can make an effort to trust us and to be gentle with the grading because we haven't done this before and we are still kids, and we should be having fun instead of just work work work.	I think I missed out on the experience of sixth grade all together and making new friends.	I'm proud that I made new friends and kept good grades.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:32:0	8th	No	I liked eating food at home because choice lunch isn't very good. I also liked waking up later so I was more prepared.	To work on zoom also breakout rooms they were hard to talk in
5/12/2021 12:32:0	6th	No	Being able to wear pajamas	Figuring out my schedule again and again because it changed so much and it was so so hard to manage my time and make a routine that works best for me
5/12/2021 12:32:1	6th	Yes		I didn't like having my screen on all the time. Also I feel like in remote learning the teachers assigned more homework. And just sometime it was hard to stay focused on zoom.
5/12/2021 12:32:2	6th	No	Half days...spilt cohorts. 3 periods at a time, have an asynchronous days where we just get all of our assignments and do them not involving zoom.	ZOOM, tech problems
5/12/2021 12:32:2	6th	Yes	The breaks	Being on zoom, missing school dances, wearing masks, no social interaction, 6 feet etc
5/12/2021 12:32:2	6th	No	I like the later start time and the large amounts of asynchronous time.	I didn't like having to find and print all the paper.
5/12/2021 12:32:2	6th	No	More concentration, personal space,	Communicating, tech errors
5/12/2021 12:32:4	7th	No	I liked that the teachers could easily share their screens and display information to all the students easily, more use of the air play feature in classes would benefit students a lot.	I did not appreciate the lack of instructions and communications to ask questions, as well as relying on students to do my work, which often proved to be a blockade.
5/12/2021 12:32:5	6th	No	It's super helpful to have Schoolwork on Google classroom it helps me stay organized	Dealing with tech issues on zoom

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Better lunch no more choice lunch plus they don't even have chips or pizza anymore and those were the only good things. Also I want to work more in class then have a ton of homework	Not really	Ya
I hope teachers will understand better that us students have more then one class and that more than one classroom gives homework. It's very exhausting.	The whole sixth grade year. All of the fun activities. It's just gonna keep getting harder	Figuring out all of the different schedules
Next year I just hope we're not in the pandemic so that we would not have to wear masks or stand 6 feet apart and all of the things the school is making us do	I would have made a lot of new friends if we hadn't been been in the pandemic.	I am proud that I go on the honor roll and that I have had good grades all year.
No masks would be really great, not making school and at 3 that would be horrible and having a longer lunch with everyone no 1 lunch and 2 lunch because that sucks	Having a real first day of school not 5 first days of school. Seeing friends in school, going to the 6th grade dance	Making friends
	I feel like a missed out on a bunch of social things.	I am proud of of getting good grades.
Maybe make a different hot lunch system so lines aren't big and usually cut, especially since dozens are always ordering. I hope they don't add classes or make the schedule longer.	In PE we never got to do much and it was one of the most boring classes	Lasting this dull and stressful year
I hope they continue to make themselves a resource for any questions that students have and continue to be sympathetic and empathetic to what the students are enduring during that time.	I definitely would have to participate in the school sports teams, but I didn't get that opportunity this year because it was all cancelled.	I learned a lot about technology and time management for all my work. I was forced to adapt and use every resource available to me to complete my assignments.
Later start times. It's hard for me to focus in class when I'm still tired. I hope they keep having three classes a day	Social interaction	Staying strong and not giving up

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>No</p>	<p>Redacted</p>
<p></p>	<p>Redacted</p>
<p>Not really</p>	<p>Redacted</p>
<p>I hope we can have half days because I learn better in the morning and I feel like my brain is not at its best learning time at the end of the day so I like having school from 8:30-11:30. I can also focus on things way better when I only have 3 petriods.</p>	<p>Redacted</p>
<p>You need to stop changing the plans and stick to one and make school more fun for everyone and let us be around people more with no mask</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>No.</p>	<p>Redacted</p>
<p>I hope you all understand the difficulties of being a student and try to see all possible flaws before they can occur and influence students negatively, because their attitudes and mental states should be the most important, above all.</p>	<p>Redacted</p>
<p></p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:33:2	6th	No	More tech	
5/12/2021 12:33:2	6th	No	More time to work on are own	Managing all my work with out have a teacher in person to talk with
5/12/2021 12:33:2	6th	Yes	Getting to choose who your in a break out room or Group with and getting to go to Safeway and other places at lunch to buy food	Getting points taken for being late
5/12/2021 12:33:3	7th	No	3 classes a day instead of 6 and school starts less early	Zoom
5/12/2021 12:33:3	8th	No	Having flexible schedules, less busywork and fewer tests (which don't even help me absorb course material), and a more lenient grading system.	Isolation, depression, secondary, stress-induced amenorrhea, boredom, and fury at incompetent authority.
5/12/2021 12:33:3	8th	No	I liked eating food at home because choice lunch isn't very good. I also liked waking up later so I was more prepared.	To work on zoom also breakout rooms they were hard to talk in
5/12/2021 12:33:4	8th	No		Something that was hard about remote learning was focusing on what was being taught and being able to understand what was happening.
5/12/2021 12:33:4	6th	No	There wasn't anything I liked about remote school except that we got to have lunch at home.	Not having social interactions.
5/12/2021 12:33:4	8th	No	I liked eating food at home because choice lunch isn't very good. I also liked waking up later so I was more prepared.	To work on zoom also breakout rooms they were hard to talk in
5/12/2021 12:33:5	6th	No	There wasn't anything I liked about remote school except that we got to have lunch at home.	Not having social interactions.
5/12/2021 12:34:0	7th	No	Not as much homework	Getting all of the textbooks and stuff
5/12/2021 12:34:2	6th	No	I just liked having a little more time to prepare and do things before school, and having more time for work.	Distractions. That was the worst part. I'd much rather have a place I can focus in, like a quiet classroom.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
field trips		Nothing
I hope they don't put all of the periods in one day	School actives like field tips or some thing along those lines	Managing school at home
I want to only have 3 classes because homework would get stressing and I wanna get out at 2 because 3 I feel like is really long	Social interaction because some of my friends are in 2nd lunch	Getting my grades up
Fix the 7th grade boys restroom	Idk	I guess I'm proud of not getting COVID-19 yet.
Make vaccines MANDATORY for all students, have a later school start time, reduce or eliminate unnecessary assessments and busywork, and have outdoor lessons and classrooms to take advantage of the beautiful summer sun.	My sanity, my patience, my ability to cope with stress, my tolerance for isolation, and the chemistry unit in science.	Getting straight A's despite all odds, becoming a vegan, improving my activism and skills in persuasive writing
Better lunch no more choice lunch plus they don't even have chips or pizza anymore and those were the only good things. Also I want to work more in class then have a ton of homework	Not really	Ya
I hope adults will understand that it's a big change and not everyone is use to transitioning. I hope they don't give us a hard time because the students are trying.	I feel we missed out on a lot of the social aspect, and interacting with other students. We also got to miss out on a lot of fun activities that didn't in one learning at school.	
I hope teachers and staff won't be as scared about Covid.	I missed out on my social life.	That we figured out how to come back to full time school.
Better lunch no more choice lunch plus they don't even have chips or pizza anymore and those were the only good things. Also I want to work more in class then have a ton of homework	Not really	Ya
I hope teachers and staff won't be as scared about Covid.	I missed out on my social life.	That we figured out how to come back to full time school.
		That I still got pretty good grades
I hope they'll continue to do things the same way, but don't constantly change schedules and locations, as it was stressful to constantly have to adjust.	I'm definitely not a social or sporty person, but even I think we missed out a lot on social time and specifically events (field trips, parties, general events, etc).	The fact that I was able to get through the whole year. It was stressful and different, but I made it :)

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:34:2	8th	Yes	Teachers getting in touch with students	
5/12/2021 12:34:2	7th	No	Being able to play games in class	
5/12/2021 12:34:2	6th	No	I appreciated the help and support the teachers gave during remote learning because some of it was hard.	I don't want to manage zoom anymore and I don't want to manage going to school three days a week for a short period of time.
5/12/2021 12:34:3	6th	No	I liked waking up later and just being at home in the morning.	It was hard to concentrate on zoom.
5/12/2021 12:34:3	7th	No	Online work was nice because you didn't have to log around with many books and papers in your backpack	Not enough instructions, little motivation to do work, lots of work assigned
5/12/2021 12:34:3	7th	Yes		
5/12/2021 12:34:4	6th	Yes	I appreciated how I could sleep a little bit longer and be able to practice my sports at breaks, which increased my skill level. I also appreciate how hard all the teachers worked to learn how to teach through zoom. One thing I would like for them to carry back to in person schooling would be to have all homework assignments on google classroom.	One thing that was really hard was making friends, because we were online I couldn't get the chance like I usually would to make friends. I also hope to never feel like I didn't have anyone to help me because I felt like I barely knew my teachers.
5/12/2021 12:34:4	6th	No	The kinda freedom to just at lunch or something walk the dog and go out for lunch. And also the long lunch and short school day.	Finding all of the zoom links, being late to zoom because you forget about it because ur not even at school.
5/12/2021 12:34:4	7th	No	None	Zoom
5/12/2021 12:34:4	7th	No		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	Socializing	Good grades
I hope that we will be able to have normal lunch, and that we will follow the CDC recommendation of 3 feet outside.	Definitely having socializing time	
	I fell like I missed a lot of fun assignment and also I had to be six feet apart with small desks.	I am proud of being able to get through the pandemic without too much trouble.
I hope we will be able to eat lunch with our friends in different classes.		
I hope we don't have to do 3 classes for weeks at a time	Fun assignments and making new friends in class	Having good grades
		My grades
I hope that teachers/adults will make sure everything is clear and understood by everyone. And another thing is that they shouldn't change the schedule a lot or at all even because it just made almost everyone confused.	I feel like I missed out on making new social interactions, and just hanging out with friends or getting help when I really needed it.	I am proud of myself for keeping my grades up and not failing any of my classes.
I want them to make Short school days, open campus and keep the 3x3 schedule because it makes it so much less confusing and makes your backpacks lighter and etc. I don't want them to have long school days, no office hours and the six or five period per day schedule.	I feel like I missed out on socializing.	Sticking with it.
	Pe activities like flag football and contact things like that	I made it
		Me

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:34:4	6th	No	I liked asynchronous days, i think it was really nice to just take a day off and your teachers just assign things and you don't have to go to school or do zoom for one day of the week.	
5/12/2021 12:34:5	6th	No	I really liked that all of my work was laid out in an easy to access place instead of just a bunch of sticky notes with assignments on them that i messily scribbled while the teacher was still talking.	I hope i never have to do online PE ever again. seriously it was terrible, no one actually did the exercise so the teacher made the warmups 20 times harder AND we had to do it in our bed rooms.
5/12/2021 12:34:5	7th	Yes	Less homework.	IXL which is extremely tedious and mind-numbing.
5/12/2021 12:34:5	6th	No	Well working in groups i really liked that.	Well this is more of a me problem but i would get distracted really easily.
5/12/2021 12:34:5	7th	No	Nothing	Everything
5/12/2021 12:35:0	7th	No		Not being able to have direct contact with my teacher all the time and being able to have help.
5/12/2021 12:35:0	7th	No	I've appreciated having only 3 periods at one time	Not being in person
5/12/2021 12:35:0	6th	No	I really liked getting to understand tech better. I can now type on a key board and can help others with technology.	It was really hard to manage classes on line, with not always stable WIFI. Online learning put a lot of responsibility on my back. I was the one to make sure to get to all my classes on time, get the supplies needed and so on.
5/12/2021 12:35:1	7th	No	6th Period on Monday's.	More homework and not seeing my friends.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
allow us to walk in hallways and go inside our school. I think sixth graders just haven't experienced any of that "fun" times walking through crowded hallways and getting lost. but of course there is still the pandemic so my advice would be if there isn't already, install hand sanitizers throughout the hallways and make it mandatory to sanitize before and after class.	I was honestly so excited for my first year of middle school, and my fifth grade graduation. But the pandemic just messed it all up. Im sure almost every 6th grader barely knows the hallways and inside of the school. I know many of my friends got lost a lot and walked into different classes.	The friends and people i've met and how i adjusted to all of my friends being in different classes and different parts of the day.
I hope that teachers continue to use google classroom as well as i hope that they change the hours so that school starts a bit later because scientifically speaking it makes no sense why we would be starting school at 8:30.	I feel like i missed out a lot on school events like, field trips, dances, fund raisers, and clubs	I'm proud of myself for, even in the most difficult social situations i still was able to make a ton of new friends.
More social interaction	Social interaction	Getting straight A's
Well i think school should start later like at 9:30 or something because this age group is when our brains are growing the most and if we don't get enough sleep our brains wont fully developed at the rate they are supposed to so I don't think we should be having to wake up at 7 in the morning. And i hope they don't make us take 6 classes a day because i do have good grades but its still hard to keep up with the work with only 3 classes so i think it should stay at 3 classes.	Social interaction and like getting to know everyone better.	My grades because even though its been a hard year i still have gotten caught up with the work and have raised my grade.
No school	The fair. The Mvms basketball team	Nothing
I hope that lunch isn't split so I can be with all my friends. I really like the 3 by 3 schedule.	School sports and dances and assemblies and celebrations.	Being able to manage and keeping good grades throughout the year.
I hope they dont make us do zooms next year.	Social interaction	
I hope that we will be able to eat all around campus and eat with friends.	I feel like I missed out on a really big opportunity to make new friends. I feel like this year I never had the chance.	I'm really proud of being able to keep my grades up.
	Time with friends

I think we should keep it at 3 classes because 6 would be so hard and overwhelming and we would have so much homework and no free time and that's not how our childhoods are supposed to be we are supposed to have fun and hang out but if we took 6 classes we wouldn't be able to do anything. Yes I know that was what it was like in the past years but I still think a lot of kids got overwhelmed by it all.	Redacted

What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:35:1	7th	No	None.	Everything.
5/12/2021 12:35:2	8th	Yes	I liked having less of a workload, because I had more time to explore other interests.	I did not like apex learning it was a hard program to use and made learning very confusing.
5/12/2021 12:35:2	8th	No		Communicating with teacher and clarification on assignments.
5/12/2021 12:35:2	6th	Yes	Being able to go to the store for lunch.	Zoom meetings and being unable to get on them
5/12/2021 12:35:3	8th	No		All the different changes.
5/12/2021 12:35:3	7th	No		Not seeing anybody and staying my room all day
5/12/2021 12:35:3	7th	No	I could sleep in longer	The double homework
5/12/2021 12:35:4	7th	No		No feildtrips
5/12/2021 12:35:4	7th	No	Pushing biking more than driving, later start time, early end time.	Teachers not being clear on instructions during zoom.
5/12/2021 12:35:4	6th	No	Being able to have a lot of space. Do or go anywhere for lunch. Be able to do something but not disrupt class and breakout rooms.	Not being there. Not being able to join zoom. Not seeing friends.
5/12/2021 12:35:4	7th	No		All the change and online work. It became a lot
5/12/2021 12:35:4	8th	No	sleeping in and teachers being a lot more understanding and considerate	Lack of structure, really hard to focus and get motivated
5/12/2021 12:35:4	7th	No	Less classes	Online all day
5/12/2021 12:35:5	6th	No	More tech	Staying focus
5/12/2021 12:36:0	7th	No	None	Everything

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Everything	Everything	Getting through the Zoom classes.
I hope that the teachers will understand the possible divide in knowledge between EDL students and hybrid learning students.	Making new friends is something I wish was easier this year, it was challenging to meet new people because I only saw people in zoom class not in person.	I am most proud of learning photoshop on my own without any instruction.
		Adjusting to all the new schedules
I hope that we will all have lunch together so we can sit with are friends and every one will be vaccinated so we wont have to ware masks.	I lost a lot of my confidence, i seam confident but I'm really not I'm just trying to fit in.	Well i came out to my mom, she accepted me, i also moved.
I hope they make the days shorter and keep them short.	A lot of social stuff	
		Being proud of myself
	I missed out on talking to my friends on break	My history day project in core
I hope that the time of school is reduced to better fit everybody's schedule out of school.	A lot of socializing , making new friends and opportunities in general.	My mental and physical health after zoom.
Keep school shorter. Only three periods a day. Longer lunch and recess time. And be able to leave campus get food and come back for lunch.	Seeing friends. Field trips. The school experience. And learning a lot of stuff i should.	Being able to keep everything together and not falling apart.
I hope they post the schedule earlier so it's less anxiety inducing.	I think I lost a lot of social skills during the pandemic and it made me develop some social anxiety to the point where in the beginning I missed school cause I was too anxious	Managing my work at least somewhat well, in 7th grade I nearly failed but this year I've been a lot better at staying on top of my work and I'm doing a lot better.
Make us wear masks when where all going to be fully vaccinated.	Fair	Grades
Field trips	Hanging out	Getting A's
Everything	School	Is

5/12/2021 12:36:0	6th	No	I liked how you could sleep in instead of getting up at 7:30 and not get to sleep in for another hour and a half i also missed sometimes eating and wearing pajamas on zoom	Teachers being harsh
5/12/2021 12:36:0	6th	No	I appreciated that we had a little bit more trust from our teachers that we were doing the right thing, and being there and paying attention.	I don't want to try and manage all of the schedule changes or zoom meetings.
5/12/2021 12:36:0	7th	No	Shorter Days and pajamas	Internet
5/12/2021 12:36:1	7th	No	Shorter school days and a longer lunch in hybrid learning and time to do hw at school .	Wearing masks
5/12/2021 12:36:4	7th	No	The short days and little homework. Also getting to stay home.	Nothing.
5/12/2021 12:36:5	7th	No	The short days and little homework. Also getting to stay home.	Nothing.
5/12/2021 12:36:5	7th	No	Because it was at home you could sleep later which made me focuse better at school	Zoom
5/12/2021 12:36:5	6th	Yes	I liked the later start times, because it left me more time in the mornings to make my lunch, get dressed, and bike to school. Last year when school started earlier, I usually never ate breakfast because I didn't have time. Now I can actually sit down in the mornings, and I would like it to stay this way.	Personally, I kind of liked COVID. School wasn't hard, I had plenty of time to watch anime, and all the bathroom breaks I want. That was heaven.
5/12/2021 12:37:0	7th	No	I liked having time to do home work in the afternoon.	I did not really like zoom.
5/12/2021 12:37:0	7th	No	I liked being able to turn in things easily on google classroom.	Not being able to see people, not doing group work, no panther community, and not being able to do hands on projects.
5/12/2021 12:37:1	7th	No	I really like only having 3 classes each rotation, it makes things a lot easier and your more organized	I was always really distracted because i was at home

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I dont think they will learn anything from this. They just do the same thing because people dont really do anything about our input. I also doubt this will even be read.	Nope. I think the pandemic was better for school because it had less classes for less time.	Not having as much school and teachers being nice and understanding over zoom
I hope that they can make an effort to trust us and to be gentle with the grading because we haven't done this before and we are still kids, and we should be having fun instead of just work work work.	I think I missed out on the experience of sixth grade all together and making new friends.	I'm proud that I made new friends and kept good grades.
Shorter days	Free Carnival Tickets	
Please dont make the school day longer	The kiddo fair and group projects	Not falling
Keep us to short days, and no homework.	Nothing.	My grades
Keep us to short days, and no homework.	Nothing.	My grades
ldk	Dances	My grades
Definitely later start times. As I explained in the first question, I dont have time. A later start time lets my brain fully wake up. Also, I like the earlier ending. My volleyball practice starts at 3:20. if school ended at 3:00, I would never make it on time.	Nothing. This was a great experience, and I wouldnt mind if COVID was a year longer. Also,	I got to episode 300 of Naruto!!!
I hope everyone can eat lunch together.	I am really sad that I missed the field day for the end of 6th grade.	How I was very organized
I hope they will try to make the schedule easier for us.	I missed out on working with other people and big projects like in person Shakespeare and other activities.	I am proud of being able to switch around schedules.
I want them to keep the 3 classes every rotation	I lost a lot of friends	That i kept going and even though it was really trashy

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:37:1	8th	No	Google classroom. I liked things being due at 11:59pm.	Zoom. The worst possible way to learn
5/12/2021 12:37:1	7th	No	Freedom in schedule	Zoom schedules and asynchronous homework
5/12/2021 12:37:1	7th	No	Your free time.	Staying on task during zoom.
5/12/2021 12:37:3	6th	No	I liked working in groups, on zoom it was breakout rooms but doing group work at school in person is better.	I hope I never have to deal with tech issues to be able to learn.
5/12/2021 12:37:3	7th	No	Nothing	Not being able to hang out with my friends in person was bad.
5/12/2021 12:37:4	7th	No	Shorter days	Distractions, instructions, zoom
5/12/2021 12:38:0	8th	No		Not being able to ask questions all the time and having to wait for an email everyday was tough.
5/12/2021 12:38:1	8th	Yes	Being at home	The classroom app
5/12/2021 12:38:1	6th	No	I liked how I didn't need to wake up early? If google classroom wasn't used before COVID19, then I would like that in in-person. It might overwhelm me, but maybe help me not forget the homework I need to do?	What was really hard was probably just sitting in one spot. And in PE we had more excersizes.
5/12/2021 12:38:1	7th	Yes		Something that was really hard was wearing masks, especially in PE where we run around all the time and zooms because we have to do a play on zoom which I am finding really hard.
5/12/2021 12:38:1	7th	No	The comfortability of being home in my room and the independence it gave me.	The procrastination and little instructions, and teacher changes(4 of 7 teachers changed)
5/12/2021 12:38:3	7th	No		More homework
5/12/2021 12:38:4	7th	No	I liked the shorter school days.	Zoom.
5/12/2021 12:39:0	8th	No	Felt much better with an extra hour of sleep.	It was hard to understand concepts with out being in the classroom.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Wear masks in the beginning	The end of the year trips. I missed both school beach trips. I also missed a choir competition to Disneyland.	That my friend group grew.
I hope they add lollipops sales back	Part of my middle school experience	Managing my homework
They should make us have more free time and they should not extend periods.	I think I missed out on time with friends.	My grades on tests.
I hope that they keep the schedule 3 classes at a time. I think its better to learn if you have more time because you can better understand subjects.	I feel like I kind of missed out on the beginning of my 6th grade year. I have barely even seen the inside of my school which is pretty weird.	I am most proud of getting good grades despite the challenges of covid.
I hope it's more back to normal because mostly everyone will have a chance to get vaccinated.	The social aspect of school	I don't know.
I hope it goes back to normal fully	Social life and fun activities	Getting closer to some of my old friends
Clever and iReady was really tough and it felt unnecessary.		
Better food	Nothing	Nothing
Well, I guess, less homework? Not a lot of homework? And also having 1-6 classes, but not a lot of homework?	A field trip to somewhere with the band class? Not really...	maybe having no homework assigned in google classroom? Maybe i was proud, or just happy. Maybe I was just happy? Glad?
I hope they make school back to what ever it was before the pandemic and so we don't need to line up outside.	I felt I missed out on sports.	
Splitting up lunch, you are never with anyone you want to talk to and all you cant do is walk around aimlessly.	Most praised projects.	
No more homework	Pig races, lolipop sales, the fair	
	Hanging out with my friends.	No failing.
I am hoping that we can try to go back to the original schedule just with COVID safety and masks.	Social life, and the normal final year experience.	Our progress of remote learning to back in the school every day.

No masks would be really great, not making school and at 3 that would be horrible and having a longer lunch with everyone no 1 lunch and 2 lunch because that sucks	Having a real first day of school not 5 first days of school. Seeing friends in school, going to the 6th grade dance	Making friends
If they could keep that school ends at 2 but you can stay until 2:50 that would be GREAT. I also hope they don't overload us with homework.	The fair, shakespeareance, Cabaret, pig races, lollipop sales.	I'm proud of the way people handled the pandemic, finding new things to do instead of stress over COVID.
I hope the adults make us be able to go inside the main building again and not change the schedule	The fair and class party's	Not getting COVID
It would be nice if we had a longer lunch than we do now, because 30 minutes is not enough time to eat, and then talk with friends. Coming back to school was supposed to be about the social/emotional aspect, as well as the learn aspect, but there is not very much time to hang out with friends and feel connected during school hours.	A good amount of education, cause of zoom.	
I hope they make classes longer. I hope they don't involve student support classes from 2:10 to 2:50.	NOTHING.	Seeing [Redacted]
Keep some of the safety protocols. Keep one schedule for the whole year. No Zoom classes ever again!	Spending time with my old friends, making new friendships, and meeting my teachers.	Learning how to be really flexible with so many changes, and developing good relationships with my teachers.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:41:0	6th	No	I really enjoyed the fact that I could get more sleep. I felt like a had more energy and was more happy when I got the amount of sleep any 12 or 11 year old should get each night. In that matter, because the zoom classes started later then the in person classes, I had more time to get a good, nutritious breakfast and have time to brush my teeth instead of just racing to school. My dad also works long hours so it was nice to actually talk to him in the morning. Also, during both the zoom and Hybrid school, the ending times were much earlier and I had much more time after school to hangout with friends and get all my homework done. Now that we have a later start time, I don't see much of my friends anymore. I also liked how I could get a snack whenever and eat during class. Also, I could have lunch at home or at a restaurant.	For me, it was really hard to work in groups on zoom. The reason of this was because some of the students I was with would never actually work and would just sit there muted with their camera off. I felt like a was just alone a million miles away from everyone else and I just did most of the assignments on my own. The good thing about in person school is that everyone works together and you actually see their faces and not just blank screens. Also, this doesn't happen in in-person school, but when my WiFi was glitching or the other peoples WiFi was glitching, I couldn't understand what they were saying and therefore didn't always know what to do. Also, staring at a screen all day hurt my eyes and made it hard to focus sometimes.
5/12/2021 12:41:4	8th	No	3 classes	Only being on an iPad
5/12/2021 12:41:4	8th	No	I appreciated that every assignment was posted on Google classroom.	Being alone
5/12/2021 12:41:5	8th	Yes		Suicide and rates have gone up in the pandemic likely due to stress. I really hope this doesn't continue. I also felt like we were kind of being segregated from each other, which doesn't feel great.
5/12/2021 12:42:0	7th	Yes	You got on on one help with the the teachers	I had to many classes
5/12/2021 12:42:3	7th	Yes	I liked the shorter classes and the more flexible schedule	I personally thought that participation in general was harder over zoom
5/12/2021 12:42:3	8th	Yes	Responsibility and independence	The amount of websites

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope that adults make it so that school starts later and ends earlier. I like school, but I want more time to do other things as well like things after school and seeing friends. Also, it was really nice to eat during class, and it would be nice if that was possible for in person school, but it probably won't be. I also hope that we do more group projects and have more time to work with others instead of just silent work on our own.</p>	<p>I feel like I have missed out a lot of social time because during zoom school, you were just alone all day and even when I talked to people on zoom, it didn't feel like they were there and we were having a real conversation. Also, during zoom school you can't just unmute and ask your friend a question about an assignment, whereas you can (in some cases) whisper to friends during in person school if you have a question about what to do. Also, I feel like myself and others missed out on events and even just seeing the school. During zoom school, it was just you and your computer whereas in person, you get to see the school, friends, go to the library, and other stuff like that.</p>	<p>This year, I have still managed to meet a whole new group of friends (some people including friends that I have had for years), even though we were virtual. There were some places that our librarian set up after school and I came one day and met four friends. The five of us came to the office hours for the library twice a week with the librarian, and we would just talk and hangout. I also reached out to someone that I wanted to be friends with and I am proud of myself for doing that because it was hard to hit the 'send' button on the email.</p>
<p>Partners</p>	<p>8th grade and just not doing normal stuff</p>	<p>Getting to school</p>
<p>I hope they have all the periods.</p>	<p>Half of middle school.</p>	<p>Good grades</p>
<p>I really hope adults (no offense) handle any future pandemics better than they did this one. I speak on behalf of many other people in my school when I say that we can tell when adults are a just a bit unsure what to do. Another issue with adults is that is the adults give off a sort of baffled vibe, then kids our age and below also feel that way, as well. We trust adults a little too much for our own good. However, I am very thankful that many adults were here to support us, so thank you to the MVMS Staff.</p>	<p>I've lost a lot of time with friends and loved ones. I think that was definitely one of the worst parts of the pandemic. I feel like we missed out on the middle school experience, as well. It just didn't feel like eighth grade.</p>	<p>I'm happy we got through it.</p>
<p>Not make us wear masks</p>	<p>Seeing my friends</p>	<p>Getting good grades</p>
<p>I hope we have shorter classes and more fun activities</p>	<p>I missed out on most clubs and extracurricular activities</p>	<p>I am most proud I maintained good grades over distance learning</p>
	<p>Sports</p>	<p>Going to play football</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:42:5	6th	No	I think remote learning was actually a bit easier because teachers new us students would have a harder time with learning. Also being able to access the resources at home without having to manage without was great. Plus google classroom although it feels so normal has many benefits like seeing what you need done easier and more access to links and websites.	Other then the difficult social aspect there were a few hard things. For one the technical difficulties holding back the classes made it very hard to get some things done. With the unexpected turn of the pandemic having to learn as we went wasn't ideal but I guess it was the best everyone could do.
5/12/2021 12:42:5	8th	No	How I could rest more	The hard part was that I couldn't meet with my friends as much as I used to,
5/12/2021 12:43:1	7th	No	Shorter classes	Zoom and tech issues
5/12/2021 12:43:3	7th	No	I liked being able to stay home for some of the week, and also and also having this same schedule.	I really didn't like managing zoom and all of its tech problems.
5/12/2021 12:43:4	7th	No	I liked being able to stay home for some of the week, and also and also having this same schedule.	I really didn't like managing zoom and all of its tech problems.
5/12/2021 12:43:4	7th	No	I appreciated sleeping in, I think that next year school should start later maybe around 9:00am	It was really hard and stressful to have our teachers assign so much work... it felt like they didn't understand that we had multiple other classes as well as theirs.
5/12/2021 12:45:0	6th	No		Tech issues and my sisters distracting me.
5/12/2021 12:45:0	7th	Yes	I appreciated that I got to be in my bed for remote learning.	My grades
5/12/2021 12:45:1	8th	No	Longer school start time	There was allot of distractions at home

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>Especially after a year of isolation I hope to see more group projects and teamwork being implemented into everyday learning. Also I find it easier to focus on classes then I might with having to juggle all my classes everyday. Maybe something like 3-4 classes a day would be a good balance of that. Having uniform of schedule makes it easier to remember what I am doing next other then everyday being different. Hopefully we don't have to do everything online while using the advantages of it. Lastly I hope there isn't as much change every few weeks so we can grasp a sense of normalcy.</p>	<p>For many middle schoolers especially 6th grades, not getting that middle school experience is a big loss. Sadly I only was able to meet the majority of my classmates in the last 4 weeks of school and I believe I may have lost some possible friendships because of that.</p>	<p>Despite all this change I think us students have still done a great job of adapting to what's thrown at us. I've managed to keep all A's and even make new friends too. Even the simple things are difficult sometimes.</p>
<p>I hope that they are not gonna be afraid of COVID-19!</p>	<p>I felt like I was never going to see my friends in my entire life.</p>	<p>Getting my A's on my report cards</p>
<p>Shorter Wednesday, food trucks, better hot lunch</p>	<p>Making new friends and learning</p>	<p>ALL the new friends that I made and had fun with</p>
<p>I hope they keep the 3 by 3 schedule as it is, and maybe add some new additions to our school.</p>	<p>I missed a lot of school fairs and sale, and other stuff like that.</p>	<p>Probably getting good grades.</p>
<p>I hope they keep the 3 by 3 schedule as it is, and maybe add some new additions to our school.</p>	<p>I missed a lot of school fairs and sale, and other stuff like that.</p>	<p>Probably getting good grades.</p>
<p>I hope that adults will have school end at 2:00 and have panther time everyday</p>	<p>I feel like I missed out on a lot of clubs</p>	<p>My grades</p>
<p>Let the halls be open so we can see the inside and not be cold in the winter.</p>	<p>Big projects.</p>	<p>Getting honor roll.</p>
<p>Have 3 classes each trimester and hopefully we don't have to wear masks next year.</p>	<p>Nothing</p>	<p>Better grades like A and B</p>
<p>Masks,6 feet and not using the hall ways</p>	<p>Doing hands on project.</p>	<p>Better grades</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:45:2	6th	Yes	I have really appreciated getting good sleep I also really liked the breakout rooms and How I knew that very thing I needed to do was in google classroom so it was as it easier to keep everything I needed on a to list.	I really hope that I never have technical difficulties again and get marked as late for a device not working properly or not having to restrain questions because it was hard to ask them during zoom and even harder to receive the help since the teacher could've physically see what was wrong.
5/12/2021 12:45:2	6th	Yes	The later starts I would love that to start at like 9.	Have so much distractions, homework, and internet issues.
5/12/2021 12:45:2	6th	No	I liked that you didn't have to bring all your equipment to school.	The tech issues, looking at a screen all day, and distractions around you.
5/12/2021 12:45:4	6th	Yes	Parters	Doing every thing on a iPad.
5/12/2021 12:45:5	6th	No	Having a quiet work space.	Zoom, technology, not being able to see my friends and teachers.
5/12/2021 12:46:1	7th	Yes	Shorter school days and 3 periods a day	Learning anything
5/12/2021 12:47:1	7th	No	I did not like anything about zoom. No i do not think that it should come back.	The schedule and when my classes are.
5/12/2021 12:47:2	6th	No	I think that school should start later because I felt more awake when school started at 8:50.	I got distracted a lot. Also It was just harder to learn in general.
5/12/2021 12:47:3	7th	Yes	I appreciate that I got to be in my bed to do zoom.	Bad grades.
5/12/2021 12:47:3	7th	No	I enjoyed shorter days.	It was hard to be on screens for an extended amount of time.
5/12/2021 12:47:4	7th	No	I Liked being able to take as many bathroom breaks as I wanted, within a reasonable extent.	The big workload, compressing 12 weeks of learning into 6 is really hard to finish.
5/12/2021 12:47:5	7th	No		Focusing in class.
5/12/2021 12:48:1	7th	No	I liked how we had 3 classes at a time.	Zoom glitches.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope they give a later starting time and keep everybody wearing masks to stay safe and I hope that all of the assignments and things that are required stay in google classroom because I think that will be a lot easier.</p>	<p>I feel like we just missed a lot of social interaction and the opportunity to learn more things.</p>	<p>I am most proud of making my grades better because at first since I was not used to how we were doing things my grades were a lot lower than they had been before but then they went closer to normal near the end because I adjusted and adapted.</p>
<p>I hope they don't cram all of your 7 classes into one day and instead do 123 on day and 456 the next.</p>	<p>5th grad graduation, hanging out with friends, and I feel I didn't learn as much.</p>	<p>Probably making it through all the schedule changes and all the changes around me, and staying on top of my work.</p>
<p>Make the classes less long</p>	<p>Being able to see my friends</p>	<p>My surprising good grades.</p>
<p>Make masks not mandatory because by then, most of us kids will be vaccinated</p>	<p>A good connection to my teachers.</p>	<p>Making it through the year and I'm proud of my teachers for helping me get through this strange year.</p>
<p>I hope they do shorter days and i hope they dont keep the tiny desks</p>	<p>Hand on assignments</p>	<p>Nothing</p>
<p>I hope that next year we can bring back</p>	<p>I missed going to go to Disneyland with [Redacted] for the chorus show.</p>	<p>I am most proud of my grades this year even though it was crazy.</p>
<p>We can eat, six feet away, next to our friends we don't have to sit with our classes and there is not 1st and 2nd lunch.</p>	<p>Definitely social life...and first days of school.</p>	<p>Of our community for being COVID safe, and our doctors for the vaccines! I am so happy, and proud, that we are able to go back to school in person!</p>
<p>3 classes per trimester and hopefully not wearing masks.</p>	<p>Nothing</p>	<p>Good grades</p>
	<p>Social interactions.</p>	<p>I am proud of my grades.</p>
		<p>Didn't give up even when I had 12 assignments to do in 2 days.</p>
<p>I hope they don't do the split lunch.</p>	<p>Yes I feel like I missed out on learning the math that I was supposed to.</p>	<p>Not failing all my classes.</p>
<p>I hope they have 3 classes at a time.</p>	<p>I feel like I missed out on Social Time.</p>	<p>My grades.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:48:2	7th	No		I hope i never have to manage school with zoom tech issues and barely any teacher instruction
5/12/2021 12:48:2	6th	No	I liked being able to have all my supplies right on my desk.	Sometimes something that was challenging was if a teacher would assign a assignment at the end of class and when you start it doesn't make sense you have to email and then wait for an email back so sometimes clear instructions was hard to get.
5/12/2021 12:48:2	7th	No	Shorter school days	Breakout rooms
5/12/2021 12:48:3	7th	No		
5/12/2021 12:48:4	7th	No	3 classes at a time	

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope they don't do any zoom things</p>	<p>I lost social interaction, field trips, knowledge</p>	<p>I'm proud of my grades</p>
<p>I hope they will give us a less confusing schedule and less schedule changes.</p>	<p>I'm not really sure.</p>	<p>I am sort of proud of being able to stay focused and still get assignments done even though most of our year was online.</p>
<p>I hope they keep less classes a day</p>	<p>Field trips</p>	<p>My grades</p>
<p>I don't want 5 class days but 3 class days like we have right now. I hated the assigned lunch seats and split lunch.</p>	<p>Friend interaction</p>	
<p>Hopefully they don't suck</p>	<p>Friends, human touch</p>	<p>Nothing</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:48:4	6th	No	I liked how easy it was, like simply going onto zoom everyday, a way to continue this might be having a schedule that carries on throughout the year, instead of having one that constantly changes.	I had headaches from the extensive time on my screen, I always felt like I needed to get more exercise because I didn't have to actually go anywhere, and it was really hard to stay focused.
5/12/2021 12:49:1	6th	No	One of the things I appreciated most was being put in breakout rooms and being able to talk one on one with the other students. I also liked being able to share a google doc with other classmates.	I really hated having to stare at a screen all day, it made me tired, bored, and agitated.
5/12/2021 12:49:3	7th	No	No masks (i know it would take a while for it to happen)	In the breakout rooms the boys would have there screen off.
5/12/2021 12:49:3	7th	No	Spacing out homework	Zoom head aches
5/12/2021 12:49:4	6th	No		Tech issues, distractions, and learning in a different environment.
5/12/2021 12:49:4	6th	No		Tech issues, too much screen time.
5/12/2021 12:49:4	6th	No	Later start, having all my stuff next to me, warm lunches, not needing to carry all my stuff with me	Headaches from zoom, internet lag,
5/12/2021 12:50:0	7th	No	Nothing, it all sucked.	It was hard to focus, it was hard having 30+ assignments WEEKLY for math, it was to interact with friends, and especially hard to do assignments when your teachers don't teach you anything.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope that adults make it so you don't have to stay three feet distanced from your friends as long as all of them have gotten the vaccine.</p>	<p>I feel like I missed out on being part of school plays.</p>	<p>I am proud of the effort I have put into my work this year, despite covid and changing schedules, I feel like I still did a good job.</p>
<p>I hope they will be more clear about classroom rules and expectations.</p>	<p>I feel like I missed out on a lot of the middle school traditions, like Pi day and the Pig races. I feel like I also missed out on some chorus competitions which I was really excited to do in 5th grade.</p>	<p>I most proud of figuring out all of the new schedules this year and staying calm throughout this pandemic.</p>
<p>LESS HOMEWORK</p>	<p>Field Trips</p>	<p>Not getting an f in science</p>
<p>I hope that adults are more understanding. I hope that we don't have to have 2 lunches.</p>	<p>The social aspect of school.</p>	<p>Grades</p>
<p>I hope that the teacher make their classroom rules more clear, I hope that they make there be a longer time to socialize with friends, and I hope that once they let everyone eat lunch at the same time that we have a time to do homework (a study hall time)</p>	<p>I missed out on the 5th grade graduation and the experience of transitioning from 5th grade to 6th grade. Also, in the beginning I feel like it was hard to make new friends on zoom.</p>	<p>I am proud of my grades and keeping up with school work without getting super stressed considering all the changes in the schedules and adapting to a new way of learning.</p>
<p>Let us do group projects, go on field trips and for teachers to watch the amount of homework they give, since we are going to be doing all of our classes every week.</p>	<p>School plays.</p>	<p>Getting the Honor Roll for the first trimester.</p>
<p>I think that we should have every other day be periods 1 2 3 and 4 5 6 so for example, on Monday we could have periods 1 2 and 3 and Tuesday 4 5 and 6. That would be helpful so we don't have to carry all of our work for each class around every day. I also would like a slightly later start by just 30 minutes because I tend to fall asleep late and also so we can relax at home a little bit in the mornings.</p>	<p>I think we missed out on a tour of the school because on the first day of hybrid I was completely confused because I didn't know where multiple of my classes were.</p>	<p>Surviving. Or somehow managing to get all my homework in (about) on time</p>
<p>I hope they maintain this current schedule of 3 classes a day, 5 was too challenging.</p>	<p>I lost the social interaction I needed, along with the motivation to complete work.</p>	<p>Nothing, it was all a flop.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:50:1	7th	No	I liked how a lot of things were digital. It's more eco friendly and it saves space and weight.	
5/12/2021 12:50:1	6th	Yes	It was nice to get up and not have to do a full routine to get ready for school.	Losing internet connection or glitching on zoom and other online apps.
5/12/2021 12:50:2	6th	No		Tech issues and my sister distracting me.
5/12/2021 12:50:2	6th	No	Only camera/mic off, but nothing else.	Google classroom, zoom, other distance learning stuff.
5/12/2021 12:50:3	7th	No	Shorter school day.	All of the schedule changes.
5/12/2021 12:50:3	7th	No	I like the time for work during class. The online resources got a lot more organized.	I got too many headaches for all the time on iPads and screens.
5/12/2021 12:50:4	7th	No	I liked waking up later, I was more into my classes and ready to learn.	Zoom; It had sooo many problems and with the power outages, fires and smoke problems. It made everything that much harder
5/12/2021 12:50:4	6th	No	I really liked having your supplies just next to you, so like you couldn't forget your supplies. During the discussion someone mentioned that and suggested if we could store our supplies in the classroom, but our teacher said that might not be able to happen.	I hated doing zoom PE. I was always bored and I was too comfortable because it was my second period, and so I was already sitting for an hour and a half and I hadn't warmed up my muscles.
5/12/2021 12:51:0	6th	Yes	I like the flexibility of the schedule, and how it has less classes than in-person so it is easier to manage, but the in person does a good job too, with different classes on different days.	All the different programs such as ixl
5/12/2021 12:51:5	6th	No	I liked working with partners.	I hope i will never have to get on an online website like TCI next year it was very annoying

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope adults make lunch longer and keep the 3 by 3 schedule. I hope they don't make school longer (until 2:50) again.	I lost stress, which is a good thing. It was so much less stressful to be doing everything at home.	I'm proud of managing all my homework.
I hope that teachers give us longer time for larger homework assignments.	I feel like I missed out on the end of fifth grade and most of sixth grade.	Surviving all the stress and being able to go back to school in person.
Let the halls be open so we can see the inside of the schools and not be cold in the winter.	Big projects.	Getting honor roll.
I want them to open up hallways so I can walk through the halls, and I want to be able to see all of my friends. I hope they don't separate us into groups and the yellow dots should be gone. And masks, I hate masks.	5th grade graduation, seeing all of my friends, the whole middle school experience.	Certain discoveries I've made and just how far I've come.
		My grades and test scores.
I hope teachers find a better notability. I also liked how in sixth grade, we didn't have all of our classes everyday.	I missed out on seeing my friends between periods.	I am proud of My grades and good projects.
I hope they change the pe-elective schedule it is crazy. I don't understand the schedule as much as I should, and the constant changes have to STOP	Social interaction, my friends and I are spaced out and don't really understand each other anymore	N/A
I really liked the study hall because when I get home from school, I dont have any homework and I can just do anything I want.	The orientation because when we started hybrid I had no idea where anything was.	Managing homework and doing well on it while also having lots of time for friends and family.
Later start times would make a big difference	Definitely the socializing aspect of school, but it's not so good behind a mask either	Probably how good I am at a computer.
I hope they let us do tuns of fun projects with partners. I hope they don't give us as much homework as this year, because with all of the classes i had piles of homework.	I felt like i never actually had the 6th grade experience and that i never actually got to do a lot of the big and fun projects.	I am very proud of myself and all that i have accomplished this year.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:52:0	7th	No	I got to go in my bed and take a comfy recess.	Missing parts of class for zoom internet problems
5/12/2021 12:52:1	6th	No		Household distractions, glitches, and staring at a screen all day for zoom then doing online homework.
5/12/2021 12:52:1	6th	Yes	I liked the later wake up time, and later school start.	The distractions around you
5/12/2021 12:52:3	7th	No	No commuting	WiFi issues/blackouts
5/12/2021 12:52:3	7th	Yes	Only having three classes a day/amount of time.	The schedule changes were awful, and having to remember all your start times.
5/12/2021 12:52:5	8th	No	Sleeping and watching and eating tv during class	I couldn't focus and being stuck at home.
5/12/2021 12:53:2	7th	No	Easier, shorter	Depression
5/12/2021 12:53:3	8th	No	I would be in-person instead of being on line.	For remote learning there was too many steps to follow to and there is too much work.
5/12/2021 12:53:4	6th	No	Later starting time	
5/12/2021 12:54:2	7th	No	I loved study hall and more flexibility to school work etc.	Zoom and limited lunch.
5/12/2021 12:54:5	7th	No	I liked the 3x3 schedule because it let me focus on fewer classes and not being over loaded with work to do.	I cant think of what it was right now but someone probably said it.
5/12/2021 12:55:4	7th	No		
5/12/2021 12:58:3	8th	No	Having flexible schedules, less busywork and fewer tests (which don't even help me absorb course material), and a more lenient grading system.	Isolation, depression, secondary, stress-induced amenorrhea, boredom, and fury at incompetent authority.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope that they change the lunch so that there aren't 2 lunches. And I hope that they keep the 3 by 3 classes	My connection with my friends because some of them weren't allowed to hangout because they were worried about covid	My grades
	I feel like I missed out on the sixth grade experience in general. Things such as school sports teams, and full day school days.	
I hope they wont give out so much homework, and i hope they don't give out as much homework.	5th grade graduation, and the beginning of 6h grade	Getting through the year.
Keep the days the same length/short	Good grades	Trying to get good grades
I hope we can keep the three period at a time. It would also be great to keep more things digital so we don't have to carry more textbooks.	I feel like I missed out on social interactions.	
I hate the first group and second lunch thing, a lot of people have other friends in a different group and it could make people feel discluded and lonely.p	Friends	Trying
Do nothing you did in fall of 2019	Feildtrips	Better grade in math
I would not wear the mask on every day next year.	Seeing 1,2 and 3 classes teachers.	It was doing less work in class.
	The full middle school experience	Surviving through 6 first days of 6th grade
I hope they add a study hall everyday and less homework so there's less stress.	I miss actual lunch and desk partners.	Being able to accomplish a year in a pandemic and getting through-ish the death of my friend
I hope that they keep the 3x3 schedule. I hope they don't remove the 3x3 schedule.	Something i lost was friends and the chances to make new ones	Nothing
Make vaccines MANDATORY for all students, have a later school start time, reduce or eliminate unnecessary assessments and busywork, and have outdoor lessons and classrooms to take advantage of the beautiful summer sun.	My sanity, my patience, my ability to cope with stress, my tolerance for isolation, and the chemistry unit in science.	Getting straight A's despite all odds, becoming a vegan, improving my activism and skills in persuasive writing

Make the vaccine mandatory. PLEASE. Forcing people to wear clothes infringes on "personal freedom," but you don't allow students to attend school buck-naked if they claim their religion prohibits wearing clothing.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 12:59:5	6th	No	I loved late start and being able to wake up and just start school. I think that we should have a late start day, like the highschool and if we have a normal release time we should have early release Wednesday.	I disliked how messy my desk got and how unorganized i could be. I also felt not very productive, because if i just stay home in a day then i feel lazy and tired.
5/12/2021 13:00:3	8th	No	The aspects of remote learning I appreciated the most and would like to see carried back into in-person schooling is staying put and not to be rush to go to school.	Being stuck at home with my siblings while doing remote learning.
5/12/2021 13:03:1	7th	No	No dress code. If boys can't learn to control themselves, then have a class for educating them instead of making a girl change into a t-shirt for wearing a tank top on a 90 degrees day. Sorry my stomach is so attractive.	If I needed an answer form my teacher and emailed them, they wouldn't always respond right away.
5/12/2021 13:03:5	7th	No		Trying to learn via zoom, because of all the distractions, and glitches.
5/12/2021 13:04:0	7th	No	No dress code. If boys can't learn to control themselves, then have a class for educating them instead of making a girl change into a t-shirt for wearing a tank top on a 90 degrees day. Sorry my stomach is so attractive.	If I needed an answer form my teacher and emailed them, they wouldn't always respond right away.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>Even though i realize this probably wont happen i would like the capability to leave some items at school and be able to share more things because i dont think that i will be able to carry every supply i need in my backpack along with my lunch every day. I also didn't like having to carry around my backpack all the time, i found that my back got really sore and just hurt when i got home. I also would love to have every class at once. It's really hard to remember academic skills when you dont have that class for four weeks.</p>	<p>I definitely think that we should have way more spirt days. They are really fun and they give somthing for us students to look forward to and to talk about.</p>	<p>I'm proud of getting through school and keeping up with my homework.</p>
<p>What I hope adult will do to make in-person school better for next year is not have the a/b rotation. What I hope they don't do to school next year is going back to remote learning.</p>	<p>I missed on the kiddo fair because of the pandemic in this school year.</p>	<p>I'm proud of my women biography project for language arts class.</p>
<p>Again, dress code. No more dress code. And also, siting with your friends at lunch is an important part of staying social. Also, less homework. Most days, I get 6-7 hours of sleep because of the amount of homework I have. The proper hours of sleep a child should have is about 10-11, and teen, 9-10.</p>	<p>FIELD DAY!!!!!! And socialization.</p>	<p>Taking care of myself.</p>
<p>It would be nice if we had a longer lunch than we do now, because 30 minutes is not enough time do eat, and then talk with friends. Coming back to school was supposed to be about the social/emotional aspect, as well as the learnl got aspect, but there is not very mush time to hang out with friends and feel connected during school hours.</p>	<p>A good amount of education, cause of zoom.</p>	
<p>Again, dress code. No more dress code. And also, siting with your friends at lunch is an important part of staying social. Also, less homework. Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 13:25:4	8th	No	Group discussions	Zoom
5/12/2021 13:26:1	8th	No	Google classroom. I liked things being due at 11:59pm.	Zoom. The worst possible way to learn
5/12/2021 13:29:5	7th	No	The comfortability of being home in my room and the independence it gave me.	The procrastination and little instructions, and teacher changes(4 of 7 teachers changed)
5/12/2021 13:32:1	7th	Yes	3 classes	Focus
5/12/2021 13:33:1	8th	No	I liked being able to eat a snack or drink in class.	Art was really hard because I lost some of my supplies and didn't get enough insight on what I did wrong.
5/12/2021 13:35:2	6th	Yes	sleeping through class	Not understanding anything.
5/12/2021 13:38:3	6th	No	Later starting time	
5/12/2021 13:39:3	7th	No	Not having to get up super early. Not having 6 classes a day. I would hope that next year both of those could change.	It made it very difficult to be organized as a student which made this year pretty difficult.
5/12/2021 13:48:4	8th	No	I liked being able to eat a snack or drink in class.	Art was really hard because I lost some of my supplies and didn't get enough insight on what I did wrong.
5/12/2021 13:49:3	7th	No		It was hard to complete a lot of assignments because I had to teach myself the material with no help from teachers.
5/12/2021 13:49:3	7th	No		I really hope we dont have to do zoom again
5/12/2021 13:49:5	8th	No	The time during school to work on homework	The really long classes, sitting in my room for hours and hours

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	Field trips, graduation, hands on science experiments	
Wear masks in the beginning	The end of the year trips. I missed both school beach trips. I also missed a choir competition to Disneyland.	That my friend group grew.
Splitting up lunch, you are never with anyone you want to talk to and all you cant do is walk around aimlessly.	Most praised projects.	
Less he	Friends	Idk
I hope we will never have to do zoom again.	I missed the fun in class projects that we could of had. I also miss the school field trips.	I am proud of how well I handled the pandemic throughout my school work and sports.
Add more fun activities, like the carnival or party's and stuff.	The carnival	That my 2nd trimester was very good.
	The full middle school experience	Surviving through 6 first days of 6th grade
I REALLY hope they make school less early in the morning. By doing that they could extend release time. I also hope it is not 6 classes a day because going into 8th grade and having homework for pretty much every class EACHDAY will be very very stressful.	Socializing with friends and doing fun projects in class.	Doing my best during these difficult times.
I hope we will never have to do zoom again.	I missed the fun in class projects that we could of had. I also miss the school field trips.	I am proud of how well I handled the pandemic throughout my school work and sports.
I hope adults include study hall everyday, not just Panther Time on Wednesday.	I think I missed out on making connections with my classmates and teachers. I also missed out on being with my friends, and I don't think I learned as much.	
I hope they still do study hall during school hours.	I feel like i missed out on a lot of math topics.	I am most proud of the habits that i have developed over our zoom days
Back to regular classes that rotate every day- the same three classes for weeks and weeks is really boring

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 13:54:1	6th	Yes	I like that I don't have to rush and if I need food I can get it.	Doing an apex pe elective.
5/12/2021 13:54:3	7th	No		All of the distractions that home provides. Family, devices, pets, etc.
5/12/2021 14:38:2	8th	No		Remote learning was hard for everyone. It was super hard to focus during zoom, and it was hard to get what you needed. Working in 'breakout' rooms was also super awkward. Zoom gave a lot of students bad learning habits, such as cheating, and skipping class. I hope this is not used as a tool in the future.
5/12/2021 14:41:3	6th	No	I appreciated that we got to turn in things on google classroom because it was easier to keep track of what we had to do.	Zoom was really hard because I didn't actually get to see my teachers and friends in person and the teachers didn't know how to use it and i always got kicked out and missed class time because of that.
5/12/2021 14:43:4	8th	Yes	I appreciated learning how to work with technology much better, and hopefully everyone can continue to use there school iPads to the fullest: homework, apps, tests, etc.	Not being able to communicate with my teachers as easily and being bombarded with homework everyday.
5/12/2021 14:59:1	7th	No	A daily study hall is definitely something I would like to have moving forward because I have a busy schedule and it is sometimes really hard to get all of my homework done after school plus everything else I have to do. I also liked having all of the instructions and information for homework right there on google classroom because that made it easier to complete.	At the very beginning of remote learning last year we didn't have zooms so it was very hard to understand what we were meant to do so I hope that I never have to be that independent like with that little instruction again.
5/12/2021 15:02:5	6th	No		

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope they will make it safe and have a online learning option if people still don't feel safe.</p>	<p>Nothing.</p>	<p>I got straight A's.</p>
	<p>Most of my 7th grade year and making new friends in my grade.</p>	<p>Maintaining good grades even when a global pandemic is happening.</p>
<p>NO ZOOM PLEASE</p>	<p>I missed a LOT of field trips. I have been doing chorus for six years, and eighth grade would've been the year of glory for me. We were going to go to the giants game, Disneyland, and do many concerts. I'm extremely upset that I had to miss those opportunities. I was also really looking forward to doing the caberet and normal drama clsss this year. It's hard to act with masks on, and the caberet didn't even happen. I was really looking forward to it because it was really fun last year.</p>	<p>I was getting really bad grades before full time learning, but now that we're back I managed to bounce back and now I have all As</p>
<p>I hope that they make lunch longer and not have two groups, I hope that we don't have to wear masks as much, I hope that we keep getting out of school at 2:00.</p>	<p>I have not been able to see my friends as much and i have missed some school because of power outages and being kicked off zoom.</p>	<p>I am proud of my grades and art that i have done.</p>
<p>To still keep in touch with there students, even if it's not there period of rotation. I hope they don't assign too much homework and overwhelm there students/ or make it too difficult.</p>	<p>Becoming ahead or being at level in academics. I also wish I could have planned more fun things as a student council president.</p>	<p>Keeping up with homework.</p>
<p>I hope that we can go back to being able to eat wherever and with whomever we want for lunch. I also hope that we can go back to having group desks because it was super fun to get to talk to your desk partners for help with work or just when you have free time. Basically just the social aspect of it. Also, as I said before, a daily study hall for homework would be awesome.</p>	<p>Any school dances, field trips, more social things.</p>	<p>Honestly I am just proud of myself and everyone for adapting and just getting through this year.</p>
<p>Our desks are really small, too small to put our stuff on while working.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 15:06:5	6th	No		I didn't like how in distance learning you couldn't move around much and how you were separated from friends. It was also harder to communicate with your teachers and get help. Also I think it was really hard for some kids to keep up with the class and learn although I did okay.
5/12/2021 15:15:5	6th	No	All teachers in a week.	Headaches from looking at zoom for too long.
5/12/2021 15:16:3	6th	Yes	Wearing more comfortable clothes, online work,	Stress,
5/12/2021 15:17:2	8th	No	To be honest I really did not like remote learning and didn't like any aspects of it. But it I had to choose I liked how much study time we had after we were done with zoom.	The fact that I had to stare at a screen for almost the entire day. I always felt so drained and like a couch potato at the end of the day. I also hated we had not connection with our peers and teachers. I felt so isolated and down. I was not motivated in school like I was during pre covid.
5/12/2021 15:21:4	7th	Yes	Even though I'm not with everyone else I still get an education. I also now have my own room.	Using Zoom is a bit intimidating because I can do all sorts of stuff that I didn't think I could do.
5/12/2021 15:24:4	7th	No	My teacher sent in a google doc with all the answers to these questions from our class.	
5/12/2021 15:29:4	8th	Yes	Some aspects of remote learning that I've appreciated the most are the levels of independence and self-study it offers me. I would like to see more independent activities as well as group work incorporated into in-person schooling.	What was really hard was the near lack of social interactions with my peers.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
	<p>I feel like I missed out on learning a lot of new things that some of my other friends who go to other schools learned. I also feel like I missed a lot of fun activities like fundraisers, the fair and just things like friends and gossip.</p>	<p>I am proud that despite all the difficulties I have gotten good grades and made lots of new friends through doing activities instead of school.</p>
<p>Longer lunches and more fun projects, but less overall homework.</p>	<p>Making new friends.</p>	<p>Surviving.</p>
<p>Caring about our mental health, less work, making school start time later, Hope they don't include: tons of work, weird dress codes, confusing schedules,</p>	<p>Friends, learning and understanding things better</p>	
<p>I really like having a study session during the middle of the day every day. Before the pandemic we had panther time once a week but it was at the end of the day so I never got anything down since I was so tired and zoned out from being at school. I think having the 6 week gaps between 123 and 456 never happens again for future students. I was really hard for me to switch back to a class after 6 weeks and having to all of sudden remember everything and keep up with all the current content. It was hard for Algebra because the class is already fast so having 3 times even more fast was extremely hard and stressful.</p>	<p>The entire social experience of school. I feel I only got half of my middle school experience socially because I missed every single band and end of the year field trips. I miss the little memorable connections you have with your peers. Also usually every year I make some new friends but this year I didn't get to.</p>	<p>That I made it through middle school and am going to high school. I proud that despite all my mental hardships through distance learning I was able to keep my grades up.</p>
	<p>I haven't spoken to some friends (especially the older friends) for along time.</p>	<p>I've gotten closer to family.</p>
<p>I hope that adults will make in-person school more open to discussion from the students. I also hope that they don't give too much homework or quizzes.</p>	<p>I missed out on enjoying my last year of middle school with my friends.</p>	<p>Getting into the College Preparatory School.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 15:33:2	7th	No	I liked having office hours after school so I could get help on my work from my teachers.	I hope I don't have to do a zoom again and asynchronous work that I had to do by myself.
5/12/2021 15:39:0	6th	No	I appreciated how a lot of the clubs were on zoom so you didn't have to find the time to get somewhere and things like that. Maybe next year we could continue to offer an in-person and zoom option for those who can't join in-person.	It was really hard to be online the whole day. Even during times we weren't on zoom for class all of our homework was online and felt like we were using a keyboard more than a pencil.
5/12/2021 15:56:1	8th	Yes	I appreciated learning how to work with technology much better, and hopefully everyone can continue to use there school iPads to the fullest: homework, apps, tests, etc.	Not being able to communicate with my teachers as easily and being bombarded with homework everyday.
5/12/2021 15:57:2	8th	Yes		
5/12/2021 16:33:4	7th	No	The aspect of remote learning that I appreciated the most was being able to have study hall everyday.	The hardest part about remote learning was having to do most my work at home.
5/12/2021 16:45:1	6th	No		
5/12/2021 16:58:1	7th	No	Unlimited food and drinks and waking up 1 min before class	Seeing the beautiful leave meeting button, in the bottom corner
5/12/2021 17:21:3	7th	No	I appreciated sleeping in, I think that next year school should start later maybe around 9:00am	It was really hard and stressful to have our teachers assign so much work... it felt like they didn't understand that we had multiple other classes as well as theirs.
5/12/2021 18:17:2	7th	No	I dont know because I wasnt here	Tons of ipad
5/12/2021 18:21:4	7th	No	Study hall	Zoom
5/12/2021 18:40:2	7th	No		It was hard to complete a lot of assignments because I had to teach myself the material with no help from teachers.
5/12/2021 19:20:4	8th	Yes	I don't like remote learning	everything, too much work and stress

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they keep the panther time during lunch because it is very helpful. I hope they don't make us eat just with our class next year and let us eat with all our friends during lunch.	I feel like I lost field trips and miss out on group work because of the pandemic.	I am most proud of how I adjusted to all the twist and turns during the school year and how I went from online school to in person school and how I got better at spelling this year.
	I feel like being a sixth grader, middle school is a place that you start to make lots of new friends but it was really hard to make new friends online and on zoom.	I am most proud of adapting to all the different schedules that were changing and all the different changes. I feel like I learned to just go with the flow.
To still keep in touch with there students, even if it's not there period of rotation. I hope they don't assign too much homework and overwhelm there students/ or make it too difficult.	Becoming ahead or being at level in academics. I also wish I could have planned more fun things as a student council president.	Keeping up with homework.
I hope that adults will let us have study hall everyday and for everything to go back to the way it was before coronavirus.	I feel like I missed out on talking to more kids because of the pandemic this school year.	I am most proud of being able to get through theses hard times.
I hope they can be more equal with boys and girls, because they yell at boys way more.	A real education	Nothing really happened, we just missed a year of education.
Better lunch editing spots not against the bathroom	Seeing my friends	Good grades
I hope that adults will have school end at 2:00 and have panther time everyday	I feel like I missed out on a lot of clubs	My grades
More breaks	More hanging time with friends	Being faster in tag and more success rate in math
I hope adults include study hall everyday, not just Panther Time on Wednesday.	I think I missed out on making connections with my classmates and teachers. I also missed out on being with my friends, and I don't think I learned as much.	
idk	the chorus trips and the time all together	myself

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/12/2021 19:41:2	6th	No	The freedom and the electronic parts.	Not being able to get handouts or individual help from the teacher.
5/12/2021 20:39:4	8th	Yes	Possibly the flexibility of the schedule, as well as any safety precautions that are needed depending on the Covid situation in August. It also led me to expand my view of the world, and I would like to continue that.	I did have mental health issues late last year, which I'm still getting out of today, and it was one of the hardest things I've ever dealt with. The isolation got to me a lot as well, all of my friends went to in-person and I lost all of my teachers. This led me down some paths I did not want to go down, and I'm very lucky that my parents reached out for help, so that I got better. IXL and Apex were painful.
5/12/2021 21:06:3	7th	No	I hope adults keep the study hall time period before or after lunch. It has been really helpful to me because I tend to get a lot of homework and I do a lot of extracurricular activities leaving me very little time to complete my homework. The study hall has given me more time to complete my homework and it's been really helpful.	Focusing was very difficult for me during remote learning. I already have a little bit of trouble focusing in general and remote learning made this even more difficult.
5/12/2021 21:10:1	6th	Yes	Better lunch time period.	Zoom.
5/12/2021 21:15:3	7th	No		No
5/12/2021 21:17:5	7th	No	Because it was at home you could sleep later which made me focus better at school	Zoom
5/12/2021 21:33:1	8th	No	Sleeping in, multitasking and just being in my house.	Having to focus with that many distractions.
5/12/2021 21:33:1	7th	No	I liked how the teachers added everything about an assignment to google classroom.	Going on zoom everyday.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they take into account what the kids are saying.	I feel like I have missed a formal first year of middle school.	How well we got through distance learning.
I hope that adults continue to require masks to be worn on students and teachers and staff, as long as it is needed by the CDC and the government. I hope that the schools will help the extended distance learning connect back with the rest of the school, and repair the divide that has formed. Teachers and the school need to focus more on individual students and less on a collective image, and help students expand on our interests.	I feel like I missed out on the full experience of my 8th grade year, this was not how I expected my last year of Middle School to go. I also almost lost a lot of my friendships that I had, and missed a lot of social interactions and experiences. I missed a lot of my education as well, I don't think I fully absorbed what I learned this year, because there was so much work and not enough engagement and interest to fully learn the information.	I am proud that I got out of the dark spot I was in, and continued to stay healthy and safe. My family managed to keep healthy, and none of us got sick. We do know many people who died of Covid, and that helped motivate us to stay inside all this time.
		I am most proud of the fact that I have adapted to multiple unique schedules throughout the year.
More sport equipment.	Sports such as soccer team.	My grades.
	More in depth curriculum	My grades and how they went from low to high
Idk	Dances	My grades
Maybe they will give us more time for assignments, less homework, and maybe start school later to let kids sleep in.	I missed out on a lot of sports, school, and fun events.	I'm most proud of how I'm doing in baseball, I'm the youngest kid on my team but I have the best batting average.
I want adults to make a study time, but I don't want to have it 30 minutes.	We lost a lot of time in every class, and we were only able to learn about half the curriculum.	I was most proud of how everyone adapted and worked together to get through the year.

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
	<p>Redacted</p>
<p>I believe that the school did not focus on the Extended Distance learning program as much as it should have, and put us with online programs in which we did not learn as much as we should have. I was appreciative of the zoom instruction that we did get, but it wasn't too great, and the asynchronous work often ended up taking longer than the classes themselves. I am looking forward to safely connecting again with teachers, the school, and fellow students again, and engage fully in the school learning environment again. Please work to engage with students more and let them develop themselves and help them to learn as much as they can.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 7:10:13	8th	Yes	I liked sleeping in.	I felt like I wasn't learning anything, it turned into me just trying to get all my home work done so that I wouldn't fail the class. I lost all my motivation for completing work on time and trying my best, the pandemic felt very never ending and like it was the same thing every week, over and over again. At the end of the 2019/2020 school year I felt very betrayed and very alone because I feel like the school and all the teachers had just left me on my own to learn by myself and there was suddenly loads of responsibility dumped on me to get up in the morning and manage my time between all my classes and do 5 hours of homework and then turn it all in, without any assistance, and why would a child choose to do that all by themselves and put themselves through all that pressure and stress, there's no incentives, no motivation, especially when there's a different screen to look at.
5/13/2021 8:19:45	7th	Yes	Less teachers for subjects.	The constant schedule and teacher changes.
5/13/2021 8:30:58	8th	No		Staring at a camera all day and not seeing actual people.
5/13/2021 8:45:14	7th	No	.	.
5/13/2021 8:47:56	8th	No		Not knowing what is happening until right before. (For example what the school year is going to look like or how it will work)
5/13/2021 8:49:15	8th	No	The only part of in person learning I liked was office hours and all the other parts were terrible. Although when I took Math in this in person class he let me zoom from my house when I couldn't make it, so I didn't have to deal with the stress of falling behind in my advance math class with [Redacted] Also Unlike the time when you can do homework, so I don't get stressed out with trying to finish homework at home.	I didn't like classes on zoom.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I really hope that the will give less homework, because with all the homework it was so distracting because during class all I would think about is the homework that I knew that I would have to complete later. I also felt like this year I didn't learn anything and that I was just doing the homework so that I wouldn't fail the class and disappoint my parents. So I hope that there will be less homework and more interactive activities in class, because we did miss out on a lot of social skills being trapped at home for a year. I know from my own experience and talking to other people that a lot of people forgot how to talk to other people and students and teachers from not talking to people for so long.</p>	<p>I feel like I lost a whole year of my life, specifically experiences, education, and social skills. I forgot how to talk to other people so when I returned to school in November for hybrid it was super awkward because no one knew how to talk to each other.</p>	<p>In the end of the 2019/2020 school year which was 7th grade for me, I struggled a lot and barely completed any of my worries in the end. Because school had just closed because of the pandemic, a whole bunch of new responsibilities were dumped on me all at once and it was Too overwhelming and I just kind of gave up. I am proud of myself because once the next year started I did a lot better and tried my very best, it definitely wasn't perfect but it was significantly better than the year before. I also hope that when there is a new schedule made, it is sent out to teachers and students at least a week in advance, so that we can prepare. Not the night before, which is what the school has been doing, because that is really irresponsible and unacceptable.</p>
<p>I hope that you will help the transition for EDL students back to a regular schedule.</p>	<p>Being able to keep up with all the homework.</p>	<p>That I stayed in EDL for more than a year.</p>
<p>.</p>	<p>.</p>	<p>.</p>
<p>Less homework for some classes because it is really stressfull</p>	<p>Activities like the carnival or some projects in classes that I have been looking forward to since 6th grade.</p>	
<p>I hope that there is not a huge gap in between classes. For example in [Redacted] ELA class we had a 5 week gap in between classes when we were reading a book. Then 5 weeks later we took a test on the book we read 5 weeks ago and I had forgotten what was in the book. I think there should be a week of 1-3 then a week of 4-6 and so on.</p>	<p>I missed out on my social life during the pandemic. I felt like I would be able to pick it up again when I went to school, but I was sadly mistaken. We had to stay in our Areas even though studies showed that COVID didn't spread in a out door area being 6 feet apart. DUMB</p>	<p>I am proud of how I kept my grades up even though teachers like in advance math were trying to squeeze 3 weeks of math into one week. This made there be a 100 point test every week, which just made my stress even higher for the year.</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>I was disappointed in this school for how they handled the coronavirus in may 2020. I understand that it was a very quick turn around for the school, but there were plenty of other schools that also had a very quick transition and they did a much better job.</p>	<p>Redacted</p>
<p>Nope</p>	<p>Redacted</p>
	<p>Redacted</p>
<p>.</p>	<p>Redacted</p>
	<p>Redacted</p>
<p>I hated the school program this year and I barely learn anything, because everything was so squished together.</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 8:49:17	8th	Yes	I liked sleeping in.	I felt like I wasn't learning anything, it turned into me just trying to get all my home work done so that I wouldn't fail the class. I lost all my motivation for completing work on time and trying my best, the pandemic felt very never ending and like it was the same thing every week, over and over again. At the end of the 2019/2020 school year I felt very betrayed and very alone because I feel like the school and all the teachers had just left me on my own to learn by myself and there was suddenly loads of responsibility dumped on me to get up in the morning and manage my time between all my classes and do 5 hours of homework and then turn it all in, without any assistance, and why would a child choose to do that all by themselves and put themselves through all that pressure and stress, there's no incentives, no motivation, especially when there's a different screen to look at.
5/13/2021 8:49:24	8th	No	I liked that I could use my own device, instead of a POS iPad.	Not being able to talk to the teacher.
5/13/2021 8:52:12	8th	No	Not sure	Everything mostly too much homework
5/13/2021 8:54:09	8th	No		
5/13/2021 8:57:58	6th	No	I really liked getting to understand tech better. I can now type on a key board and can help others with technology.	It was really hard to manage classes on line, with not always stable WIFI. Online learning put a lot of responsibility on my back. I was the one to make sure to get to all my classes on time, get the supplies needed and so on.
5/13/2021 8:59:09	7th	Yes		It was hard to stay organized.
5/13/2021 9:03:14	7th	No	3 classes a day instead of 6 and school starts less early	Zoom
5/13/2021 9:04:15	7th	No	Shorter days	Distractions, instructions, zoom
5/13/2021 9:10:50	8th	No	Nothing	Zoom

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 9:26:40	6th	No	I liked being able to have all my supplies right on my desk.	Sometimes something that was challenging was if a teacher would assign a assignment at the end of class and when you start it doesn't make sense you have to email and then wait for an email back so sometimes clear instructions was hard to get.
5/13/2021 9:27:48	8th	No	I like starting later in the day and giving kids time to sleep.	Having so much time sitting inside.
5/13/2021 9:27:55	8th	No	I like starting later in the day and giving kids time to sleep.	Having so much time sitting inside.
5/13/2021 9:56:32	6th	No	I appreciated that we got to turn in things on google classroom because it was easier to keep track of what we had to do.	Zoom was really hard because I didn't actually get to see my teachers and friends in person and the teachers didn't know how to use it and i always got kicked out and missed class time because of that.
5/13/2021 10:01:4	6th	Yes		All the homework and stress of zoom glitching.
5/13/2021 10:05:0	6th	No		I never want to do zoom again
5/13/2021 10:09:4	7th	Yes	Independence and lots and lots of comfy beds on zoom	Not being able to actually hang out with my friends
5/13/2021 10:18:3	6th	Yes	staying home.	I don't have anything that was really hard, but I must say I dislike IXL.
5/13/2021 10:21:5	8th	No		Being alone stuck in my house .
5/13/2021 10:22:5	7th	No	I liked the shorter school days.	Zoom.
5/13/2021 10:54:2	6th	Yes	I liked how we had all of our materials at home, and didn't have to worry about forgetting different things. I also liked that I didn't have to wake up super early in the morning to get ready and then go to school, it was easier to just wake up, brush my teeth, get dressed, and get on zoom, but I don't think we can do anything about that.	Probably being on the screen so, so much, I was on EDL so I definitely got a LOT of time on screens, also the social aspect was really weird.
5/13/2021 10:54:5	6th	Yes		I had trouble Concentrate

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope they will give us a less confusing schedule and less schedule changes.	I'm not really sure.	I am sort of proud of being able to stay focused and still get assignments done even though most of our year was online.
Giving less homework	More of a social life.	My garden.
Giving less homework	More of a social life.	My garden.
I hope that they make lunch longer and not have two groups, I hope that we don't have to wear masks as much, I hope that we keep getting out of school at 2:00.	I have not been able to see my friends as much and i have missed some school because of power outages and being kicked off zoom.	I am proud of my grades and art that i have done.
I hope they do not assign 16 IXLs to do in a week.	Seeing my friends at school.	My grades.
	Having a real first day of school, and learning stuff about campus	Getting good grades even in COVID
I would like to keep study hall and the different lunch except kids could eat anywhere and not in s@#\$id zones	7 months of valuables school	Not going completely insane
I don't know.	My drawing skills. I started 3D modeling and I havn't drawn in about a month. I now have to rebuild my drawing skills.	3D modeling.
	Sports seasons, friends, traveling	Being more socially active and making friends and talking to new people.
	Hanging out with my friends.	No failing.
	Field trips, desk partners, sort of making friends, and just the overall experience of 6th grade I feel like.	I'm proud that neither me or any of my family got COVID-19 this year.
One lunch and less social distance	Meeting people	Getting my work done

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 10:56:1	6th	No	Half days...spilt cohorts. 3 periods at a time, have an asynchronous days where we just get all of our assignments and do them not involving zoom.	ZOOM, tech problems
5/13/2021 11:05:0	8th	No	Office hours	Not seeing my friends
5/13/2021 11:10:4	8th	No	It was nice not to have to leave the house till later.	Not being able to meet with teachers as easily.
5/13/2021 11:12:3	7th	No	I dont know because I wasnt here	Tons of ipad
5/13/2021 11:15:3	6th	No		There was no bell or warning of when your classes started so it was hard to know when to get to your next class unless you had a schedule. Its easy to get distracted a lot at home so it can be hard to concentrate. Classes felt longer at home than at school. It's hard to socialize with people from your class online.
5/13/2021 11:30:1	7th	No	getting to sleep in	it was very hard and antisocial and i absolutely hated distance learning, because it was very hard to follow along with many distractions.
5/13/2021 11:32:4	7th	No	Having all things digital in a place were it is hard to loose instead of being given a lot of paper to keep track of.	The homework load was unreasonable also it was hard to pay attention in zoom.
5/13/2021 11:32:5	8th	Yes	I liked the flexibility throughout the day because you were at home and could do stuff.	I hope I never have to be lazy like remote learning and I barely saw friends throughout remote learning too.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
Stop being so controlling	Social interactions	Completing it and adapting to the new learning environment
I hope we have extra time after school.	Hands on activities.	My grades
More breaks	More hanging time with friends	Being faster in tag and more success rate in math
	I feel like me and all sixth graders missed out on having our first year of middle school and getting the actual middle school experience. And we also missed out on graduating from elementary school and had to do it virtually. We also missed out on being able to walk through the halls and actually being in the school instead of being stuck outside. Also because the school was split in half during hybrid I didn't get to really see many of my friends during that time.	I'm proud that I stayed organized and getting to all my classes on time. I'm also proud of getting through the school year during COVID even though it was hard.
i hope there is no zoom ever and it's like as much as last year before the pandemic as possible.	social stuff like end of year field trips and the dances	my grades
More aspects digital with better websites.	A lot of education was cut because of online school.	The amount of work I got done.
I hope they don't take away our freedom because I feel like after the pandemic they will be sort of scarred and be more demanding.	I missed out on sports because everything was on lockdown.	I'm most proud of not getting or giving Covid to family members.

Is there anything else you would like to share with us?	Please leave your email address if you would like us to follow up with you to share more information.
I hope we can have half days because I learn better in the morning and I feel like my brain is not at its best learning time at the end of the day so I like having school from 8:30-11:30. I can also focus on things way better when I only have 3 periods.	Redacted
No	Redacted
	Redacted
Maybe, but right now no	Redacted
	Redacted
no more zoom	Redacted
No.	Redacted
No	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 11:34:0	7th	No		Zoom
5/13/2021 11:34:4	7th	No	-More Freedom	-I hope to never have to deal with not being able to connect with my classmates -I hope to never have to deal with doing my hardest classes for half of the trimester and the easiest the other half.
5/13/2021 11:35:4	7th	No	Not as much homework	Focusing
5/13/2021 11:36:1	7th	Yes	I liked office hours and longer lunch.	Sitting in the same seat and being on zoom everyday for a long time.
5/13/2021 11:37:2	8th	No		
5/13/2021 11:39:0	8th	No	Off Campus lunch and independent working.	The hard to focus environment with a lot of distractions.
5/13/2021 11:39:3	7th	No	I liked having not a lot of homework	Zoom
5/13/2021 11:39:4	7th	No		
5/13/2021 11:42:4	6th	Yes	I hope that nothing gets continued from zoom classes, I really didn't like anything about it.	Not being able to see anyone, and teachers being really mean to kids, it has been so hard on us and when people are mean it makes you feel even worse.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
		<p>I git closer with my dog [Redacted]. She is the best dog. She's a [Redacted] and is 3 years old. She loves cuddles and food and especially peanut putter. She loves people and get sad when she's alone. So we hang out with a lot. We got her a few years ago. Definitely record adopting a dog, go to your local animal shelter and adopt a puppy becuase they'll love you no matter what. Even When all your friends hate you and your family leaves your dog will still be there for you. -Petco</p>
<p>-I hope we go back to our old schedule</p>	<p>-I felt like I lost some social life</p>	<p>My grades</p>
<p>I hope they have a study hall</p>	<p>I feel like I have missed out on doing projects and labs with my classes</p>	<p>My grades</p>
	<p>Friendships and better learning ability's.</p>	<p>Making it through this long year with zoom.</p>
	<p>We missed field trips, graduations</p>	
<p>I hope they can give us an equal amount of independence and Lectures</p>	<p>I lost 8th grade festivities and the festival. Also just moving here it was hard to make friends.</p>	<p>Doing well in school even when we did distance learning.</p>
<p>NO HOMEWORK and shorter school hours</p>	<p>All of the fun science projects</p>	<p>My grades</p>
<p>I hope that they don't split up the lunches again, as that was hard to not see my friends for half the time we went full back.</p>	<p>Probably social things like not seeing friends or being able to do group work in school</p>	
<p>I hope that they won't be like here are 5 new assignments all due today, they don't even realize we have more classes and more homework to do.</p>	<p>I missed out on making new friends which was really sad.</p>	<p>Getting through the school year.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 11:47:2	7th	No	I really loveeee my class sizes. Good enough to get to know people, but also good enough to have the teacher not focus on you. It's a perfect amount	Zoom! The device of an iPad and laptop made me have headaches frequently. It was a struggle getting out of bed everyday to go to my desk that was about 2 feet away. It may seem easy but when your an aspiring napper it hurts to do that. It feels like your fired from your job.
5/13/2021 11:49:1	6th	No	- having all announcements in google classroom so you could see them again if you forget them	- internet problems - spending a lot of time on screens for classes and homework - taking good photos of work—it's hard to get a non-blurry photos
5/13/2021 11:49:2	6th	No	Short days	Technological difficulties
5/13/2021 11:50:5	7th	No	I liked the independence factor of distance earning because I could get a lot more done at home then if I was a school, partly because of the resources I had at home but a lot of it had to do with the environment I was in. I had no distractions compared to the noisy classroom I remembered .	Because of going on zoom every day for months on end It field immensely repetitive and quite demotivating. Every day I woke up and I already new the outcome of the day from the moment I waked up.
5/13/2021 11:57:0	8th	Yes	I liked the flexibility throughout the day because you were at home and could do stuff.	I hope I never have to be lazy like remote learning and I barely saw friends throughout remote learning too.
5/13/2021 12:00:3	7th	Yes		Not having enough instruction
5/13/2021 12:03:0	8th	No	When I was in remote learning it was way more chill	Nothing really

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope the world becomes that one Jimmy Neutron episode! Where the parents just disappear.</p>	<p>Social interaction! My friends have my whole heart, well half if the other is the organs. Sorry, I should pay better attention in greys anatomy! My feelings are important and my friends fufuill it so I can live. Literally. I need my friends. I don't want, need. That was a STRUGGLE!</p>	<p>My dog, [Redacted]! He's a COVID dog of course and he can be nice and funny but also stupid at the same time. He's a golden retriever and he's so nice to our cats and so happy but also ruins my flip flops. I still love my 11 month golden retriever name [Redacted]</p>
<p>- it would be nice to move around inside the school - to have the REAL middle school experience - maybe we could keep at least three-four classes instead of six - like 1-2-3 for a week or two then alternate to 4-5-6 next week or two</p>	<p>- Field trips! - half the in-person school year - not all the project we could have done - the 'social aspect' - we didn't meet all the new friends we were expecting to - group projects and table groups</p>	<p>- Easily slipping into the new 6th grade schedule - NOT GETTING COVID</p>
<p>Shorter days</p>	<p>Nothing</p>	<p>Nothing</p>
<p>I hope they don't over estimate us are under estimate us during my 8th grade year.</p>	<p>I felt like I missed a lot of regular schools experiences like field trips but most of all the little experiences like school drama and in class experiences and funny jokes and just regular human interaction.</p>	<p>I most proud of adapting and thriving this year in 7th grade.</p>
<p>I hope they don't take away our freedom because I feel like after the pandemic they will be sort of scarred and be more demanding.</p>	<p>I missed out on sports because everything was on lockdown.</p>	<p>I'm most proud of not getting or giving Covid to family members.</p>
<p>Have more time to do homework at school</p>	<p>School dance, field trips, social life</p>	<p>Keeping my grades up</p>
<p>I hope teacher won't give s much homework</p>	<p>doing less group projects</p>	<p>Playing baseball</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>It feels just like yesterday when I got him. He's almost a year old! Time flies by when there's global pandemic, right? Make sure to get your dog at the shelter and be a rescue family. It can makes puppies lives so happy. -Petco</p> <p>Also, I may not be the brightest nor the best in math, or anatomy. But, this google form may help my chances of getting into a good college at just 7th grade! I apply for nepotism at YOUR OWN CAMPUS!</p>	<p>Redacted</p>
<p>- nope</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>No thanks.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p></p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 12:06:0	6th	No	I liked how we could be muted because it was easier to listen to the teacher. I don't know how this could help but that is just my opinion. Also I really liked google classroom instead of homework that our teachers hand out, we cant lose our homework if it is on our iPad!	I thought it was hard because I felt very lazy and tired all day and it was harder to motivate myself to go outside, take a walk or bike ride. Also I did not like all the WiFi problems.
5/13/2021 12:13:3	8th	Yes	Not having to talk that much in class	Having lots of homework
5/13/2021 12:24:1	7th	Yes		I was hard to focus. When I was home.
5/13/2021 12:26:5	6th	No	Assembly's in- person and concert performances	
5/13/2021 12:31:5	6th	Yes	I like the remote learning because usually when I go to a new school I get a lot of anxiety and I felt comfortable at home.	The schedule and which classes to go to and what time is each class so that was kinda confusing.
5/13/2021 13:26:4	8th	No	Seeing my friends on zoom.	NOTHING.
5/13/2021 13:37:2	8th	No	Work period every day	Staying focused at home
5/13/2021 14:20:4	8th	No		Schedules and learning information. It was hard to process information through zoom. Paying attention was also very hard
5/13/2021 14:27:2	7th	Yes		Having to manage my own schedule
5/13/2021 14:52:1	7th	No	The aspects of distanced learning that I appreciated the most this year was the flexibility I could have in my location, the fact that I did not have to do much to get ready for school, and the extended amount of time with each class due to the 3 by 3 model.	Being on a screen all day, having faster-paced classes, and experiencing distractions throughout the school day were my difficulties with remote learning.
5/13/2021 19:07:2	6th	Yes		

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I hope that we can interact with people in our class when we do work instead of doing school work by our self. Also I don't want to wear masks.	We have not had any field trips and I always look forward to them.	I am most proud of my grades. Also I have gotten more patient.
Have study hall each day	Sitting with my friends at lunch	My grades
	I feel that I missed out on open homes	
Getting on zoom in person full time	In person graduation	In person for elementary and middle.
I hope that next year we get out at the same time right now at 2:00 instead of 2:50.	I feel like I missed a lot of learning and if COVID wasn't a thing I feel like I've would've learned more.	My kinda good grades.
I hope they make classes longer. I hope they don't involve student support classes from 2:10 to 2:50.	NOTHING.	Seeing [Redacted]
Force zoom again	The field	Most people in Marin responded acceptionally well with wearing masks and keeping the case numbers down
Please don't give so much homework [Redacted]	Learning experiences. For example, we were behind schedule for our lessons in Algebra.	
		Getting good grades
After the pandemic, I hope that adults allow a way for sick people to participate in classes. I hope they do not use a three class schedule in the same way (because it can result in an overload of work or hard exercise and unfair testing conditions(due to having to take the same test as other people who have had a whole trimester more of content than you)) or have more zooms.	I feel that I missed out on opportunities to interact with other people and do interesting projects during the pandemic in school this year.	I am proud of the way many people have learned to be better people because of the difficulties of this year.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/13/2021 20:06:0	7th	Yes		Not getting distracted by phones, iPads etc. I thought paying attention was really hard. Not only over zoom was a struggle but trying to actually pay attention was hard. Also not leaving the meeting was hard when the teacher was boring
5/13/2021 20:06:0	7th	Yes		Not getting distracted by phones, iPads etc. I thought paying attention was really hard. Not only over zoom was a struggle but trying to actually pay attention was hard. Also not leaving the meeting was hard when the teacher was boring
5/13/2021 22:21:4	7th	No	I got to sleep in and have more time to relax.	It felt harder to get my work done than in person.
5/13/2021 23:46:3	8th	Yes	I hope we get to do more IXL instead of tests because I find IXL is way less stressful than test	Wifi troubles
5/14/2021 8:45:33	6th	No	The kinda freedom to just at lunch or something walk the dog and go out for lunch. And also the long lunch and short school day.	Finding all of the zoom links, being late to zoom because you forget about it because ur not even at school.
5/14/2021 8:47:56	7th	Yes		Not having enough instruction
5/14/2021 8:50:20	7th	Yes		I was hard to focus. When I was home.
5/14/2021 8:54:51	6th	Yes

What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/14/2021 8:55:26	8th	Yes	Sleeping in, not worrying about COVID.	Having to sit for 70min 3 times a day, and there is way to much consistency, there is no difference between any class day. It's boring and there is really nothing to look forward for, like a short day on Wednesday. I felt like I didn't learn anything. So much HOMEWORK!!
5/14/2021 8:59:29	8th	No	I like that we were able to have a homework period.	We split the classes into 3 and 3 and I got my 3 hardest classes together.
5/14/2021 9:11:21	7th	No	6th Period on Monday's.	More homework and not seeing my friends.
5/14/2021 9:29:08	8th	Yes	Being at home	The classroom app
5/14/2021 9:53:53	7th	No	I got to sleep in and have more time to relax.	It felt harder to get my work done than in person.
5/14/2021 10:22:0	8th	No		
5/14/2021 10:22:1	8th	No	Sleeping and watching and eating tv during class	I couldn't focus and being stuck at home.
5/14/2021 10:24:0	8th	No		Not being able to see all of my friends on a daily basis
5/14/2021 10:25:4	8th	No	I was not a fan of distance learning, but I did like a later start time and the kahoots we played	The disconnect between student and teacher

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>Just please go back to the other schedule from before COVID.</p>	<p>Learning new things, and being ready for a more advanced high school.</p>	<p>Probably an art project</p>
<p>I hope they get rid of the schedule that we have now and go back to the new schedule.</p>	<p>In zoom I had a hard time with math.</p>	<p>Getting good grades with the pandemic.</p>
	<p>Time with friends</p>	
<p>Better food</p>	<p>Nothing</p>	<p>Nothing</p>
<p>I feel like they should make it safe but we have more privileges.</p>	<p>Going to school and having lunch with ALL of my friends.</p>	<p>My GPA.</p>
<p>I hate the first group and second lunch thing, a lot of people have other friends in a different group and it could make people feel discluded and lonely.p</p>	<p>Friends</p>	<p>Trying</p>
		<p>My line drawing in tech</p>
<p>The 3 by 3 because than I get an overload of one class and got really bored of it.</p>	<p>The acting workshop in [Redacted] and science projects</p>	<p>My redesigning the American Flag project in art</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>This year has kinda sucked. There is to much homework [Redacted] and way to long class periods.</p> <p>There needs to be a better system for kids who are placed in the normal math 8, but need to be in the advanced class. I have been working on the side for countless hours so I can get into a higher level next year in high school. I sit in my normal class, and it is way to easy, but the school hasn't really helped me to get to a higher grade. I don't think it should be so hard to get the correct academic level. In 6th grade, there should be a better survey, for math placement. If the kid is doing well, they should be placed in the higher level math, it is a lot easier to go down to normal math 8 rather than going up to advanced math.</p> <p>Also the Kido Fair, I never got to do it from middle school. 6th grade some malfunction, 7th COVID, 8th also COVID.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/14/2021 10:26:0	8th	No		During early 2020, I hated how I was entirely on my own, and my teachers assigned a ton of work.
5/14/2021 10:28:0	8th	Yes	The schedule was more flexible and we had more time after school to do things.	Be at home 90% of the day
5/14/2021 10:28:4	8th	No	Interactive games were fun, I got a lot of time for myself, and I could learn wherever I wanted.	Technology problems.
5/14/2021 10:29:5	8th	No	I enjoyed working digitally instead of paper printouts. We received less homework too which worked well. We had more flexibility to decide when we completed our work.	It was hard to pay attention with all the distractions at home. It was hard to connect with the teachers over zoom.
5/14/2021 10:30:1	8th	Yes	I liked that I had more freedom to do do my work when I wanted.	I was a bit worried about how much I was actually learning compared to a normal school year.
5/14/2021 10:32:3	8th	No	I didn't love online learning but I did like that the school days were shorter.	Teachers assigned a lot of work that was supposed to be in class work but we never had enough time to do the work in class so I would have hours of homework that would build up throughout the week and it was very stressful. And we couldn't get hands on help with our work, and in person help really benefits me.
5/14/2021 10:34:4	8th	No	Not changing for pe.	Tech problems, no socializing, teachers spending too much time lecturing. Assigning wrk without any guidance or support. Being on screens too much. Teachers assigning busy work. Teachers not holding you accountable.
5/14/2021 10:34:4	8th	No	Not changing for pe.	Tech problems, no socializing, teachers spending too much time lecturing. Assigning wrk without any guidance or support. Being on screens too much. Teachers assigning busy work. Teachers not holding you accountable.
5/14/2021 10:34:4	8th	No	Not changing for pe.	Tech problems, no socializing, teachers spending too much time lecturing. Assigning wrk without any guidance or support. Being on screens too much. Teachers assigning busy work. Teachers not holding you accountable.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
	I feel like I missed a lot Math and science that I wanted to learn.	That we got to go fully in person
I hope they don't do any type of hybrid in the next 10 years	Definitely real science experiments	My egg drop project and my time management is much better than when we were doing online
	Human interaction	Raising my grades
I hope there is less independent work, more hands on/lecture type learning that requires full attention worked much better.	We missed on a lot of the curriculum and club activities.	I'm proud of getting back to in person school and boosting my grades.
I hope that teachers give me more freedom for how I use my time.	I feel like I missed out on a lot of learning because my teachers are skipping over things to get to more important things.	I am happy because with the freedom I was able to play a lot of soccer.
I hope that there is more in class work and less homework so we can enjoy our lives outside of school and not be constantly stressed that we're going to have enough to finish the 3 essays that my teachers assigned that are due at midnight.	I feel like I didn't learn as much as I could've and my mental health and so many others was really affected by it.	I'm proud that I managed to get most of my work in on time and that I learned how to communicate with my teachers better.
Hopefully teachers understand that students didn't get everything in this year so they can see our lead and what we understand.		
Hopefully teachers understand that students didn't get everything in this year so they can see our lead and what we understand.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/14/2021 10:46:4	8th	Yes	I liked that you didn't actually need to go to school but you could just do school from home.	At home my wifi wasn't very good so I could barely understand my teachers in half my classes. It was just much harder to learn and understand not being in the classroom and not being able to talk with classmates.
5/14/2021 10:46:5	8th	No	I appreciated that I could sleep in, I appreciate being able to do homework while at lunch. I had more flexibility with how I worked.	Focusing on the class, listening, sitting and watching a screen all day, teachers assigned too much homework
5/14/2021 10:47:5	8th	No	A more flexible schedule which included more time to work on homework.	It was hard to engage with the teachers and maintain interest. There was too much independent and unguided work. There was no personal motivation or achievements for completing my work.
5/14/2021 10:48:0	8th	No	There were a few things that I appreciated a lot! Being able to sleep-in, more organized because everything was digital, and a lot more time to do homework!	Being indoors for several hours affected my mental, and physical health. I started feeling less motivated, and not even for school, but for other things I loved as well. Since I was always inside around distracting things, I was always distracted when I was in class. This distraction caused disruptions in my learning. Having lack of guidance towards homework, and slapping with so much homework was a burden.
5/14/2021 10:48:0	8th	No	I liked how there was less homework and a more flexible schedule.	Not being able to talk to friends and teachers in person and not having enough class time to do the homework.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope we do more outside of class work and not just stay in class the whole day. To much independent work with lack of guidance. I also want to keep having group work and really so you need to socialize with your classmates and fun activities.</p>	<p>I think we missed out on the real school experience. For the second half it felt like real school and I could talk with classmates. But the beginning it didn't feel like real school just sitting in front of a zoom screen. And were all so spread apart in classrooms and can't talk to each other. No basketball school team.</p>	<p>I am proud of myself this year because in online school my grades weren't very good and it was very hard for me. But when I came back in person I completely understood everything and got much better grades.</p>
<p>I hope we keep the 123 - 456 schedule because it's easier to juggle each class. Different and fun activities, not boring writing and note taking assignments like I had in [Redacted] class. I hope they don't assign too much homework and that it becomes more like normal class. I WOULD LOVE a rotating three by three</p>	<p>I missed out going on vacations and field trips, also lots of cool experiments in science, I missed out on a Disney land trip and great America trip, anything exciting, connecting with students.</p>	<p>I am most proud of improving my time management skills because we got so much homework and it helps me definitely feel better about my homework load.</p>
<p>More on hands activities rather than just lectures and writing would keep me more active. I hope they don't continue with faster paced work and larger work loads to make up time from the three by three. The three by three felt very repetitive and I didn't get the most out of my learning.</p>	<p>I feel like I missed some important learning specifically in Math because I kinda just want to complete my work instead of fully understand them. There also wasn't much motivation to try my best in class. I felt like I missed out connecting with my peers. There were experiences that I was looking forward to like chorus trips and sport teams.</p>	<p>I'm proud that I was able to maintain my grades through the year and be able to reach out for help when I needed it. I'm glad I was able to continue connecting and appreciate my friends more in the pandemic.</p>
<p>I hope they don't give us too much homework that we have to stress about everyday. Also, the 3 by 3 rotating.</p>	<p>I lost motivation for school, and other things. I did try on school work, and turned things in, but it was for the sake of completing it. Because I was always inside, learning behind walls for hours, I shut out everyone, became more quiet, and less social towards my family and friends.</p>	<p>I'm proud of myself, and for everyone else getting through this harsh year!</p>
<p>I hope they give a manageable amount of homework and give a lot of time in class to do it and make more engaging and fun assignments. I hope they go back to the normal 6 classes per day.</p>	<p>Well up I do not feel like I missed too much but I'm sure I missed some of the curriculum. We also missed the after school carnival.</p>	<p>I most proud of just my overall improvements of my skills and I got closer with friends and met new friends.</p>

<p>Is there anything else you would like to share with us?</p>	<p>Please leave your email address if you would like us to follow up with you to share more information.</p>
<p>I didn't really like that some teachers brought politics into school I don't like that because it's so boring and we're too young for that and their whole class would be about politics and I don't think it's good to teach about that at this age. Also teachers would leave the door open when it's freezing and I got a cold one time and I would ask to close and they would just get mad.</p>	<p>Redacted</p>
<p>.</p>	<p>Redacted</p>
	<p>Redacted</p>
<p>Nope!</p>	<p>Redacted</p>
	<p>Redacted</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/14/2021 10:48:0	8th	No	I really liked using interactive things like slid shows and not having as much homework with added freedom of time.	There were a lot of distractions and the days felt really boring and long sitting in one place all day not going outside at all also too much work with minimal guidance.
5/14/2021 10:48:1	8th	No	I liked using peardeck, shorter school days, and sleeping in.	Too much independent work, headaches from the screen, and not enough teacher support.
5/14/2021 10:49:0	8th	No	One thing I liked was lots of interactive features, like kahoots and pear deck, and the teachers were being very flexible with work and schedules, and I had more time to get homework done well with the school days being shorter.	Having to try and understand certain concepts over a zoom screen, and then having to work with the concepts, even if we don't fully understand it, which was really difficult. Also technology problems, and teachers assigning to much independent class work, which only became homework, instead of teaching students with guidance. Also, when teachers tried to make fun projects we had to create over zoom with people in breakout rooms, it was really hard to work with people, especially if people aren't unmuting or turning their camera on and talking, which anyone had the power to do. Also, teachers gave too much independent work, without being readily available in person for assistance and just being indoors all day. I got a lot of headaches, my vision weakened, and being on screens doing the same things everyday got really repetitive and everyone lost any motivation to attend the school zooms, since, what's the point.
5/14/2021 11:11:3	6th	No	That the teachers let us have breaks. More people participated.	Looking a a scream for so long. Getting on the zooms after break and no timer to remind us.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope they used more involved and really helpful guidance while use it more engaging fun a activities. I would hope that they don't use excessive amount of technology and they creat a more manageable work load.</p>	<p>I do kind of feel like I didn't learn as well or as much because of all the work that I was just trying to get done. I also feel like I lost a lot of middle school activities like dances and sports also just having fun in my classes with my classmates making talking and joking while working.</p>	<p>I'm most proud of in school was just being able to get through this year while keeping my grades up and also learning a sport but also becoming more confident in myself and more outgoing. I learned how to better communicate with teachers and that it can only help to do so.</p>
<p>I hope they don't split up the classes with 3x3 because it made the workload uneven and it was easy to forget stuff. Also, I think it would be nice to have a rolling schedule so the days are different because it gets really boring having the same day over and over again.</p>	<p>I feel like we missed some math even though it went really fast, but I think we also learned life skills. I also missed out on a lot of out of school activity and connecting with classmates. We also missed the carnival, which isn't really a big thing but would have been fun.</p>	<p>I got through the year with decent grades, learned some new skills, got closer to friends and made new friends. I also got better at telling what my family was feeling.</p>
<p>Being able to not have to change for PE was nice, and I hope they keep it so that people don't have to change, or they add a feature which allows students to clean off. Over online school, we would have so much homework being given, and we were less doing our best on the homework and instead just trying to get through and finish it. I would want more time to do more work in class, since school is supposed to be at school, not at home. I also feel like if the 3x3 was a rotating schedule, I would like it, since the repeating days of the same classes over and over, and being stuck with those classes for weeks isn't great for motivation.</p>	<p>I feel like I didn't learn as much as I could've, since having such a repetitive schedule I also feel like I missed out on really fun class activities, such as instead of doing fun experiments in science or doing performances in choir, we just take notes on what the teacher is doing and on glitchy videos, and sang muted on zoom trying to have to energy to even turn our cameras on. We also didn't really get to know the teachers that well, and didn't get the feel of how they teach, but it was really boring and draining, always just waiting for the class to be over. Also the CARNIVAL WE MISSED TWICE and the CHOIR PERFORMANCES WE DIDN'T GET TO GO TO DISNEYLAND OR THE GIANTS GAME OR GREAT AMERICA. We also missed the end of the school party at Stinson, and TRAVELING TO D.C. FOR SCIENCE. And all teachers did was just tell us how fun it was last year, which only made it worse.</p>	<p>I'm proud of how I was able to stay semi-connected with school and maintain my good grades, even over online. I also got much better at contacting my teachers, such as emailing for extensions, retakes, or office hours, which I think is a really great skill to be strong at. I also got better at managing my work, while also finding time to do things I enjoy as hobbies, and meeting more people and being more social and open to new experiences. I got really close to my friends, and strengthened my bonds by a lot with friends and family. I think I'm just really proud that I made through this year alive and shining, still at it with strength and energy.</p>
<p>Have us have more breaks. Make everyone participate in class not just volunteers to everyone understates it</p>	<p>I felt like there were some fun projects that we couldn't do on zoom. And I have lost being able to scotsialize the teachers didn't let us talk to our friends during our break</p>	<p>Making my i am a scientist project in scientce during distance learning</p>

I think that we deserve another carnival, another trip to DC and DisneyLand and to sing at the giants game. The school needs to repay us for what was taken from us.	Redacted
No	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/14/2021 11:14:2	8th	Yes	I like it when there's a clear and concise schedule that doesn't change, so I can schedule all of my activities and stuff around it	Sometimes there were distractions, and it was much harder to intake information over zoom
5/14/2021 12:08:2	6th	No		Staying focused
5/14/2021 12:09:3	6th	Yes		Have a phone or devices right next to me
5/14/2021 12:14:0	6th	No	I loved late start and being able to wake up and just start school. I think that we should have a late start day, like the highschool and if we have a normal release time we should have early release Wednesday.	I disliked how messy my desk got and how unorganized i could be. I also felt not very productive, because if i just stay home in a day then i feel lazy and tired.
5/14/2021 12:25:1	6th	Yes	Having more time to do assignments	Being away from all my friends
5/14/2021 12:36:2	8th	No	I liked how there was less homework and a more flexible schedule.	Not being able to talk to friends and teachers in person and not having enough class time to do the homework.
5/14/2021 13:02:0	6th	No	Being able to learn in our rooms and pj's.	I did not feel very motivated to do school at all.
5/14/2021 13:18:4	6th	Yes	It was nice to get up and not have to do a full routine to get ready for school.	Losing internet connection or glitching on zoom and other online apps.
5/14/2021 18:48:1	6th	Yes	Later start in the morning, extra time to finish homework and work in class, maybe offering a remote learning option for next year as well.	Nothing
5/15/2021 18:11:0	6th	No	One thing I liked about remote learning was the later start dates for school. I was also more comfortable at home.	What was hard about remote learning was that it was sometimes hard to understand the directions because it was harder to communicate with teachers.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
I think what we have now is pretty good, but I wouldn't want them to take away any of the study hall or add more homework	A lot of learning and in person experiences	My advancements on personal hobbies
I hope there are bigger desks and table groups		
		All of the big assignments I finished in EDL.
Even though i realize this probably wont happen i would like the capability to leave some items at school and be able to share more things because i dont think that i will be able to carry every supply i need in my backpack along with my lunch every day. I also didn't like having to carry around my backpack all the time, i found that my back got really sore and just hurt when i got home. I also would love to have every class at once. It's really hard to remember academic skills when you dont have that class for four weeks.	I definitely think that we should have way more spirt days. They are really fun and they give something for us students to look forward to and to talk about.	I'm proud of getting through school and keeping up with my homework.
To not separate us into two lunches and that we wont have to sit on a dot and we can eat with whoever we want	Making new friends because it's harder to make friends on zoom	Having more time to do homework and my grades improved
I hope they give a manageable amount of homework and give a lot of time in class todo it and make more engaging and fun assignments. I hope they go back to the normal 6 classes per day.	Well up I do not feel like I missed too much but I'm sure I missed some of the curriculum. We also missed the after school carnival.	I most proud of just my overall improvements of my skills and I got closer with friends and met new friends.
To keep the three classes at the time.	Being able to not be able to sit any where we want at lunch.	Honestly being able to understand all of the schedules.
I hope that teachers give us longer time for larger homework assignments.	I feel like I missed out on the end of fifth grade and most of sixth grade.	Surviving all the stress and being able to go back to school in person.
Not to put too many people in the classrooms	Nothing	Everything I learned
I hope that adults will help more in school.	I feel like I missed out on spending time with my friends this school year.	I am most proud of getting good grades even though there's a pandemic.

I hope that when I'm in 7th grade this whole pandemic will go away.	Redacted
	Redacted
	Redacted
Next year I think that we should have one through six classes to have more of an experience of what middle school is actually like.	Redacted
I would really like to have an option of distance learning next year	Redacted
No, there isn't anything else I would like to share.	Redacted

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/15/2021 21:25:3	8th	Yes	Less "homework"	?
5/16/2021 18:00:5	6th	Yes		Getting kicked from a zoom
5/17/2021 9:27:49	8th	No	A more flexible schedule which included more time to work on homework.	It was hard to engage with the teachers and maintain interest. There was too much independent and unguided work. There was no personal motivation or achievements for completing my work.
5/17/2021 10:00:1	7th	Yes		I was hard to focus. When I was home.
5/17/2021 11:07:5	6th	No	I really loved the comfortable chair that I sat in.	It was really boring.
5/17/2021 11:13:1	6th	No	I really loved the comfortable chair that I sat in.	It was really boring.
5/17/2021 12:40:4	7th	Yes		Having to manage my own schedule
5/17/2021 13:14:0	8th	Yes	I do want to go back into in person learning but only when I get my vaccine I also don't want to participate in 8th grade I person learning I would rather wait this summer and go back in high school.	I haven't talked to someone other than my family in person for a long time. It wasn't sorting I was used to aswell as other kids. It gave me one for disadvantaged and made things a lot harder. I hope we don't have to do this much longer.

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
?	Saw less people	?
Keeping study hall because i can do work then		Living during a pandemic
More on hands activities rather than just lectures and writing would keep me more active. I hope they don't continue with faster pasted work and larger work loads to make up time from the three by three. The three by three felt very repetitive and I didn't get the most out of my learning.	I feel like I missed some important learning specifically in Math because I kinda just want to complete my work instead of fully understand them. There also wasn't much motivation to try my best in class. I felt like I missed out connecting with my peers. There were experiences that I was looking forward to like chorus trips and sport teams.	I'm proud that I was able to maintain my grades through the year and be able to reach out for help when I needed it. I'm glad I was able to continue connecting and appreciate my friends more in the pandemic.
	I feel that I missed out on open homes	
Maybe keep the desk further apart.	Making friends and doing in person clubs.	That is survived!
Maybe keep the desk further apart.	Making friends and doing in person clubs.	That is survived!
		Getting good grades
I'm not to sure I just want things to go back to normal.	I lost all my friends and now it's all weird and awkward when I talk to people I person because I've been in this house 24/7 .	Idk.

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/17/2021 19:34:5	6th	No	I like doing all the assignments on google classroom and working on them electronically. It helps me be more organized and efficient when getting in my work on time and making sure it is good.	I liked remote learning a lot and I am fine with it.
5/18/2021 9:12:17	7th	Yes	Less teachers for subjects.	The constant schedule and teacher changes.
5/18/2021 9:12:38	7th	No	Three classes per day.	I'm not sure.
5/18/2021 10:33:0	6th	No	I appreciated how a lot of the clubs were on zoom so you didn't have to find the time to get somewhere and things like that. Maybe next year we could continue to offer an in-person and zoom option for those who can't join in-person.	It was really hard to be online the whole day. Even during times we weren't on zoom for class all of our homework was online and felt like we were using a keyboard more than a pencil.

<p>After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?</p>	<p>What do you feel like you missed out on or lost because of the pandemic in school this year?</p>	<p>What are you most proud of this year?</p>
<p>I hope school would start later. It would be nice if school could start at 8:50 or later. I wouldn't have to [Redacted] in the morning and I could make sure I am perfectly prepared for school. I also would like it if there could be some sort of survey sent out that's asked who we want to be in our classes next year. This would really help because this year none of my friends were in my classes. I think this would really help the happiness of all the students.</p> <p>One thing I hope you don't do next year is the three classes and three classes thing again. I listened to one of the board meetings right before we went into the three three schedule and someone said something along the lines of "who knows, we could revolutionized the way we teach". I think whoever said that was just trying to make parents more supportive of the new schedule but In my opinion I think this was a dumb thing to say and if it happens it would be a failure on your part because you would be cutting our education in half. You literary cut our education in half for 2 trimesters of the year. These are just my thoughts so if I come across as rude just know I am being honest. Other than that I would also like the read aloud back. I really enjoyed listening to Lily and Duncan and same sun here in the morning.</p>	<p>I feel like I missed out on meeting new people.</p>	<p>I think I have gotten all some form of a's on my school tests and completed grades so that good.</p>
<p>I hope that you will help the transition for EDL students back to a regular schedule.</p>	<p>Being able to keep up with all the homework.</p>	<p>That I stayed in EDL for more than a year.</p>
<p>I hope the adults make us be able to go inside the main building again and not change the schedule</p>	<p>The fair and class party's</p>	<p>Not getting COVID</p>
	<p>I feel like being a sixth grader, middle school is a place that you start to make lots of new friends but it was really hard to make new friends online and on zoom.</p>	<p>I am most proud of adapting to all the different schedules that were changing and all the different changes. I feel like I learned to just go with the flow.</p>

Timestamp	Grade in 2020-2021 school year	Did you participate in an Extended Distance Learning class this year?	What are the aspects of remote learning that you've appreciated the most, and would like to see carried back into in-person schooling?	What was really hard about remote learning that you hope you never have to manage again as a student?
5/18/2021 11:33:5	8th	No		The distractions were insane. I couldn't focus and barley learned.
5/18/2021 12:26:2	7th	Yes	Eating during class	Not being able to easily contact the teacher
5/18/2021 12:43:4	8th	Yes	Possibly the flexibility of the schedule, as well as any safety precautions that are needed depending on the Covid situation in August. It also led me to expand my view of the world, and I would like to continue that.	I did have mental heath issues late last year, which I'm still getting out of today, and it was one of the hardest things I've ever dealt with. The isolation got to me a lot as well, all of my friends went to in-person and I lost all of my teachers. This led me down some paths I did not want to go down, and I'm very lucky that my parents reached out for help, so that I got better. IXL and Apex were painful.
5/18/2021 13:13:5	7th	Yes	Eating during class	Not being able to easily contact the teacher
5/18/2021 19:16:3	8th	Yes	I liked having flexibility and being able to choose my own work times.	Remote learning made it easier to procrastinate.
5/18/2021 20:49:0	7th	Yes		Probably everything. There was a big lack of communication through the screens
5/19/2021 10:52:5	6th	Yes		have to switch between zoom classes
5/20/2021 11:51:2	8th	No		The distractions were insane. I couldn't focus and barley learned.
5/20/2021 18:53:5	7th	Yes	staying home	doing everything at the same desk all day

After this pandemic, what do you hope adults will do to make in-person school better for next year? What do you hope they don't do to school next year?	What do you feel like you missed out on or lost because of the pandemic in school this year?	What are you most proud of this year?
More collaboration and socializing while working.	Just a lot of learning socializing and acting normally.	Making it through.
Idk	Learning	Idk
I hope that adults continue to require masks to be worn on students and teachers and staff, as long as it as needed by the CDC and the government. I hope that the schools will help the extended distance learning connect back with the rest of the school, and repair the divide that has formed. Teachers and the school need to focus more on individual students and less on a collective image, and help students expand on our interests.	I feel like I missed out on the full experience of my 8th grade year, this was not how I expected my last year of Middle School to go. I also almost lost a lot of my friendships that I had, and missed a lot of social interactions and experiences. I missed a lot of my education as well, I don't think I fully absorbed what I learned this year, because there was so much work and not enough engagement and interest to fully learn the information.	I am proud that I got out of the dark spot I was in, and continued to stay healthy and safe. My family managed to keep healthy, and none of us got sick. We do know many people who died of Covid, and that helped motivate us to stay inside all this time.
Idk	Learning	Idk
Make the start time a little later and end the school day a little later.	Making friends with the majority of kids who went back in person.	My ability to handle the craziness and manage my procrastination.
I hope they don't assign as much homework next year. This year we were drowning in assignments and we moved very fast	Social Stuff	that I made it through
I hope they do not do the 3 by 3 schedule again and that they go back to the old one	To be able to interact in person	
More collaboration and socializing while working.	Just a lot of learning socializing and acting normally.	Making it through.
i hope theres more breaks so i can stay focused more and that it goes slower at the start	a lot of what i learned in the past year

<p>No</p>	<p>Redacted</p>
<p>I believe that the school did not focus on the Extended Distance learning program as much as it should have, and put us with online programs in which we did not learn as much as we should have. I was appreciative of the zoom instruction that we did get, but it wasn't too great, and the asynchronous work often ended up taking longer than the classes themselves. I am looking forward to safely connecting again with teachers, the school, and fellow students again, and engage fully in the school learning environment again. Please work to engage with students more and let them develop themselves and help them to learn as much as they can.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
<p>It's really nice to have [Redacted] back, even for just a short time before the end of the year. I appreciate how both [Redacted] and [Redacted] worked with me on late assignments and were understanding about the situation that everybody was in.</p>	<p>Redacted</p>
<p>No</p>	<p>Redacted</p>
